Celebrating Our Teammates

For more than 50 years, Nucor has proudly featured teammate names on its annual report cover. This tradition started in 1975, with less than one page of names; this year, there are 20 pages.

Including every name is intentional; it's our way of recognizing every individual's contribution.
Our teammates are the foundation of Nucor and the reason we succeed.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS: Certain statements made in this annual report, or in other public filings, press releases, or other written or oral communications made by Nucor, which are not historical facts are forward-looking statements subject to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements involve risks and uncertainties which we expect will or may occur in the future and may impact our business, financial condition and results of operations. The words "anticipate," "believe," "expect," "intend," "project," "may," "will," "should," "could" and similar expressions are intended to identify those forward-looking statements. These forward-looking statements reflect the Company's best judgment based on current information, and, although we base these statements on circumstances that we believe to be reasonable when made, there can be no assurance that future events will not affect the accuracy of such forward-looking information. As such, the forward-looking statements are not guarantees of future performance, and actual results may vary materially from the projected results and expectations discussed in this report. Factors that might cause the Company's actual results to differ materially from those anticipated in forward-looking statements include, but are not limited to: (1) competitive pressure on sales and pricing, including pressure from imports and substitute materials; (2) U.S. and foreign trade policies affecting steel imports or exports; (3) the sensitivity of the results of our operations to general market conditions, and in particular, prevailing market steel prices and changes in the supply and cost of raw materials, including pig iron, iron ore and scrap steel; (4) the availability and cost of electricity and natural gas, which could negatively affect our cost of steel production or result in a delay or cancellation of existing or future drilling within our natural gas drilling programs; (5) critical equipment failures and business interruptions; (6) market demand for steel products, which, in the case of many of our products, is driven by the level of nonresidential construction activity in the United States; (7) impairment in the recorded value of inventory, equity investments, fixed assets, goodwill or other long-lived assets; (8) uncertainties and volatility surrounding the global economy, including excess world capacity for steel production, inflation and interest rate changes; (9) fluctuations in currency conversion rates; (10) significant changes in laws or government regulations affecting environmental compliance, including legislation and regulations that result in greater regulation of greenhouse gas emissions that could increase our energy costs, capital expenditures and operating costs or cause one or more of our permits to be revoked or make it more difficult to obtain permit modifications; (11) the cyclical nature of the steel industry; (12) capital investments and their impact on our performance; (13) our safety performance; (14) our ability to integrate businesses we acquire; (15) the impact of any pandemic or public health situation; and (16) the risks discussed in "Item 1A. Risk Factors" of the Company's Annual Report on Form 10-K for the year ended December 31, 2025 and elsewhere therein and in the other reports on file with the U.S. Securities and Exchange Commission.

TO OUR STOCKHOLDERS

Dear Stockholders,

This year, our team celebrated what would have been Nucor founder Ken Iverson's 100th birthday. It was an opportunity to remember the profound contributions Ken made to Nucor and the entire steel industry. The culture he built still guides us today as we execute our strategy to grow our capabilities, diversify our products, and hit new safety milestones.

Since the beginning of 2020, Nucor has experienced tremendous growth, reinvesting approximately $20 billion to grow our core steelmaking business and to expand into downstream businesses. We have started operations at four new steel mills and are nearing completion of a fifth and have added new growth platforms in our steel products business. And along the way, we have created thousands of high-quality, high-paying manufacturing jobs that serve as the backbone of our economy.

This growth period has also been the safest in our history. In 2025, we achieved another record low Illness & Injury Rate for the eighth consecutive year, and 21 divisions went the entire year without a recordable injury. I'm continually amazed by and grateful to my teammates for their commitment to safety – our most important value.

This is how we honor Ken's legacy: by growing our company and profitability while pursuing our goal to become the World's Safest Steel Company.

Leon J. Topalian
Chair and Chief Executive Officer

2025 Financial Highlights

In 2025, Nucor generated $32.5 billion in revenue and net earnings attributable to Nucor stockholders of $1.7 billion, or $7.52 per diluted share, lower than our 2024 net earnings attributable to Nucor stockholders of $8.46 per diluted share.

We shipped approximately 26.6 million tons to outside customers, up 7% from 2024, while the average sales price per ton declined 2%. Operating rates at our steel mills averaged 83% for the full year.

Nucor has always practiced prudent capital allocation, balancing the need to reinvest to grow our company, delivering meaningful returns to our stockholders, and maintaining a strong credit profile. We continue to generate strong cash flow from operations, which totaled $3.2 billion, and we ended the year with cash and short-term investments of $2.7 billion. With several capital projects being completed or being close to completion, capital spending totaled $3.4 billion. We expect free cash flow to be significantly higher next year due to lower capital spending, growing contributions from recently completed projects, and improved market conditions.

We returned approximately $1.2 billion to stockholders through share repurchases and dividend payments, representing approximately 70% of 2025 net earnings. The Board of Directors also continued its practice of increasing Nucor's regular quarterly cash dividend, raising it from $0.55 to $0.56 per share. The company has increased its regular, or base, dividend for 53 consecutive years – every year since we first began paying dividends in 1973. In November, we made our 210th consecutive dividend payment.

In September, our long-term credit ratings were upgraded to A3 by Moody's. Following the Moody's upgrade, we are now rated A- or A3 by all three ratings agencies, making us the only major North American steel producer to hold that distinction.

Our strong financial position is a competitive advantage that enables future growth, value creation and stockholder returns.

Resilient Demand

Steel demand was relatively steady throughout the year, despite macroeconomic uncertainty, continued high interest rates and changes to trade policy. Non-residential construction, which accounts for more than half of the steel we ship, continued to show strength. Sub-sectors of non-residential construction that performed particularly well included infrastructure, energy, advanced manufacturing facilities and data centers.

Thanks to strong demand in these markets, we had record rebar shipments in both the first and third quarters, plus record structural steel shipments in the first quarter. As more spending from the 2021 federal infrastructure legislation reached the construction phase, our state-of-the-art plate mill in Kentucky shipped record tons for bridge projects. This same mill also produces complex grades of plate steel for specialized military applications and has established itself as the crown jewel to supply the steel that our military requires to build new, modern naval vessels.

Data centers continue to attract significant investment and are one of the fastest growing markets. With our comprehensive portfolio of products, we can now supply nearly all of the steel products that go into a data center – from the building exterior to the interior infrastructure. We are growing our Nucor Data Systems business, adding domestic production of server cabinets and increasing capacity for hot-aisle containment and support structures. Our diverse product portfolio is unlocking powerful cross-selling opportunities and creating better outcomes for Nucor's data center customers.

Strategic Growth: Completing Projects, Creating Value

As we move into 2026, Nucor is wrapping up a multi-year capital investment campaign. We've completed 15 major projects, with four finishing in 2025: our rebar micro mill in North Carolina, a new melt shop at our Arizona bar mill, a Nucor Towers & Structures facility in Alabama, and new galvanizing and pre-paint lines at our Indiana sheet mill. In 2026, we will complete most of what is

left in this growth phase, including our West Virginia sheet mill, a second greenfield Towers & Structures plant in Indiana, and a new galvanizing line at our South Carolina sheet mill.

Our team is entering a new phase of our growth strategy. Now we are shifting from building to operating – running these new assets to serve our customers and deliver value for stockholders. Our organic growth has been strengthened by strategic acquisitions in steel-adjacent businesses that have expanded our product portfolio and created new growth platforms.

Our growth strategy has never been about simply getting bigger; it's about generating more value for our customers, stockholders, and teammates. These projects and acquisitions strengthen and diversify our earnings while letting us serve customers with comprehensive, integrated solutions no competitor can match. And by optimizing our full portfolio to operate as one team, we make it easier for our customers to buy, build, and succeed.

Policy Changes Benefit the American Steel Industry

As he did in his first term, President Trump made vigorous trade enforcement a central part of his economic policy when he returned to the White House in January. He quickly reinstated the full Section 232 steel tariffs, which had been weakened since 2018 through country exemptions and product-specific exceptions, and later increased the tariff rate to 50% for most countries. The Administration also applied tariffs to steel derivative products, an important step in closing circumvention loopholes.

The steel tariffs, combined with ongoing trade cases for products like corrosion resistant steel and rebar, have lowered imports. Foreign imports' share of the U.S. finished steel market dropped from approximately 22% in the first quarter of 2025 to 14% in the fourth quarter, with imports declining meaningfully in the second half of the year. We expect imports will continue to trend at or below those levels in 2026 as the market absorbs the full impact of the Section 232 tariffs and recent trade case determinations.

These actions are leveling the playing field for the American steel industry and are necessary tools to counteract the massive amounts of production overcapacity that persists in the global steel sector. We believe the tariffs must stay in place, with no exceptions or loopholes, until fundamental changes in the global steel industry occur.

Congress and the President also took action to stimulate economic growth. Tax changes in the One Big Beautiful Bill, including restoring 100% bonus depreciation and reinstating immediate expensing of research and development, will encourage new investments in steel-intensive projects and promote the reshoring of vital manufacturing. The legislation also includes historic funding to build out our nation's U.S. Naval and Coast Guard fleets and to revitalize our maritime industrial bases. As North America's largest and most capable steel and steel products company, Nucor is well positioned to support these efforts.

A Strong Foundation for Future Growth

We head into 2026 in a very strong position. Our backlogs are up nearly 40% in the steel mills segment and 15% in steel products compared to the start of 2025. Demand remains healthy in several key markets while imports continue declining. We expect to continue to see strength in many of our primary end markets, including infrastructure, data centers and energy. We also see healthy demand related to advanced manufacturing and construction of the border fence.

At the end of the year, we announced that our Chief Financial Officer, Steve Laxton, was promoted to President and Chief Operating Officer, effective January 1, 2026. Steve has shown exceptional leadership and strategic vision during his career with Nucor, and in this new role he will be able to have an even greater impact on Nucor's future.

Effective March 1, 2026, Jack Sullivan was promoted to Chief Financial Officer, Treasurer and Executive Vice President, succeeding Steve. This transition reflects our thoughtful succession planning and ensures strong leadership continuity. We believe Jack's financial expertise, disciplined approach to capital allocation and deep understanding of our business will serve our company well as we continue executing our long-term strategy.

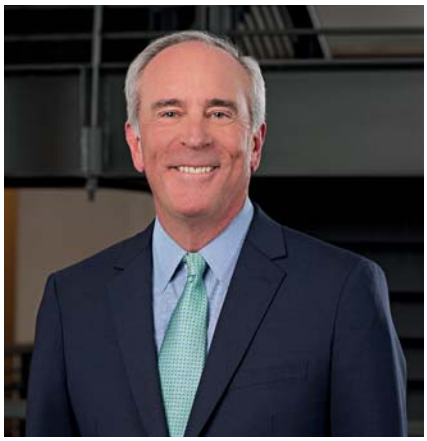
Steve's promotion came as our current COO, Dave Sumoski, announced his retirement after more than 30 years with Nucor. Dave's deep operational knowledge and leadership in advancing our safety culture leaves a lasting mark on our company. On behalf of all teammates, I wish Dave and his family a long and happy retirement.

We are proud to have delivered another year of solid performance for our stockholders, customers and teammates. Thank you to our team for your continued commitment to safety and for advancing our growth strategy in 2025. With the majority of our recent investments largely complete, I'm confident we are set up to enter our next growth phase from a position of strength, with a focus on disciplined capital allocation while driving long-term value for our stockholders.

Sincerely,

Leon J. Topalian
Chair and Chief Executive Officer

NUCOR
STEEL



Fellow Stockholders,

This year, Nucor's 33,000 teammates reached important milestones as they continued to execute the company's mission to Grow the Core, Expand Beyond and Live Our Culture. The Nucor team has successfully completed several major capital projects that increase the capabilities of our core steelmaking operations, and it has also continued to integrate recent acquisitions of downstream steel-adjacent businesses that are growing the earnings of Nucor's Steel Products Group.

Amidst this significant growth and change, the team has also continued to deliver its safest years in company history. In 2025, the team achieved the lowest Injury & Illness rate in Nucor's history, marking the eighth consecutive year of improvement. When Leon started his tenure as CEO, he challenged the team to become the World's Safest Steel Company – a goal the Board of Directors strongly supports – and the team has responded.

In 2025, Nucor continued its long history of returning capital to its stockholders through share buybacks and increased dividend payments, which totaled $1.2 billion and represented approximately 70% of 2025 net earnings. The Board of Directors also increased Nucor's regular quarterly cash dividend, from $0.55 to $0.56 per share, marking the 53rd consecutive year of increases in the dividend.

The Nucor team is at a transition point in 2026, moving from executing multiple large construction projects to ramping up and operating new assets that will enable Nucor to further expand its unmatched portfolio of steel products and grow earnings for our stockholders. The Board of Directors looks forward to continuing to work with Leon, Steve and the entire Executive Team to explore additional growth opportunities for this great company. Thank you for your continued investment in Nucor, and congratulations to the Nucor team on another excellent year.

Sincerely,

Christopher J. Kearney
Lead Director

STEEL MILLS SEGMENT

In the steel mills segment, Nucor produces sheet steel (hot-rolled, cold-rolled and galvanized), plate steel, structural steel (wide-flange beams, beam blanks, H-piling and sheet piling) and bar steel (blooms, billets, concrete reinforcing bar, merchant bar and engineered special bar quality ("SBQ")). Nucor manufactures steel principally from scrap steel and scrap steel substitutes using electric arc furnaces ("EAFs") along with continuous casting and automated rolling mills. The steel mills segment also includes Nucor's equity method investment in NuMit LLC ("NuMit") (see "Steel joint venture"- below), as well as international trading and distribution companies that buy and sell steel manufactured by the Company and other steel producers.

The steel mills segment sells its products primarily to steel service centers, fabricators and manufacturers located throughout the United States, Canada and Mexico. The steel mills segment sold approximately 19,848,000 tons to outside customers in 2025. In 2025, 79% of the shipments made by our steel mills segment were to external customers. The remaining 21% of the steel mills segment's shipments went to our steel products segment.

Bar Mills

Nucor has 15 bar mills located across the United States that manufacture a broad range of products, including concrete reinforcing bars, hot-rolled bars, rounds, light shapes, structural angles, channels, wire rod and highway products in carbon and alloy steels. Four of the bar mills have a significant focus on manufacturing SBQ and wire rod products.

Steel produced by our bar mills has a wide usage serving end markets, including the agricultural, automotive, construction, energy, infrastructure, machinery, metal building, railroad, recreational equipment, shipbuilding, heavy truck and trailer market segments. Considering Nucor's production capabilities and the mix of bar products generally produced and marketed, the capacity of the bar mills is estimated at approximately 9,800,000 tons per year.

Reinforcing and merchant bar steel are sold in standard sizes and grades, which allows us to maintain inventory levels of these products to meet our customers' expected orders. Our SBQ products are hot-rolled to exacting specifications primarily servicing the automotive, energy, agricultural, heavy equipment and transportation sectors.

In April 2022, Nucor announced that it would build a new rebar micro mill, with spooling capabilities, in Lexington, North Carolina. Construction of the new rebar micro mill is complete and the facility is in the production ramp-up phase. Additionally, Nucor Wire Products Connecticut, Inc. (formerly Nucor Steel Connecticut, Inc.) no longer produces bar products and will be represented in the wire group going forward.

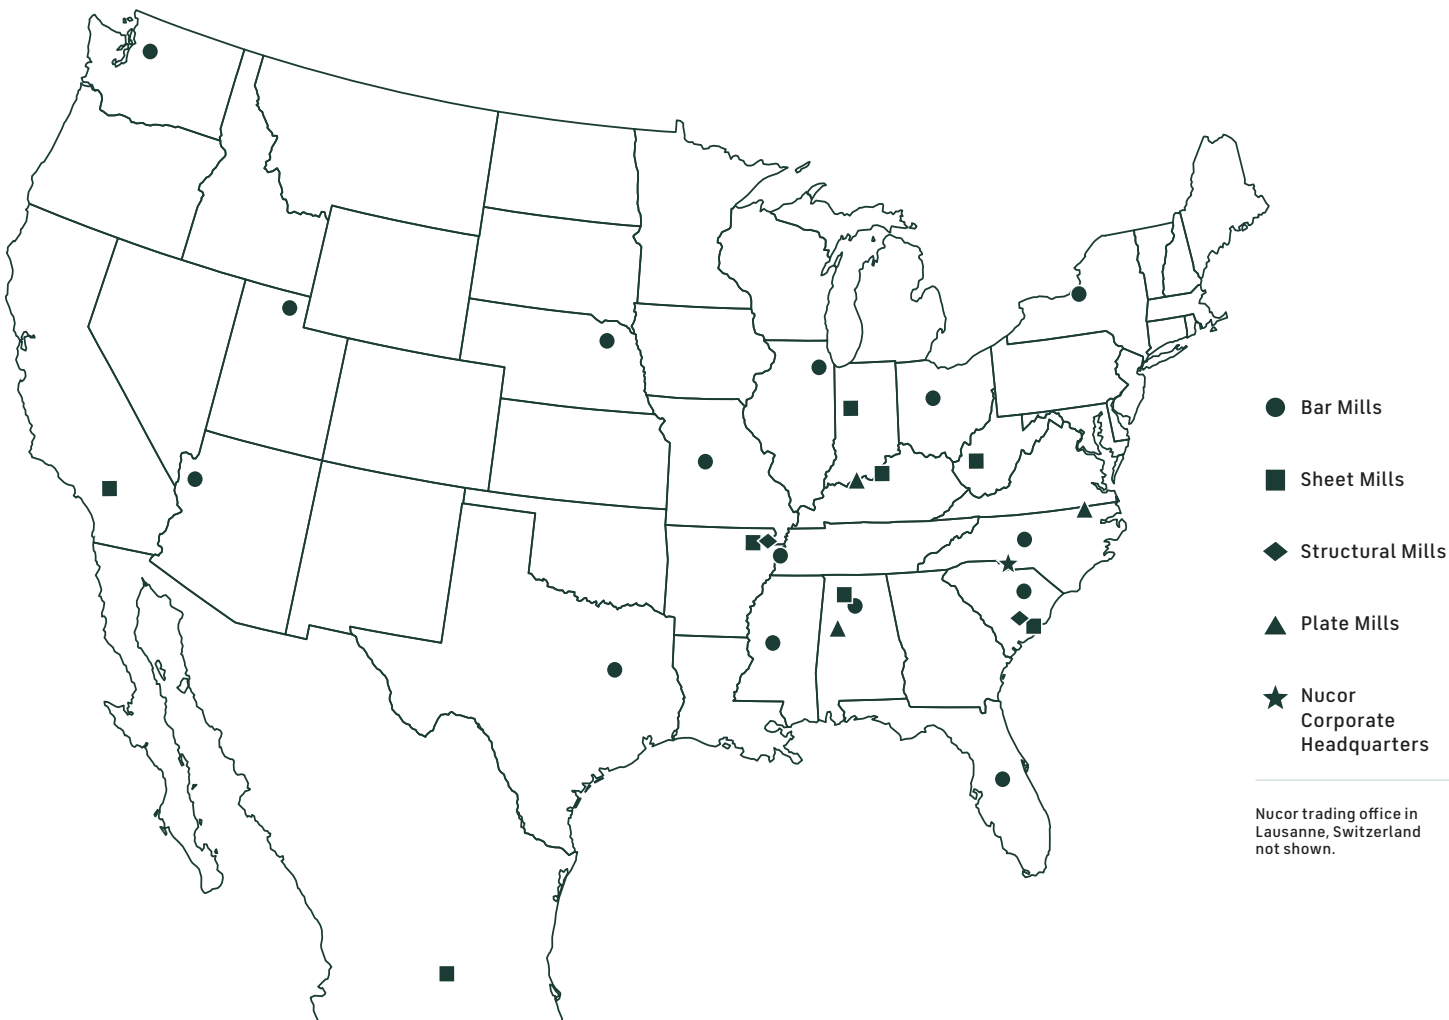
Sheet Mills

Nucor operates six sheet mills that produce flat-rolled steel for automotive, appliance, construction, pipe and tube and many other industrial and consumer applications. Included in our six sheet mills is California Steel Industries, Inc. ("CSI"), in which Nucor has a 51% controlling ownership position. Considering Nucor's production capabilities and the mix of flat-rolled products generally produced and marketed, the capacity of the sheet mills is estimated at approximately 14,500,000 tons per year. All of our sheet mills are equipped with galvanizing lines and four of them are equipped with cold rolling mills for further processing of hot-rolled sheet steel.

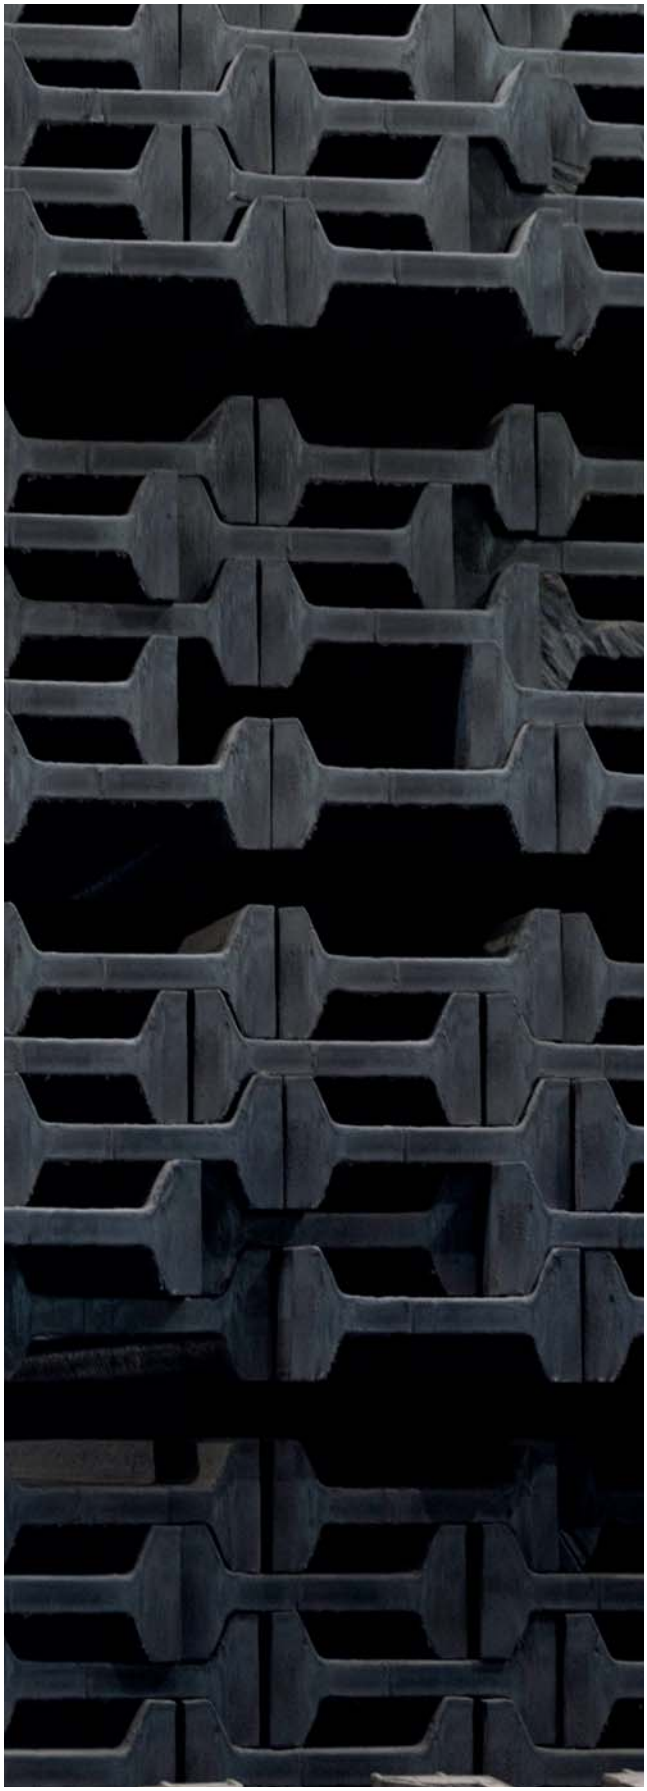
Nucor produces hot-rolled, cold-rolled and galvanized sheet steel to customers' specifications. Contract sales within the steel mills segment are most notable in our sheet operations, as it is common for contract sales to account for the majority of sheet sales in a given year. We estimate that approximately 85% of our sheet steel sales in 2025 were to contract customers. These sheet sales contracts are noncancellable agreements that generally incorporate monthly or quarterly price adjustments reflecting changes in the current market-based indices and/or raw material cost, and typically have terms ranging from six to 12 months. The balance of our sheet steel sales were made in the spot market at prevailing prices at the time of sale. The number of tons sold to contract customers at any given time depends on a variety of factors, including our consideration of current and future market conditions, our strategy to appropriately balance spot and contract tons in a manner to meet our customers' requirements while considering the expected profitability, our desire to sustain a diversified customer base, and our end-use customers' perceptions about future market conditions.

Nucor owns a 51% controlling economic and voting interest in Nucor-JFE Steel Mexico, S. de R.L. de C.V. ("NJSM"). NJSM is a joint venture with JFE Steel Corporation of Japan that operates a galvanized sheet steel plant in central Mexico with an annual capacity of approximately 400,000 tons, that is expected to supply the country's automotive market.

In January 2022, Nucor announced it had selected Mason County, West Virginia as the site for its new three-million-ton state-of-the-art sheet mill. When operational, the new mill will be equipped to produce 84-inch sheet products, and among other features, will include a 76-inch tandem cold mill and two galvanizing lines capable of producing advanced high-end automotive and construction grades.



Nucor trading office in Lausanne, Switzerland not shown.



Structural Mills

Nucor operates two structural mills that produce wide-flange steel beams, pilings and heavy structural steel products for fabricators, construction companies, manufacturers and steel service centers. Nucor owns a 51% interest in Nucor-Yamato Steel Company (Limited Partnership) ("Nucor-Yamato") located in Blytheville, Arkansas. Nucor-Yamato is the only North American producer of high-strength, low-alloy beams. Common applications for the high-strength, low-alloy beams include gravity columns for high-rise buildings, long-span trusses for stadiums and convention centers, and for use in all projects where seismic design is a critical factor. The benefits of high-strength, low-alloy beams are increasingly recognized by Nucor's customers in the construction sector. These include savings in terms of construction time, weight, space, and overall environmental impact. Nucor sells its high-strength, low-alloy beams under the trade name AEOS®.

Nucor also owns a structural mill in Berkeley County, South Carolina. Considering Nucor's production capabilities and the mix of structural products generally produced and marketed, the capacity of the two structural mills is estimated at approximately 3,300,000 tons per year.

Structural steel products come in standard sizes and grades, which allows us to maintain inventory levels of these products to meet our customers' expected orders.

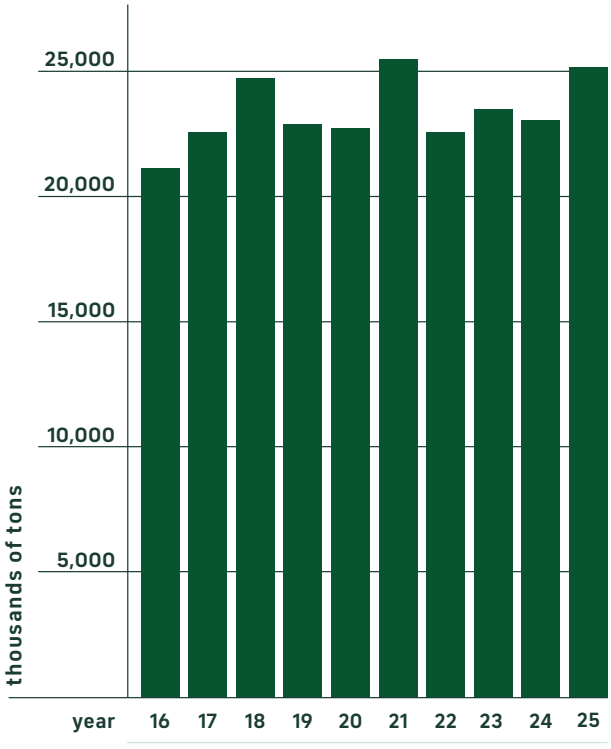
Plate Mills

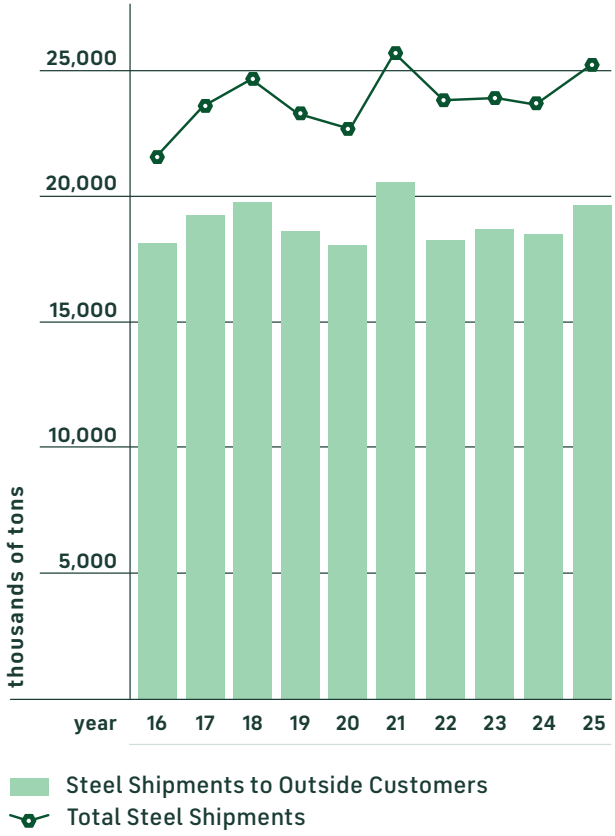
Nucor operates three plate mills that produce plate for manufacturers of barges, bridges, heavy equipment, rail cars, refinery tanks, ships, wind towers and other items. Our products are further used in the pipe and tube, pressure vessel, transportation and construction industries. Considering Nucor's production capabilities and the mix of plate products generally produced and marketed, the capacity of the plate mills is estimated at approximately 3,600,000 tons per year.

Certain plate steel products come in standard sizes and grades, which allows us to maintain inventory levels of these products to meet our customers' expected orders.

Steel Joint Venture

Nucor owns a 50% economic and voting interest in NuMit, a company that owns 100% of the equity interest in Steel Technologies LLC ("Steel Technologies"), an operator of 30 strategically located sheet processing facilities in the United States, Canada and Mexico. Steel Technologies transforms flat-rolled steel into products that meet exacting specifications for customers in a wide range of industries, including the automotive, agricultural and consumer goods markets.

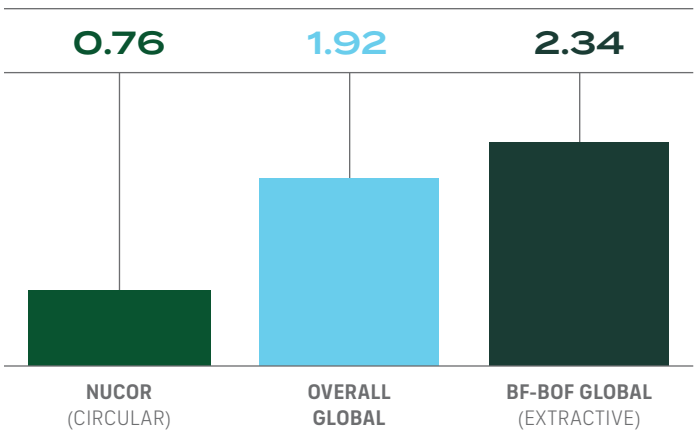




A GLOBAL LEADER IN STEELMAKING SUSTAINABILITY

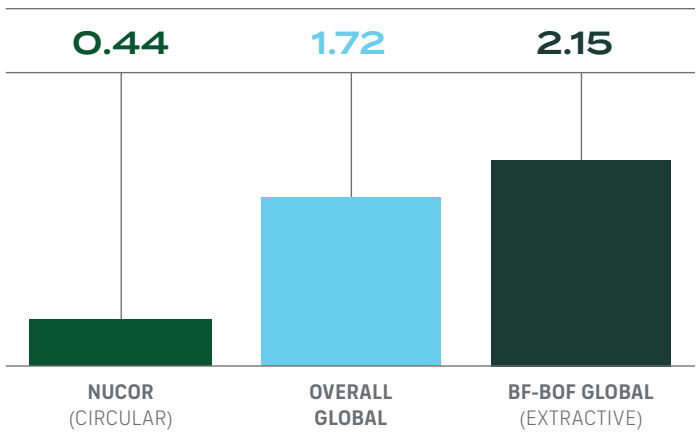
SCOPE 1, 2 & 3 INTENSITY [1]

(METRIC TONS OF CO_2 EQ. PER METRIC TON OF STEEL PRODUCED)



SCOPE 1 & 2 INTENSITY [1]

(METRIC TONS OF CO_2 EQ. PER METRIC TON OF STEEL PRODUCED)



[1]Nucor data is for 2025. Overall Global and BF-BOF Global data is for 2024, which was the latest available information as of the printing of this report. Nucor Steel Kingman and Lexington are not included in the 2025 intensity as these facilities are conducting start-up and ramp-up activities.

STEEL PRODUCTS SEGMENT

In the steel products segment, Nucor produces steel joists and joist girders, steel deck, galvanized torque tubes used in solar arrays, hollow structural section ("HSS") steel tubing, electrical conduit, fabricated concrete reinforcing steel, cold finished steel, steel fasteners, steel grating and expanded metal, wire and wire mesh, metal building systems, insulated metal panels, steel racking for warehouse systems and data centers, overhead doors, and utility towers and structures for communications and energy transmission. The steel products segment also includes our piling distributor.

Our capabilities in insulated metal panels, steel racking, overhead doors and towers and structures have all been acquired over the past several years as part of our Expand Beyond strategy, which we believe can enhance our profit margins, return on invested capital and free cash flow generation and, over time, accelerate our overall growth while reducing the volatility of our earnings. A value driver in each of these businesses is to readily leverage our core competencies as a highly efficient manufacturer of steel products, as well as our inclusive, safety-focused, performance-oriented culture.

Our steel products businesses primarily serve the nonresidential construction and infrastructure markets. Our door technologies businesses also serve the garage door repair and replacement market.

Vulcraft/Verco

The Vulcraft/Verco group is the nation's leading producer of open-web steel joists, joist girders and steel decking, which are used primarily for nonresidential building construction. Steel joists and joist girders are produced and marketed throughout the United States by seven domestic Vulcraft facilities. The Vulcraft/Verco group's steel decking is produced and marketed throughout the United States by nine domestic plants. Six of these plants are adjacent to Vulcraft joist facilities. The Vulcraft/Verco group also has two plants in Canada—one in Eastern Canada and one in Western Canada—that produce both joist and deck. The annual joist and deck production capacity is approximately 1,300,000 tons.

Sales of steel joists, joist girders and steel decking are dependent on the nonresidential building construction market. The majority of steel joists, joist girders and steel decking are used extensively as part of the roof and floor structural support systems in warehouses, data centers, manufacturing buildings, retail stores, shopping centers, schools, hospitals, and, to a lesser extent, in multi-story buildings and apartments. We make these products to our customers' specifications and typically deliver them directly to a construction site according to a prearranged schedule and sequence. The majority of these contracts are firm, fixed-price contracts that are, in most cases, competitively bid against other suppliers.

Our Vulcraft/Verco group also manufactures and fabricates steel bar grating products at four of its facilities and serves the new construction and maintenance-related markets. The annual production capacity for our grating business is approximately 50,000 tons.

Tubular Products

The Nucor Tubular Products ("NTP") group has seven tubular facilities that are located in close proximity to Nucor's sheet mills. The NTP group produces HSS steel tubing, mechanical steel tubing, galvanized solar torque tube, piling, sprinkler pipe, heat-treated tubing and electrical conduit. HSS steel tubing, mechanical steel tubing and sprinkler pipe are used in structural and mechanical applications, including nonresidential construction, infrastructure, agricultural, automotive and construction equipment end-use markets. Heat-treated tubing and electrical conduit are primarily used to protect and route electrical wiring in various nonresidential structures such as hospitals, schools, office buildings, data centers, hotels, stadiums and shopping malls. Galvanized solar torque tube is an essential component for ground-mount solar systems. Total annual tubular products capacity is approximately 1,600,000 tons.

Rebar Fabrication

Nucor Rebar Fabrication fabricates, installs and distributes rebar for a wide variety of construction work classified as infrastructure (e.g., highways, bridges, reservoirs, utilities and airports) and various building projects, including manufacturing facilities, warehouses, data centers, hospitals, schools, stadiums, commercial office buildings and multi-tenant residential construction. We sell and install fabricated reinforcing products primarily on a construction contract bid basis.

Reinforcing products are essential to concrete construction. They supply tensile strength, as well as additional compressive strength, and protect concrete from cracking. In many markets, Nucor Rebar Fabrication sells reinforcing products on an installed basis (i.e., Nucor Rebar Fabrication fabricates the reinforcing products for a specific application and performs the installation). Nucor Rebar Fabrication operates nearly 70 fabrication facilities across the United States and Canada, with each facility serving a local market. Total annual rebar fabrication capacity is approximately 1,700,000 tons.

Buildings Group

The Nucor Buildings group is the nation's leading supplier of pre-engineered metal buildings. Nucor produces metal buildings and components throughout the United States under the following brands: Nucor Building Systems, American Buildings Company and Kirby Building Systems.

The sizes of the buildings that can be produced range from less than 1,000 square feet to more than 1,000,000 square feet. Complete metal building packages can be customized and combined with other materials such as glass, wood, insulated metal panels and masonry to produce cost-effective, energy efficient, aesthetically pleasing buildings designed to the customers' special requirements. The buildings are sold primarily through independent builder distribution networks in order to provide fast-track, customized solutions for building owners. The primary markets served are commercial, industrial and institutional buildings, including distribution centers, data centers, automobile dealerships, retail centers, schools and manufacturing facilities.

Insulated Metal Panels ("IMP")

We believe the Nucor Insulated Panels Group, which includes industry-leading brands, CENTRIA and Metl-Span, broadens the value-added solutions that the Nucor Buildings group can provide to targeted end markets such as warehousing, distribution and data centers. We expect these end-use markets to continue to grow in the coming years. IMPs facilitate cost-effective climate control in the built environment and reduce energy usage and overall operations related greenhouse gas ("GHG") emissions for owners and lessees.

Racking

Nucor Racking Group ("NRG") produces and installs standard and custom designed steel racking systems for warehouse applications, including rack supported buildings and warehouses designed to leverage emerging automatic storage and retrieval (ASRS) technology. In April 2024, we acquired Southwest Data Products, Inc. to expand and enhance NRG's ability to serve the rapidly growing data center market with steel racking and other products. NRG's added capabilities now include airflow containment structures, cabinet/enclosures, caging and other products for both new data centers and data center retrofits. NRG now has six primary manufacturing locations and a team of dedicated installers.

Door Technologies

The Nucor Door Technologies group includes industry leading brands C.H.I. Overhead Doors, LLC ("CHI") and Rytec Corporation ("Rytec"). CHI is a leading manufacturer of overhead doors for residential and commercial markets in the United States and Canada. We believe that by leveraging Nucor's existing sales channels into the broader nonresidential construction market we can facilitate CHI's continuing growth. CHI has two manufacturing locations.

In July 2024, Nucor acquired Rytec, a manufacturer and seller of high-speed, high-performance commercial doors. We believe adding high-performance doors will create cross selling opportunities with other Nucor businesses. Rytec has two manufacturing facilities.

Towers & Structures

Nucor Towers & Structures ("NTS"), a division created in 2022 following the acquisition of Summit Utility Structures, LLC and a related company, Sovereign Steel Manufacturing LLC, produces steel poles and other steel structures for utility infrastructure.

In 2023, Nucor announced it would build new manufacturing locations to expand the nationwide footprint of NTS. Those new facilities are located adjacent to Nucor's existing steel mills in Decatur, Alabama and Crawfordsville, Indiana. In 2024, Nucor announced an additional NTS location to be built in Brigham City, Utah.

Construction is complete at the Decatur, Alabama facility and is in the production ramp-up phase. Construction is ongoing at both the Crawfordsville, Indiana and Brigham City, Utah facilities, with Crawfordsville planned to be completed in 2026 and Brigham City planned to be completed in 2027.

Piling Products

Skyline Steel LLC and its subsidiaries ("Skyline") are primarily steel foundation distributors serving the North American market. Skyline distributes products to service marine construction, bridge and highway construction, heavy civil construction, flood protection, underground commercial parking and environmental containment projects in the infrastructure and construction industries. Skyline also manufactures a complete line of geostructural foundation solutions, including threaded bar, micropile, strand anchors and hollow bar. It also processes and fabricates spiral weld pipe piling, rolled and welded pipe piling, and cold-formed sheet piling.

Cold Finish

Nucor Cold Finish ("NCF") is the largest and most diversified producer of cold finished bar products for a wide range of industrial markets in North America, with assets in Canada, Mexico and throughout the United States. The total capacity of the Nucor cold finished bar and wire facilities is approximately 1,000,000 tons per year.

Nucor's cold finished facilities produce cold finished bars for demanding applications. NCF obtains most of its steel from the Nucor bar mills, ensuring consistent quality and supply through all market conditions. These facilities produce cold-drawn, turned, ground and polished steel bars that are used extensively for shafting and other precision machined applications. NCF produces rounds, hexagons, flats and squares in carbon, alloy and leaded steels. These bars are purchased by the appliance, automotive, construction equipment, electric motor, farm machinery and fluid power industries, as well as by service centers. NCF bars are used in tens of thousands of products. A few examples include anchor bolts, hydraulic cylinders and shafting for air conditioner compressors, ceiling fan motors, garage door openers, electric motors and lawn mowers.

Steel Mesh, Wire & Fasteners

Nucor produces mesh at Nucor Wire Products Utah and in Canada at Laurel Steel. Nucor produces wire at Nucor Wire Products Connecticut and Nucor Wire Products Utah.

Nucor Fastener's bolt-making facility in Indiana produces carbon and alloy steel hex head cap screws, hex bolts, structural bolts, nuts and washers, finished hex nuts and custom-engineered fasteners. Nucor fasteners are used in a broad range of markets, including automotive, machine tool, farm implement, construction and military applications.

RAW MATERIALS SEGMENT

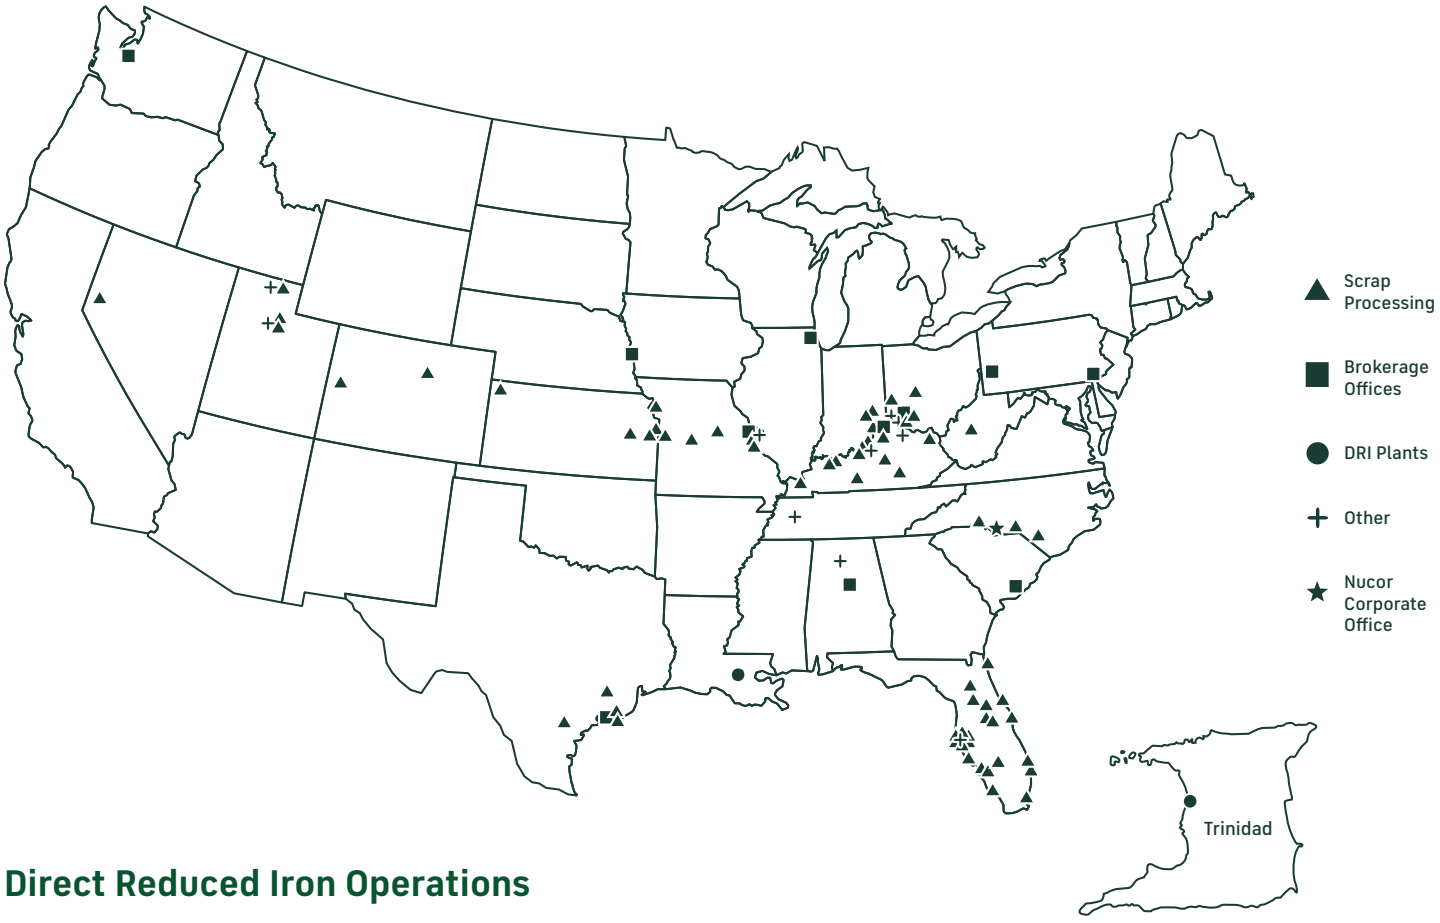
In the raw materials segment, Nucor produces direct reduced iron ("DRI") and, through The David J. Joseph Company and its affiliates ("DJJ"), brokers ferrous and non-ferrous metals, pig iron, hot briquetted iron and DRI; supplies ferro-alloys; and processes ferrous and non-ferrous scrap metal. The raw materials segment also includes our natural gas production operations and our industrial gas business, Universal Industrial Gases. Nucor's raw materials investments are focused on creating an advantage for its steelmaking operations, through a global information network and a multi-pronged and flexible approach to raw materials supply.

Scrap Recycling & Brokerage Operations

DJJ operates six regional scrap recycling companies across the United States that together have shredders capable of processing approximately 6,800,000 tons of ferrous scrap annually. DJJ's scrap recycling operations use expertise and technology to maximize metal recovery and minimize waste.

DJJ is the leading broker of ferrous scrap in North America and is a global trader of scrap metal, pig iron and other metallics. In addition to sourcing steel scrap for Nucor's mills, DJJ is a global trader of ferro-alloys and non-ferrous metals. DJJ's logistics team owns and operates one of the largest independent fleets of railcars in the United States dedicated to the movement of scrap and steel and also offers railcar leasing and railcar fleet management services.

Our primary external customers for ferrous scrap are EAF steel mills and foundries that use ferrous scrap as a raw material in their manufacturing process. External customers purchasing non-ferrous scrap metal include aluminum can producers, secondary aluminum smelters, steel mills, and other processors and consumers of various non-ferrous metals. We market scrap metal products and related services to our external customers through in-house sales forces. In 2025, approximately 7% of the ferrous and non-ferrous metals and scrap substitute tons we brokered and processed were sold to external customers. We consumed the balance in our steel mills.



Direct Reduced Iron Operations

DRI is a substitute material for high-quality grades of scrap and pig iron. Nucor operates two DRI plants which supplied approximately 3,300,000 metric tons of material with world-class metallization rates and carbon content to our steel mills in 2025. Nucor's wholly owned subsidiary, Nu-Iron Unlimited, is located in Trinidad and benefits from a low-cost supply of natural gas and favorable logistics for inbound iron ore and shipment of DRI to the United States. Nucor's second DRI plant in Louisiana also benefits from favorable logistics and proximity to its steel mill customers.

Nucor's DRI production and brokering capabilities provide our steel mills flexibility to quickly adjust their metallic input mix to changing market conditions, enabling them to maintain competitiveness in the often-volatile ferrous scrap market. With the potential for high-quality scrap to become scarcer, coupled with the risk of third-party supplier disruptions, Nucor's DRI facilities provide a greater degree of certainty over metallics supply to its steel mills.

Natural Gas Production Programs

Nucor owns operating wells and leasehold interests in natural gas properties in the South Piceance Basin in the Western Slope of Colorado.

Nucor's access to a long-term, low-cost supply of natural gas is a component in the execution of Nucor's raw material strategy. Natural gas produced by Nucor's production operations is sold to third parties to partially offset our exposure to changes in the price of natural gas consumed by our DRI plant in Louisiana and our steel mills in the United States.

Process Gases

Universal Industrial Gases provides the capability to build and operate our own air separation units to serve our steel mills, providing us with an alternative to long-term service contracts with outside providers. Where economies of scale and regional market conditions warrant, we can also sell excess output from these plants on a merchant basis. As of December 31, 2025, Nucor had 10 industrial gas plants operating, and six others at various stages of commissioning, construction, or planning.

Annual Meeting

The 2026 annual meeting of stockholders will be held at 9:00 a.m., Eastern Time, on Thursday, May 14, 2026. To participate in the annual meeting, visit www.virtualshareholdermeeting.com/NUE2026.

Stock Listing

Nucor's common stock is traded on the New York Stock Exchange under the symbol NUE. As of January 31, 2026, there were approximately 10,000 stockholders of record.

Form 10-K

A copy of Nucor's 2025 Annual Report on Form 10-K filed with the Securities and Exchange Commission ("SEC") is available to stockholders without charge upon request to A. Rae Eagle, Vice President and Corporate Secretary, at Nucor's corporate office.

Internet Access

Nucor's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, current reports on Form 8-K and any amendments to these reports, as well as proxy statements and other information, are posted to Nucor's website, www.nucor.com, as soon as reasonably practicable after Nucor files these documents electronically with, or furnishes them to, the SEC. Additional information available on our website includes our Corporate Governance Principles, Board of Directors Committee Charters, Standards of Business Conduct and Ethics and Code of Ethics for Senior Financial Professionals as well as various other financial and statistical data.

Stock Performance

This graphic comparison assumes the investment of $100 in each of Nucor common stock, the S&P 500 Index and the S&P 1500 Steel Index, all at year-end 2020. The resulting cumulative total return assumes that cash dividends were reinvested. Nucor common stock comprised 37% of the S&P 1500 Steel Index at year-end 2025 (32% at year-end 2020).

NUCOR CORPORATION

(Exact name of registrant as specified in its charter)

Delaware	13-1860817
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)
1915 Rexford Road, Charlotte, North Carolina	28211
(Address of principal executive offices)	(Zip Code)

Registrant's telephone number, including area code: (704) 366-7000

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, par value $0.40 per share	NUE	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	☒	Accelerated filer	☐
Non-accelerated filer	☐	Smaller reporting company	☐
		Emerging growth company	☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C.7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b). ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

The aggregate market value of the registrant's common stock held by non-affiliates was approximately $31.44 billion based upon the closing sales price of the registrant's common stock on the last business day of the registrant's most recently completed second fiscal quarter, July 3, 2025.

The number of shares of the registrant's common stock outstanding as of February 18, 2026 was 227,774,615.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's annual report to stockholders for the year ended December 31, 2025, which will be posted to the registrant's website and furnished to the SEC subsequent to the date hereof, are incorporated by reference into Part II of this report to the extent described herein. Portions of the registrant's definitive proxy statement to be filed with the SEC in connection with the registrant's 2026 Annual Meeting of Stockholders are incorporated by reference into Part III of this report to the extent described herein.

PART I

Item 1. Business.

Overview

Nucor Corporation, a Delaware corporation incorporated in 1958, and its affiliates ("Nucor," the "Company," "we," "us" or "our") manufacture steel and steel products. The Company also produces and procures ferrous and non-ferrous materials primarily for use in its steel manufacturing business. Most of the Company's operating facilities and customers are located in North America. The Company's operations include international trading and sales companies that buy and sell steel and steel products manufactured by the Company and others.

Nucor is North America's largest recycler, using scrap steel as the primary raw material in producing steel and steel products. In 2025, we recycled approximately 20 million gross tons of scrap steel.

Segments, Principal Products Produced, and Markets and Marketing

Nucor reports its results in three segments: steel mills, steel products and raw materials. The steel mills segment is Nucor's largest segment, representing 62% of the Company's sales to external customers in the year ended December 31, 2025.

We market products from the steel mills and steel products segments mainly through in-house sales forces. We also utilize our internal distribution and trading companies to market our products abroad. The markets for these products are largely tied to end-use markets such as nonresidential construction, durable goods and capital spending that are affected by changes in general economic conditions.

We are a leading domestic provider for most of the products we supply, and, in many cases (e.g., structural steel, merchant bar steel, steel joist and deck, pre-engineered metal buildings, steel piling, cold finish bar steel, steel electrical conduit pipe and insulated metal panels), we are the leading supplier.

In recent years we have embarked on a strategy to advance Nucor's capabilities and further its value creation, as summarized in our Mission Statement: Grow the Core, Expand Beyond and Live Our Culture.

We have examined and prioritized growth opportunities across our core steelmaking, steel products and raw materials operations, and we have identified and executed on several acquisitions and investments to expand the products and services we offer beyond our traditional capabilities. We believe that the growth opportunities we are pursuing leverage our core competency as a highly efficient, industrial manufacturer working primarily with steel and steel products.

Steel mills segment

In the steel mills segment, Nucor produces sheet steel (hot-rolled, cold-rolled and galvanized), plate steel, structural steel (wide-flange beams, beam blanks, H-piling and sheet piling) and bar steel (blooms, billets, concrete reinforcing bar, merchant bar and engineered special bar quality ("SBQ")). Nucor manufactures steel principally from scrap steel and scrap steel substitutes using electric arc furnaces ("EAFs") along with continuous casting and automated rolling mills. The steel mills segment also includes Nucor's equity method investment in NuMit LLC ("NuMit") (see "Steel joint venture"- below), as well as international trading and distribution companies that buy and sell steel manufactured by the Company and other steel producers.

The steel mills segment sells its products primarily to steel service centers, fabricators and manufacturers located throughout the United States, Canada and Mexico. The steel mills segment sold approximately 19,848,000 tons to outside customers in 2025. In 2025, 79% of the shipments made by our

steel mills segment were to external customers. The remaining 21% of the steel mills segment's shipments went to our steel products segment.

- *Bar mills* - Nucor has 15 bar mills located across the United States that manufacture a broad range of products, including concrete reinforcing bars, hot-rolled bars, rounds, light shapes, structural angles, channels, wire rod and highway products in carbon and alloy steels. Four of the bar mills have a significant focus on manufacturing SBQ and wire rod products.

  Steel produced by our bar mills has a wide usage serving end markets, including the agricultural, automotive, construction, energy, infrastructure, machinery, metal building, railroad, recreational equipment, shipbuilding, heavy truck and trailer market segments. Considering Nucor's production capabilities and the mix of bar products generally produced and marketed, the capacity of the bar mills is estimated at approximately 9,800,000 tons per year.

  Reinforcing and merchant bar steel are sold in standard sizes and grades, which allows us to maintain inventory levels of these products to meet our customers' expected orders. Our SBQ products are hot-rolled to exacting specifications primarily servicing the automotive, energy, agricultural, heavy equipment and transportation sectors.

  In April 2022, Nucor announced that it would build a new rebar micro mill, with spooling capabilities, in Lexington, North Carolina. Construction of the new rebar micro mill is complete and the facility is in the production ramp-up phase. Additionally, Nucor Wire Products Connecticut, Inc. (formerly Nucor Steel Connecticut, Inc.) no longer produces bar products and will be represented in the wire group going forward.

- *Sheet mills* - Nucor operates six sheet mills that produce flat-rolled steel for automotive, appliance, construction, pipe and tube and many other industrial and consumer applications. Included in our six sheet mills is California Steel Industries, Inc. ("CSI"), in which Nucor has a 51% controlling ownership position. Considering Nucor's production capabilities and the mix of flat-rolled products generally produced and marketed, the capacity of the sheet mills is estimated at approximately 14,500,000 tons per year. All of our sheet mills are equipped with galvanizing lines and four of them are equipped with cold rolling mills for further processing of hot-rolled sheet steel.

  Nucor produces hot-rolled, cold-rolled and galvanized sheet steel to customers' specifications. Contract sales within the steel mills segment are most notable in our sheet operations, as it is common for contract sales to account for the majority of sheet sales in a given year. We estimate that approximately 85% of our sheet steel sales in 2025 were to contract customers. These sheet sales contracts are noncancellable agreements that generally incorporate monthly or quarterly price adjustments reflecting changes in the current market-based indices and/or raw material cost, and typically have terms ranging from six to 12 months. The balance of our sheet steel sales were made in the spot market at prevailing prices at the time of sale. The number of tons sold to contract customers at any given time depends on a variety of factors, including our consideration of current and future market conditions, our strategy to appropriately balance spot and contract tons in a manner to meet our customers' requirements while considering the expected profitability, our desire to sustain a diversified customer base, and our end-use customers' perceptions about future market conditions.

  Nucor owns a 51% controlling economic and voting interest in Nucor-JFE Steel Mexico, S. de R.L. de C.V. ("NJSM"). NJSM is a joint venture with JFE Steel Corporation of Japan that operates a galvanized sheet steel plant in central Mexico with an annual capacity of approximately 400,000 tons, that is expected to supply the country's automotive market.

  In January 2022, Nucor announced it had selected Mason County, West Virginia as the site for its new three-million-ton state-of-the-art sheet mill. When operational, the new mill will be equipped to produce 84-inch sheet products, and among other features, will include a 76-inch tandem cold mill and two galvanizing lines capable of producing advanced high-end automotive and construction grades.

- *Structural mills* - Nucor operates two structural mills that produce wide-flange steel beams, pilings and heavy structural steel products for fabricators, construction companies, manufacturers and steel service centers. Nucor owns a 51% interest in Nucor-Yamato Steel Company (Limited Partnership) ("Nucor-Yamato") located in Blytheville, Arkansas. Nucor-Yamato is the only North American producer of high-strength, low-alloy beams. Common applications for the high-strength, low-alloy beams include gravity columns for high-rise buildings, long-span trusses for stadiums and convention centers, and for use in all projects where seismic design is a critical factor. The benefits of high-strength, low-alloy beams are increasingly recognized by Nucor's customers in the construction sector. These include savings in terms of construction time, weight, space, and overall environmental impact. Nucor sells its high-strength, low-alloy beams under the trade name AEOS®.

  Nucor also owns a structural mill in Berkeley County, South Carolina. Considering Nucor's production capabilities and the mix of structural products generally produced and marketed, the capacity of the two structural mills is estimated at approximately 3,300,000 tons per year.

  Structural steel products come in standard sizes and grades, which allows us to maintain inventory levels of these products to meet our customers' expected orders.

- *Plate mills* - Nucor operates three plate mills that produce plate for manufacturers of barges, bridges, heavy equipment, rail cars, refinery tanks, ships, wind towers and other items. Our products are further used in the pipe and tube, pressure vessel, transportation and construction industries. Considering Nucor's production capabilities and the mix of plate products generally produced and marketed, the capacity of the plate mills is estimated at approximately 3,600,000 tons per year.

  Certain plate steel products come in standard sizes and grades, which allows us to maintain inventory levels of these products to meet our customers' expected orders.

- *Steel joint venture* - Nucor owns a 50% economic and voting interest in NuMit, a company that owns 100% of the equity interest in Steel Technologies LLC ("Steel Technologies"), an operator of 30 strategically located sheet processing facilities in the United States, Canada and Mexico. Steel Technologies transforms flat-rolled steel into products that meet exacting specifications for customers in a wide range of industries, including the automotive, agricultural and consumer goods markets.

Steel products segment

In the steel products segment, Nucor produces steel joists and joist girders, steel deck, galvanized torque tubes used in solar arrays, hollow structural section ("HSS") steel tubing, electrical conduit, fabricated concrete reinforcing steel, cold finished steel, steel fasteners, steel grating and expanded metal, wire and wire mesh, metal building systems, insulated metal panels, steel racking for warehouse systems and data centers, overhead doors, and utility towers and structures for communications and energy transmission. The steel products segment also includes our piling distributor.

Our capabilities in insulated metal panels, steel racking, overhead doors and towers and structures have all been acquired over the past several years as part of our Expand Beyond strategy, which we believe can enhance our profit margins, return on invested capital and free cash flow generation and, over time, accelerate our overall growth while reducing the volatility of our earnings. A value driver in each of these businesses is to readily leverage our core competencies as a highly efficient manufacturer of steel products, as well as our inclusive, safety-focused, performance-oriented culture.

Our steel products businesses primarily serve the nonresidential construction and infrastructure markets. Our door technologies businesses also serve the garage door repair and replacement market.

- *Vulcraft/Verco* – The Vulcraft/Verco group is the nation's leading producer of open-web steel joists, joist girders and steel decking, which are used primarily for nonresidential building construction. Steel joists and joist girders are produced and marketed throughout the United

States by seven domestic Vulcraft facilities. The Vulcraft/Verco group's steel decking is produced and marketed throughout the United States by nine domestic plants. Six of these plants are adjacent to Vulcraft joist facilities. The Vulcraft/Verco group also has two plants in Canada—one in Eastern Canada and one in Western Canada—that produce both joist and deck. The annual joist and deck production capacity is approximately 1,300,000 tons.

Sales of steel joists, joist girders and steel decking are dependent on the nonresidential building construction market. The majority of steel joists, joist girders and steel decking are used extensively as part of the roof and floor structural support systems in warehouses, data centers, manufacturing buildings, retail stores, shopping centers, schools, hospitals, and, to a lesser extent, in multi-story buildings and apartments. We make these products to our customers' specifications and typically deliver them directly to a construction site according to a prearranged schedule and sequence. The majority of these contracts are firm, fixed-price contracts that are, in most cases, competitively bid against other suppliers.

Our Vulcraft/Verco group also manufactures and fabricates steel bar grating products at four of its facilities and serves the new construction and maintenance-related markets. The annual production capacity for our grating business is approximately 50,000 tons.

- *Tubular products* – The Nucor Tubular Products ("NTP") group has seven tubular facilities that are located in close proximity to Nucor's sheet mills. The NTP group produces HSS steel tubing, mechanical steel tubing, galvanized solar torque tube, piling, sprinkler pipe, heat-treated tubing and electrical conduit. HSS steel tubing, mechanical steel tubing and sprinkler pipe are used in structural and mechanical applications, including nonresidential construction, infrastructure, agricultural, automotive and construction equipment end-use markets. Heat-treated tubing and electrical conduit are primarily used to protect and route electrical wiring in various nonresidential structures such as hospitals, schools, office buildings, data centers, hotels, stadiums and shopping malls. Galvanized solar torque tube is an essential component for ground-mount solar systems. Total annual tubular products capacity is approximately 1,600,000 tons.

- *Rebar fabrication* – Nucor Rebar Fabrication fabricates, installs and distributes rebar for a wide variety of construction work classified as infrastructure (e.g., highways, bridges, reservoirs, utilities and airports) and various building projects, including manufacturing facilities, warehouses, data centers, hospitals, schools, stadiums, commercial office buildings and multi-tenant residential construction. We sell and install fabricated reinforcing products primarily on a construction contract bid basis.

  Reinforcing products are essential to concrete construction. They supply tensile strength, as well as additional compressive strength, and protect concrete from cracking. In many markets, Nucor Rebar Fabrication sells reinforcing products on an installed basis (i.e., Nucor Rebar Fabrication fabricates the reinforcing products for a specific application and performs the installation). Nucor Rebar Fabrication operates nearly 70 fabrication facilities across the United States and Canada, with each facility serving a local market. Total annual rebar fabrication capacity is approximately 1,700,000 tons.

- *Buildings group* – The Nucor Buildings group is the nation's leading supplier of pre-engineered metal buildings. Nucor produces metal buildings and components throughout the United States under the following brands: Nucor Building Systems, American Buildings Company and Kirby Building Systems.

  The sizes of the buildings that can be produced range from less than 1,000 square feet to more than 1,000,000 square feet. Complete metal building packages can be customized and combined with other materials such as glass, wood, insulated metal panels and masonry to produce cost-effective, energy efficient, aesthetically pleasing buildings designed to the customers' special requirements. The buildings are sold primarily through independent builder distribution networks in order to provide fast-track, customized solutions for building owners. The primary markets served are commercial, industrial and institutional buildings, including

distribution centers, data centers, automobile dealerships, retail centers, schools and manufacturing facilities.

- *Insulated metal panels ("IMP")* – We believe the Nucor Insulated Panels Group, which includes industry-leading brands, CENTRIA and Metl-Span, broadens the value-added solutions that the Nucor Buildings group can provide to targeted end markets such as warehousing, distribution and data centers. We expect these end-use markets to continue to grow in the coming years. IMPs facilitate cost-effective climate control in the built environment and reduce energy usage and overall operations related greenhouse gas ("GHG") emissions for owners and lessees.

- *Racking* – Nucor Racking Group ("NRG") produces and installs standard and custom designed steel racking systems for warehouse applications, including rack supported buildings and warehouses designed to leverage emerging automatic storage and retrieval (ASRS) technology. In April 2024 we acquired Southwest Data Products, Inc. to expand and enhance NRG's ability to serve the rapidly growing data center market with steel racking and other products. NRG's added capabilities now include airflow containment structures, cabinet/enclosures, caging and other products for both new data centers and data center retrofits. NRG now has six primary manufacturing locations and a team of dedicated installers.

- *Door Technologies* – The Nucor Door Technologies group includes industry-leading brands C.H.I. Overhead Doors, LLC ("CHI") and Rytec Corporation ("Rytec"). CHI is a leading manufacturer of overhead doors for residential and commercial markets in the United States and Canada. We believe that by leveraging Nucor's existing sales channels into the broader nonresidential construction market we can facilitate CHI's continuing growth. CHI has two manufacturing locations.

  In July 2024, Nucor acquired Rytec, a manufacturer and seller of high-speed, high-performance commercial doors. We believe adding high-performance doors will create cross selling opportunities with other Nucor businesses. Rytec has two manufacturing facilities.

- *Towers & Structures* – Nucor Towers & Structures ("NTS"), a division created in 2022 following the acquisition of Summit Utility Structures LLC and a related company, Sovereign Steel Manufacturing LLC, produces steel poles and other steel structures for utility infrastructure.

  In 2023, Nucor announced it would build new manufacturing locations to expand the nationwide footprint of NTS. Those new facilities are located adjacent to Nucor's existing steel mills in Decatur, Alabama and Crawfordsville, Indiana. In 2024, Nucor announced an additional NTS location to be built in Brigham City, Utah.

  Construction is complete at the Decatur, Alabama facility and is in the production ramp-up phase. Construction is ongoing at both the Crawfordsville, Indiana and Brigham City, Utah facilities, with Crawfordsville planned to be completed in 2026 and Brigham City planned to be completed in 2027.

- *Piling products* - Skyline Steel LLC and its subsidiaries ("Skyline") are primarily steel foundation distributors serving the North American market. Skyline distributes products to service marine construction, bridge and highway construction, heavy civil construction, flood protection, underground commercial parking and environmental containment projects in the infrastructure and construction industries. Skyline also manufactures a complete line of geostructural foundation solutions, including threaded bar, micropile, strand anchors and hollow bar. It also processes and fabricates spiral weld pipe piling, rolled and welded pipe piling, and cold-formed sheet piling.

- *Cold finish* - Nucor Cold Finish (“NCF”) is the largest and most diversified producer of cold finished bar products for a wide range of industrial markets in North America, with assets in Canada, Mexico and throughout the United States. The total capacity of the Nucor cold finished bar and wire facilities is approximately 1,000,000 tons per year.

  Nucor’s cold finished facilities produce cold finished bars for demanding applications. NCF obtains most of its steel from the Nucor bar mills, ensuring consistent quality and supply through all market conditions. These facilities produce cold-drawn, turned, ground and polished steel bars that are used extensively for shafting and other precision machined applications. NCF produces rounds, hexagons, flats and squares in carbon, alloy and leaded steels. These bars are purchased by the appliance, automotive, construction equipment, electric motor, farm machinery and fluid power industries, as well as by service centers. NCF bars are used in tens of thousands of products. A few examples include anchor bolts, hydraulic cylinders and shafting for air conditioner compressors, ceiling fan motors, garage door openers, electric motors and lawn mowers.

- *Steel mesh, wire and fasteners* – Nucor produces mesh at Nucor Wire Products Utah and in Canada at Laurel Steel. Nucor produces wire at Nucor Wire Products Connecticut, Inc. and Nucor Wire Products Utah.

  Nucor Fastener’s bolt-making facility in Indiana produces carbon and alloy steel hex head cap screws, hex bolts, structural bolts, nuts and washers, finished hex nuts and custom-engineered fasteners. Nucor fasteners are used in a broad range of markets, including automotive, machine tool, farm implement, construction and military applications.

Raw materials segment

In the raw materials segment, Nucor produces direct reduced iron ("DRI") and, through The David J. Joseph Company and its affiliates ("DJJ"), brokers ferrous and non-ferrous metals, pig iron, hot briquetted iron and DRI; supplies ferro-alloys; and processes ferrous and non-ferrous scrap metal. The raw materials segment also includes our natural gas production operations and our industrial gas business, Universal Industrial Gases. Nucor’s raw materials investments are focused on creating an advantage for its steelmaking operations, through a global information network and a multi-pronged and flexible approach to raw materials supply.

- *Scrap recycling and brokerage operations* - DJJ operates six regional scrap recycling companies across the United States that together have shredders capable of processing approximately 6,800,000 tons of ferrous scrap annually. DJJ’s scrap recycling operations use expertise and technology to maximize metal recovery and minimize waste.

  DJJ is the leading broker of ferrous scrap in North America and is a global trader of scrap metal, pig iron and other metallics. In addition to sourcing steel scrap for Nucor’s mills, DJJ is a global trader of ferro-alloys and non-ferrous metals. DJJ’s logistics team owns and operates one of the largest independent fleets of railcars in the United States dedicated to the movement of scrap and steel and also offers railcar leasing and railcar fleet management services.

  Our primary external customers for ferrous scrap are EAF steel mills and foundries that use ferrous scrap as a raw material in their manufacturing process. External customers purchasing non-ferrous scrap metal include aluminum can producers, secondary aluminum smelters, steel mills, and other processors and consumers of various non-ferrous metals. We market scrap metal products and related services to our external customers through in-house sales forces. In 2025, approximately 7% of the ferrous and non-ferrous metals and scrap substitute tons we brokered and processed were sold to external customers. We consumed the balance in our steel mills.

- *Direct reduced iron operations* - DRI is a substitute material for high-quality grades of scrap and pig iron. Nucor operates two DRI plants which supplied approximately 3,300,000 metric tons of material with world-class metallization rates and carbon content to our steel mills in 2025. Nucor's wholly owned subsidiary, Nu-Iron Unlimited, is located in Trinidad and benefits from a low-cost supply of natural gas and favorable logistics for inbound iron ore and shipment of DRI to the United States. Nucor's second DRI plant in Louisiana also benefits from favorable logistics and proximity to its steel mill customers.

  Nucor's DRI production and brokering capabilities provide our steel mills flexibility to quickly adjust their metallic input mix to changing market conditions, enabling them to maintain competitiveness in the often-volatile ferrous scrap market. With the potential for high-quality scrap to become scarcer, coupled with the risk of third-party supplier disruptions, Nucor's DRI facilities provide a greater degree of certainty over metallics supply to its steel mills.

- *Natural gas production programs* - Nucor owns operating wells and leasehold interests in natural gas properties in the South Piceance Basin in the Western Slope of Colorado.

  Nucor's access to a long-term, low-cost supply of natural gas is a component in the execution of Nucor's raw material strategy. Natural gas produced by Nucor's production operations is sold to third parties to partially offset our exposure to changes in the price of natural gas consumed by our DRI plant in Louisiana and our steel mills in the United States.

- *Process Gases* – Universal Industrial Gases provides the capability to build and operate our own air separation units to serve our steel mills, providing us with an alternative to long-term service contracts with outside providers. Where economies of scale and regional market conditions warrant, we can also sell excess output from these plants on a merchant basis. As of December 31, 2025, Nucor had 10 industrial gas plants operating, and six others at various stages of commissioning, construction, or planning.

Customers and Markets

We have a diverse customer base and are not dependent on any single customer. Our largest single customer in 2025 represented approximately 5% of sales and consistently pays within terms. Our steel mills use a significant portion of the products of the raw materials segment while our steel products segment uses approximately 21% of our steel mills' output.

Nonresidential construction is the largest end-use market that we serve. Products from our steel mills and steel products segments are used in a variety of nonresidential construction applications (e.g., commercial, industrial and infrastructure).

In recent years, we have come to see our EAF-based steelmaking method, with its lower GHG intensity when compared with blast furnace technology that is reliant on mined or extracted virgin iron ore and coking coal, as a competitive advantage for reasons beyond its flexible, highly variable cost base.

We have developed branded product lines and other advantages conferred by our specialized capabilities:

- Our AEOS® line of high-strength, low-alloy steel beams is one such example. Nucor's customers in the construction sector increasingly recognize the benefits of AEOS® steel products. These include savings in terms of construction time, weight, space and overall environmental impact.

- Our ECONIQ™ line of net-zero carbon steel is another example. We launched the ECONIQ™ brand during 2021 and continue to find interest from customers in both the automotive and construction end-use markets. These are the two largest end-use markets for steel in the United States.

- Our ELCYON® line of sustainable heavy gauge steel plate product will be made specifically for wind energy producers. We launched the ELYCON® brand in January 2023 and plan to manufacture this product at our new plate mill in Brandenburg, Kentucky.

We have also invested in people and processes to organize more of our commercial activities around large customers and end-use markets. We have developed dedicated teams tasked with developing relationships and educating decision makers in these sectors.

General Development of Our Business in Recent Years

Consistent with our strategy to Grow the Core, Expand Beyond and Live our Culture, Nucor has invested significant capital in recent years to expand our product portfolio to include more value-added steel mill products and capabilities, improve our cost structure, enhance our operational flexibility and increase our exposure to markets with attractive growth prospects, such as data centers and renewable energy. These investments totaled approximately $9.73 billion over the last three years, with approximately 91% going to capital expenditures and the remainder going to acquisitions. We believe that these investments will help us deliver higher returns on invested capital and long-term growth. Further, we believe shifting our product mix to a greater proportion of value-added products will make our overall business less volatile.

In our steel mills segment, Nucor has initiated several new capital projects in recent years to support our expansion of value-added product offerings and cost-reduction strategies.

- In January 2022, Nucor announced that its new state-of-the-art sheet mill will be located in Mason County, West Virginia. Construction of the new sheet mill began in the third quarter of 2023 and the mill is expected to be completed by the end of 2026. In February 2025, Nucor's Board of Directors approved the allocation of additional capital to the project as the estimate of total construction costs increased to approximately $4 billion. Factors contributing to the increased cost estimate include higher labor, material and equipment costs. The State of West Virginia has committed $350 million for the project. Nucor expects its net cash outlay for the West Virginia sheet mill will be approximately $3.65 billion.

  The West Virginia sheet mill is expected to have an annual production capacity of approximately 3,000,000 tons. The new mill will be equipped to produce 84-inch sheet products, and among other features, will include a 76-inch tandem cold mill and two galvanizing lines. Galvanizing capabilities will include an advanced automotive line with full inspection capabilities as well as a construction-grade line. In addition to its advanced capabilities and strategic location, the new greenfield mill's product mix is anticipated to have a significantly lower GHG intensity than blast furnace based competitors who have historically supplied the region.

- In April 2022, Nucor announced that it would build a new rebar micro mill, with spooling capabilities, in Lexington, North Carolina. This is Nucor's third rebar micro mill, joining its other micro mills in Missouri and Florida. We expect this $440 million investment to have an annual capacity of approximately 430,000 tons. Construction of the new rebar micro mill was completed in 2025 and the facility is currently in the production ramp-up phase.

  These mills are referred to as micro mills because they have a smaller operational footprint than our traditional rebar mills, as well as less productive capacity – typically about 400,000 tons per year. This makes them suitable for regional markets and enables us to serve these markets with a logistics cost advantage relative to competitors operating from further away. Micro mills also have a lower environmental footprint due to their smaller size and the fact that their plant design does not include a natural gas fired reheat furnace that is common in many steel mills.

Nucor has made strategic acquisitions in the steel products segment over the last three years. These were largely to further the Expand Beyond component of our strategy.

- In April 2024, Nucor acquired Southwest Data Products, Inc. ("SWDP"), a manufacturer and installer of data center infrastructure for $115 million. SWDP provides Nucor with expanded capabilities in airflow containment structures, as well as new product capabilities that include manufacturing cabinets/enclosures and caging for data centers and installation services. SWDP combined with Nucor's steel racking business to form NRG.
- In July 2024, Nucor acquired Rytec, a manufacturer and seller of high-speed, high-performance commercial doors, for $565 million. We believe the combination of Rytec and CHI will create an overhead door platform designed to deliver superior product breadth and solutions to Nucor's commercial customers.

Capital Allocation Strategy

We continue to have a balanced capital allocation framework with three primary aspects:

- *Investing in our business for profitable long-term growth through our multi-pronged strategy of optimizing existing operations, greenfield expansions and acquisitions.*
- *Returning capital to our stockholders through cash dividends and share repurchases.*

  Nucor has paid $1.55 billion in dividends to its stockholders during the past three years. That dividend payout represents 11% of cash flows from operations during that three-year period. The Company repurchased $700 million of its common stock in 2025 ($2.22 billion in 2024 and $1.55 billion in 2023).

  We intend to return at least 40% of our net income to stockholders over time via a combination of both cash dividends and share repurchases. Over the past three years, we have returned approximately 73% of our net income in this manner.
- *Maintaining a strong balance sheet, with relatively low financial leverage, as measured in terms of funded debt to total capital, as well as ample liquidity.*

  At year-end 2025, our debt to total capital was approximately 24% and we had cash and cash equivalents and short-term investments on hand of $2.70 billion. At the end of 2025, Nucor had the strongest credit ratings in the North American steel sector (A-/A-/A3) with stable outlooks at Standard & Poor’s, Fitch Ratings and Moody’s, respectively.

Competition

We compete in a variety of steel and metal markets, including markets for finished steel products, unfinished steel products and raw materials. These markets are highly competitive with many domestic and foreign firms participating, and, as a result of this highly competitive environment, we find that we primarily compete on price and service.

In our steel mills segment, our EAF steel mills face many different forms of competition, including domestic integrated steel producers (who use iron ore converted into liquid form in a blast furnace as their basic raw material instead of scrap steel), other domestic EAF steel mills, steel imports and alternative materials. Large domestic integrated steel producers have the ability to manufacture a variety of products but are often burdened with higher capital and fixed operating costs. EAF-based steel producers, such as Nucor, are more sensitive to increases in scrap prices but tend to have lower capital and fixed operating costs compared with large integrated steel producers. EAF-based steel producers also typically emit fewer GHGs per ton of steel produced than integrated steel producers.

Fluctuations in the supply of steel from non-U.S. competitors are a source of significant volatility in our primary markets. In 2025, vigorous enforcement of U.S. trade remedy laws and the full reinstatement of the Section 232 steel tariffs without exemptions or exclusions resulted in a lower volume of steel

imports compared to 2024. Imports of finished carbon and alloy steel products decreased 17.4% from 2024, supplying approximately 18% of U.S. demand in 2025.

The strength and size of the U.S. economy make the United States an attractive market to our foreign competitors. Many of these non-U.S.-based competitors operate in non-market economies and are often state subsidized or state owned, such that employment stability or other concerns take priority over the need to generate returns on their capital. They can receive support in the form of direct subsidies, low-cost energy, labor, raw material and capital. They also often face less stringent environmental and safety regulations and can benefit from an artificially low exchange rate relative to the U.S. dollar.

Many Chinese steel producers receive these kinds of support and China continues to be the largest steel producing country. In 2025, despite a continuing downturn in its property market and lower domestic demand, China still produced more than one billion net tons of steel, accounting for approximately 53% of all steel produced globally. To offset weak domestic consumption, China exported a record 131 million net tons in 2025, dampening steel prices in markets around the world.

Trade remedies implemented by the U.S. International Trade Commission, (the "USITC") such as antidumping duties ("AD") and countervailing duties ("CVD") and similar measures play a key role in allowing the American steel industry to compete on a level playing field against unfairly traded imports. There are currently 142 AD/CVD orders in place on core steel product lines made by Nucor, and sunset reviews are typically held with respect to specific exporters and products every five years.

During 2025, the U.S. Department of Commerce and the USITC made important rulings regarding unfairly traded imports of corrosion-resistant steel and rebar. The U.S. government kept in place duty orders on large diameter welded pipe from Japan and wire rod imports from China as the result of sunset reviews.

Circumvention of trade duties also continues to pose a threat. Besides producing over a billion net tons of steel in its own country, China continues to invest heavily in steel production in other countries to avoid being subject to trade duties on exports to the U.S. market. Most of the investment being done by Chinese state-owned companies outside of the country's borders is occurring in other Southeast Asia countries and Africa.

After recent years of weakened effectiveness due to country exemptions and product exclusions, the Section 232 steel tariffs were fully reinstated in 2025 without exceptions or exclusions, and were broadened to cover approximately 600 fabricated steel products. These comprehensive tariffs have been more effective in combating circumvention behaviors and keeping unfairly traded imports out of the U.S. market.

Tariffs and quota arrangements impacting steel and steel products may be enacted, enforced, extended, modified or terminated in the future. No assurance can be given as to the timing or extent of any of these changes.

We also experience competition from other materials. Depending on our customers' end use of our products, there are often other materials, such as concrete, aluminum, plastics, composites and wood that compete with our steel products. When the price of steel relative to other raw materials rises, these alternatives can become more attractive to our customers.

In our steel products segment we manufacture a wide range of products that primarily have construction applications. In each of our product lines, we face competition from well capitalized domestic and international providers offering similar products and services. We compete on price, service (e.g., consulting on engineering requirements, facilitating logistics, and timeliness of order fulfillment) and quality (e.g., reliably producing to exacting custom specifications). We believe we have established a reputation as a market leader who can consistently meet customer needs for these products in a timely

manner due to our nationwide footprint of modern production facilities and entrepreneurial, performance driven culture.

Competition in our scrap and raw materials business is also vigorous. The scrap metals market consists of many firms and is highly fragmented. Firms typically compete on price and geographic proximity to the sources of scrap metal.

Backlog

In the steel mills segment, Nucor's backlog of orders was approximately $3.35 billion and $2.13 billion at December 31, 2025 and 2024, respectively. Order backlog for the steel mills segment includes only orders from external customers and excludes orders from other Nucor businesses. Nucor's backlog of orders in the steel products segment was approximately $4.46 billion and $4.02 billion at December 31, 2025 and 2024, respectively. The majority of these orders are expected to be filled within one year. Order backlog within our raw materials segment is not meaningful because the vast majority of the raw materials that segment produces are used internally.

Sources and Availability of Raw Materials

An ample supply of high-quality scrap and scrap substitutes is critical to support Nucor's ability to produce high-quality steel. The goal of Nucor's raw materials segment is to safely produce, source, trade and transport steelmaking raw materials. Nucor's raw materials investments are focused on creating an advantage for our steelmaking operations, through a global information network and flexible approach to metallics supply.

Scrap and scrap substitutes are the most significant element in the total cost of steel production. The average cost of scrap and scrap substitutes used in our steel mills segment remained relatively stable from $394 per gross ton used in 2024 to $392 per gross ton used in 2025. On average, it takes approximately 1.1 tons of scrap and scrap substitutes to produce one ton of steel. We employ variable steel pricing mechanisms so that we are better able to maintain operating margins and meet our customer commitments as scrap and scrap substitute costs fluctuate.

Nucor remains focused on securing reliable access to low-cost raw material inputs as they are the Company's largest expense. We believe Nucor's broad, balanced supply chain is an important strength which allows us to reduce the cost of our steelmaking operations, create a shorter supply chain and have greater control over our metallic inputs. Our investment in DRI production facilities and scrap yards, as well as our access to international raw materials markets, provides Nucor with significant flexibility in optimizing our raw material mix. Additionally, having a significant portion of our raw materials supply under our control minimizes risk associated with the global sourcing of raw materials, particularly since a good deal of scrap substitutes comes from regions of the world that have historically experienced greater political turmoil, such as Ukraine, Russia and Brazil. We believe the continued successful implementation of our raw material strategy, including key investments in DRI production, as well as in the scrap brokerage and processing services performed by our team at DJJ, gives us greater control over our metallic inputs and thus helps us navigate significant fluctuations in the availability and costs of critical inputs.

DJJ acquires ferrous scrap from numerous sources, including manufacturers of products made from steel, industrial plants, scrap dealers, peddlers, auto wreckers and demolition firms. In recent years, we have developed closed loop recycling programs with some of our larger customers, through which we are able to reliably source more high purity prime scrap while reducing the waste inherent in our customers' operations.

We purchase pig iron as needed primarily from overseas sources. We received over 2,000,000 gross tons of pig iron in 2025. Our DRI plants in Trinidad and Louisiana supplied approximately 3,370,000

metric tons of DRI to our steel mills in 2025. The primary raw material for our DRI facilities is pelletized iron ore, which we purchase from various international suppliers.

The primary raw material for our steel products segment is steel produced by Nucor's steel mills.

Energy Consumption and Costs

Steel manufacturing is an energy-intensive, trade exposed industry. As a result, we continuously strive to make our operations in all three of our business segments more energy efficient. In addition, we proactively engage with suppliers, regulators and other energy industry participants to ensure the continued domestic availability of reliable, low-cost sources of energy in various forms.

Our steelmaking operations utilize EAFs for 100% of their production. The total energy consumed by Nucor includes electricity, natural gas, and other carbon raw material inputs. For the scrap melting process, electricity is the primary energy source, with natural gas combustion serving as the fuel for reheat furnaces and other pre-heating operations. Our DRI facilities in Trinidad and Louisiana are also large consumers of natural gas.

The availability and prices of electricity and natural gas are influenced by many factors, including changes in supply and demand, the regulatory environment, technological innovation, and pipeline/transmission infrastructure.

We closely monitor developments in public policy relating to energy production and consumption. We engage with policymakers to provide technical information that can inform policy decisions and avoid unintended adverse consequences of legislative and regulatory actions. We believe that a thoughtful approach to domestic energy policy can help ensure that steel and steel products manufactured in the United States remain competitive in the global marketplace.

Reducing GHG Emissions

While steel is widely understood to be essential in any modern economy, and is increasingly seen as a critical material for addressing challenges associated with climate change, the sector also has received increased attention for its GHG emissions and their potential contribution to climate change.

As the leading U.S. supplier of numerous essential steel products using primarily recycled ferrous scrap metal, we believe we are in a competitively advantageous position. Our circular production process has approximately one-third the GHG emissions intensity of the average extractive steelmaking process using a blast furnace and basic oxygen furnace.

In addition, we are committed to further reducing our GHG footprint over time. After announcing our net-zero, science-based GHG targets for 2050 and our interim emissions-reduction target for 2030, we achieved third-party certification of these targets in December 2024. Our GHG intensity targets are defined in accordance with the Global Steel Climate Council's (GSCC) Steel Climate Standard and have been verified to conform with the emissions-reduction glidepath required to achieve the Paris Climate Agreement's 1.5°C goal by 2050.

Nucor's net-zero 2050 and interim 2030 targets include scopes 1, 2 and 3 emissions from the production of hot rolled steel as defined by the GSCC, making Nucor the first diversified steelmaker in the United States to set GHG reduction targets encompassing all three scopes. In December 2025, Nucor set an industry record achieving GSCC product-level certification for 12 steel mills covering 22 products.

We plan to achieve our decarbonization goals by procuring clean electricity, deploying carbon capture and sequestration where practical, and developing near-zero GHG ironmaking technologies, as well as through the development and deployment of technologies enabling us to reduce our consumption of injection and charge carbon and natural gas.

Clean Electricity Initiatives

GHG emissions associated with our consumption of electrical power constitute approximately 30% of our current footprint.

We have invested in companies developing next generation nuclear power technologies, and are exploring ways in which we can work with these companies and with our electric utility partners to accelerate deployment of these and other clean energy technologies on the regional power grids serving our operations as they mature and become scalable.

Currently, we are a party to two Power Purchase Agreements (“PPAs”). Under these PPAs, we have agreed to purchase for a fixed price output from one solar and one wind project in the United States. The PPAs are structured for monthly financial settlement. We have undertaken these initiatives to support the ongoing diversification of generation technologies on the U.S. power grid. As part of these arrangements, we will also receive Renewable Energy Credits (“RECs”) commensurate with the renewable power we purchase. These RECs can be applied against a portion of our GHG emissions, enabling us to receive credit for reducing them. The pay-fixed, receive-floating nature of these arrangements also offsets a portion of our exposure to higher prices for electricity over the life of the contract.

In collaboration with our electric utility partner, we evaluated opportunities to deploy battery storage and solar generation in support of the expansion at our Kingman, Arizona bar mill. In 2025, we contracted with a third party to install and operate a 50 MW onsite battery energy storage system which became operational in the fourth quarter of 2025. The Kingman site will also host a 25 MW solar project, with construction planned for 2026. The goal of combining the two systems is to provide our Kingman division with access to reliable power for years to come.

Carbon Capture and Sequestration (CCS) Activity

In 2023, we signed an agreement with ExxonMobil Corporation ("ExxonMobil") to capture, transport, and inject carbon from our DRI plant in Convent, Louisiana. ExxonMobil will capture between 600,000 and 800,000 metric tons per year of CO2 from our DRI plant. We expect start-up in late 2026. ExxonMobil will receive the related tax credits and pay Nucor a fee for each ton of CO2 supplied.

Near-Zero Ironmaking

We have invested in Electra, a company that is working to develop and scale a process to produce carbon-free iron that can be used to make steel. Electra’s technology relies on intermittent electrical energy to refine low-grade iron ores through electrochemical and hydrometallurgical processes. Electra’s process operates at 60°C and removes critical impurities from low-grade ores to produce high purity iron that can be charged directly into EAF steelmaking. Electra is still in the startup phase to scale this technology.

We have entered into a partnership with Tata Steel to explore the possibility of scaling and commercializing HIsarna, a technology that enables the production of high-purity iron from low grade iron ore fines without using coke ovens. Coke ovens consume bituminous coal at high temperature to make coke, an essential ingredient for producing iron in a blast furnace. Both coke ovens and blast furnaces are GHG emissions intensive. While the HIsarna process produces GHG emissions, its CO2 rich waste gas stream can be efficiently captured and sequestered. HIsarna also produces a slag co-product that has high value for use in the cement industry.

Government Regulations

Our business operations are subject to numerous federal, state and local laws and regulations, the most significant of which are intended to protect our teammates and the environment. Due to the nature of the steel industry, we are subject to substantial regulations related to safety in the workplace. In addition to the requirements of the state and local governments of the communities in which we operate, we must comply with federal health and safety regulations and environmental regulations, the most

significant of which are enforced by the Occupational Safety and Health Administration (“OSHA”) and the U.S. Environmental Protection Agency (the "EPA"). Safety and environmental stewardship are important values to Nucor. We expect that capital expenditures we will direct toward our efforts in these areas will total approximately $250 million in 2026.

Nucor operates a robust and sustainable environmental program that incorporates the concept of each individual teammate, as well as management, being responsible for environmental performance. All steel mills that have been owned and operated by Nucor for over five years are ISO 14001 certified. Achieving ISO 14001 certification requires Nucor’s steel mills to implement an environmental management system with measurable targets and objectives, such as reducing the use of oil and grease and minimizing electricity use.

The principal federal environmental laws that regulate our business include the Clean Air Act (the “CAA”), which regulates air emissions; the Clean Water Act (the “CWA”), which regulates water withdrawals and discharges; the Resource Conservation and Recovery Act (the “RCRA”), which addresses solid and hazardous waste treatment, storage and disposal; and the Comprehensive Environmental Response, Compensation and Liability Act (the “CERCLA”), which governs releases of hazardous substances, and remediation of contaminated sites. Our operations are also subject to state and local environmental laws and regulations.

As it relates to air emission rates, EAFs are the most efficient and one of the cleanest steel making processes commercially available today. In comparison to blast furnaces, EAF emissions of sulfur oxides, particulate matter and GHGs per ton of steel are significantly less than the extractive steelmaking process utilizing a blast furnace and basic oxygen furnace. Operating EAFs instead of blast furnaces is a proven air quality improvement strategy.

The process of melting scrap metal to make steel generates particulate matter emissions that include contaminants such as paint, zinc, lead, and other metals. Each of our steel mills operates air pollution control devices (baghouses) to collect and capture these particulate matter emissions (“EAF dust”) from the steelmaking process. Initially, the particulate matter captured and collected is classified as hazardous waste under the RCRA. However, Nucor sends all but a small fraction of the EAF dust it collects to recycling facilities that recover zinc, lead and other valuable metals from this dust.

In addition to recycling EAF dust, Nucor mills beneficially reuse steel slag in road materials as a granular base, embankments, engineered fill, highway shoulders, and hot mix asphalt pavement. The physical, chemical, mechanical and thermal properties of steel slag provide a vital resource for construction companies and activities. We take considerable pride in all of our recycling efforts.

Not only does the RCRA establish standards for the management of solid and hazardous wastes, the RCRA also addresses the environmental impact of contamination from past waste disposal activities and from recycling and storage of most wastes. When the EPA determines that properties are contaminated, Nucor quickly evaluates such claims and, if Nucor is determined to be responsible, we do our part to remediate our share of such issues. Nucor believes all identified liabilities under the RCRA are either currently being resolved or have been fully resolved.

Nucor regularly evaluates these types of potential liabilities and, if appropriate, maintains reserves appropriate to remediate the identified liabilities. Under the RCRA, private citizens may also bring an action against the operator of a regulated facility for potential damages and payment of cleanup costs. Nucor believes that its system of internal evaluation and due diligence provides reasonable assurance as to these types of potential liabilities so that compliance with these regulations will not have a material adverse effect on our results of operations, financial condition or cash flow.

To protect water resources, the CWA regulates water withdrawals and discharges. When applicable, Nucor maintains water withdrawal and discharge permits at its facilities under the national pollutant discharge elimination system program of the CWA and conducts its operations in compliance with those permits. Nucor also maintains permits from local governments if the facility discharges into publicly owned treatment works.

Capital expenditures at our existing facilities that are associated with environmental regulation compliance for 2026 and 2027 are estimated to be less than $100 million per year.

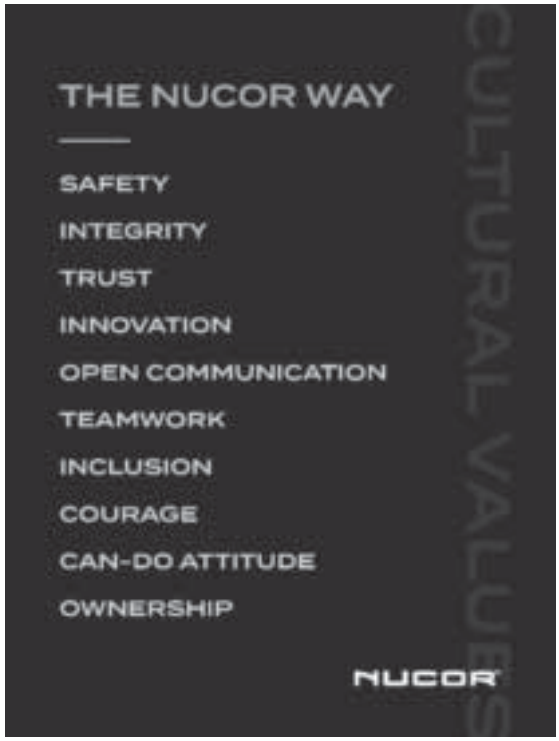
Human Capital Resources

We employ approximately 33,000 teammates. The vast majority of them are not represented by unions and are based in the United States, where most of our operations are located.

Nucor's Culture

We consider our teammates the most important part of Nucor, as they are the true source of our competitive advantage. We believe that our culture, and the encouragement that we provide our teammates, will enable us to deliver on our mission to "Grow the Core; Expand Beyond; and Live Our Culture."

While our business strategy shapes "what we do", our culture shapes "how" we go about doing it. We believe that consistent adherence to the key tenets of our culture — safety, integrity, trust, innovation, open communication, teamwork, inclusion, courage, can-do attitude and ownership — is a powerful differentiator for Nucor, enabling us to attract and retain talent, and to position the Company favorably for value-creating growth.



Safety

Nucor's most important value is our teammates' well-being and safety, and it is our goal to become the safest steel company in the world. Our foremost responsibility is to work safely, which requires our teammates to identify unsafe conditions and activities and mitigate these hazards. In recent years, we have built a broader safety leadership team dedicated to discovering, developing and sharing technology and best practices across the organization.

We will continue working to eliminate exposures that can lead to injury and encourage our teammates to share their ideas for safety improvement.

Two key metrics Nucor uses to measure safety are: the Injury/Illness Rate and Days Away, Restricted and Transfer ("DART") Case Rate.

- Nucor calculates the annual Injury/Illness Rate by dividing the number of work-related injuries and illnesses by the total number of hours worked by all Nucor teammates in a given year, and then multiplying the resulting percentage by 200,000, the equivalent of 100 full-time employees working 40 hours per week, 50 weeks per year. In 2025, we achieved an annual Injury/Illness Rate of 0.71, the lowest injury and illness rate in our history, marking the eighth consecutive year of improvement.
- Nucor uses the DART Case Rate to assess and manage the risk of serious injury in the workplace. Nucor calculates the annual DART Case Rate by dividing the number of cases resulting in days away from work, restricted work activity and/or job transfers by the total number of hours worked by all Nucor teammates in a given year, and then multiplying the resulting percentage by 200,000, the equivalent of 100 full-time employees working 40 hours per week, 50 weeks per year. In 2025, we achieved an annual DART Case Rate of 0.30, which was a 27% improvement over the prior year period.

Since 1998, Nucor has used the President's Safety Award to recognize divisions that achieve strong records of safety performance based on objective metrics. The President's Safety Award has the following three levels: Platinum, which is awarded to divisions with zero recordable illnesses or injuries; Gold, which is awarded to divisions that have an Illness/Injury Rate below 0.6 and a DART Case Rate below one-third of the national average for their NAICS code; and Silver, which is awarded to divisions that achieve one-third the national average on Illness/Injury Rate and DART Case Rate. In 2025, 21 divisions achieved the Platinum level award, 25 divisions achieved the Gold level award and 26 divisions achieved the Silver level award. Nucor also has 26 OSHA Voluntary Protection Program Sites, OSHA's highest level of recognition.

In 2020, the Company introduced the Nucor President's Safety Cup to foster more safety benchmarking throughout the Company. The President's Safety Cup is an additional annual award that is presented to the region that has the best safety record across all of Nucor. Not only does this reward a facility for exceeding their individual safety goals, but it encourages our teams to innovate and to share ideas and improve safety across operating divisions. The President's Safety Cup trophy travels among the mills and divisions that make up the winning region.

We believe, however, that safety is about more than just avoiding injuries. At Nucor, safety means what we call "whole person safety". We want to make sure our teammates feel safe, welcome and valued when they come to work each day. We are accelerating our efforts with the objective of ensuring that each teammate feels a sense of belonging at Nucor. By creating an inclusive workplace, we believe we will attract top talent, foster innovation, increase a sense of empowerment and make Nucor a stronger company.

Recruiting, Retention and Development

Our focus on inclusiveness as supportive of our culture, and the competitive advantage we derive from it, has led us to grow more intentional in our efforts to discover, recruit, retain and develop the best talent available.

Our initiatives are focused on embracing differences and building an environment of mutual respect while providing opportunities for personal and professional growth for all teammates. By prioritizing diversity of thought, background and experience, Nucor strives to reinforce our culture to drive innovation, strengthen collaboration and deliver exceptional results.

In 2024, we introduced "Assemble, Unlock and Win" ("AUW") in an effort to ensure continued success in recruiting, retaining, and developing our team, and to more explicitly connect these activities to our mission and culture. AUW's core elements include:

- **Assemble** a diverse team positioned to lead our Company into the future.
  - Attract a broad and diverse talent pool.
  - Seek the skills, experience and leadership needed to win.
  - Retain our teammates through a sense of belonging.
  - Represent and connect to the communities where we live.
- **Unlock** each teammate's full potential.
  - Foster an inclusive environment where every teammate is visible, connected, and supported.
  - Advocate for all and ensure whole person safety of our team.
  - Develop each teammate to empower their unique potential.
  - Connect with every teammate through curiosity and open communication.
- **Win** together.
  - Amplify the competitive advantage of our team and our culture.
  - Fuel innovation, creativity and solutions through diversity.
  - Deliver on the demand for talent.
  - Exceed expectations for our team, communities, customers and stockholders.

Ownership

Another Nucor core value is ownership. By recruiting and empowering entrepreneurial teammates, our goal is to foster a competitive mindset, along with a strong sense of personal responsibility and a culture of accountability and belonging.

We believe that our streamlined organizational structure reinforces this ownership aspect of our culture by allowing our teammates to make quick decisions and innovate to win. Our organization is highly decentralized, with most day-to-day operating decisions made by our division general managers and their teams. Approximately 200 teammates work in our principal executive offices in Charlotte, North Carolina.

Our operations are also highly automated, allowing us to achieve industry-leading productivity and improve safety outcomes while providing our teammates with compensation that we believe is highly competitive compared to businesses in our industry.

Our compensation policies are structured to reinforce and reward an ownership mentality among our teammates, so that they are incentivized to drive results and contribute to our success. Put simply, at Nucor, we believe in "Pay-for-Performance." Nucor teammates typically earn a significant part of their compensation based on their productivity. Production teammates work under group incentives that provide increased earnings for increased production. This additional incentive compensation is paid weekly in most cases. Nucor has also historically contributed 10% of earnings before federal taxes to a profit-sharing plan for most teammates below the officer level.

Monitoring and Measuring

Teammate input is essential for us to sustain our culture of empowered teammates enabling efficient operational decisions. Aside from our practice of everyday open communication, to maintain and build trust, we periodically ask our teammates to formally provide feedback. Since 1986, our teammates have completed a comprehensive survey providing feedback on a range of topics, including matters relating to the effectiveness of our culture. We view the survey as an important tool in continually

improving our company and ensuring our teammates remain engaged and satisfied. This survey is conducted every three years, the last of which was conducted during the third quarter of 2025.

In this most recent survey, we had a 93% participation rate and teammate satisfaction with Nucor as a place to work remained high at 85%. The overwhelming majority of responses continue to register as positive or neutral, with less than 10% registering as negative. We are absorbing the key learnings from the survey to inform how we can further improve our overall talent strategy.

Policies

Nucor has a long history of conducting our businesses in a manner consistent with high standards of social responsibility. We have adopted a comprehensive Human Rights Policy, which operates in conjunction with many other Nucor policies related to ethical conduct and human rights, including our Health and Safety Policy, Standards of Business Conduct and Ethics, Code of Ethics for Senior Financial Professionals, Supplier Code of Conduct and Policy on Eliminating Forced Labor from our Supply Chain.

More information about these and other relevant policies can be found at www.nucor.com/esg.

Available Information

Nucor's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and any amendments to these reports, as well as proxy statements and other information, are available on our website at www.nucor.com, as soon as reasonably practicable after Nucor files these documents electronically with, or furnishes them to, the U.S. Securities and Exchange Commission (the "SEC"). These filings are also available on the SEC's website at www.sec.gov.

We use the investor relations portion of our website, investors.nucor.com, to distribute information, including as a means of disclosing material, non-public information and for complying with our disclosure obligations under Regulation FD. We routinely post and make accessible financial and other information regarding the Company on our website. Accordingly, investors should monitor the investor relations portion of our website, in addition to our press releases, SEC filings and other public communications. Except as otherwise expressly stated in these documents, the information contained on our website or available by hyperlink from our website is not a part of this report and is not incorporated into this report or any other documents we file with, or furnish to, the SEC.

Item 1A. Risk Factors

Many of the factors that affect our business and operations involve risk and uncertainty. The factors described below are some of the risks that could materially negatively affect our business, results of operations, financial condition and cash flows.

Industry Specific Risk Factors

Overcapacity in the global steel industry could increase the level of steel imports into the United States, which may negatively affect our business, results of operations, financial condition and cash flows*.*

Global steel production overcapacity continues to be an ongoing risk to Nucor and the entire steel industry. The Organisation for Economic Co-operation and Development (the "OECD") has estimated global steel production overcapacity to be approximately 704 million net tons in 2025. This level of excess capacity is eight times the current annual steel production in the United States. China continues to be a significant contributor to excess steelmaking capacity, producing more than one billion net tons of steel in each of the past eight years, despite experiencing slower economic growth. Chinese steel producers are also investing in new steelmaking capacity in several countries in southeast Asia and Africa. As a result, the OECD projects that excess global steel capacity could increase nearly 20% to an estimated 795 million net tons by 2027.

During periods of global economic weakness, the effects of this overcapacity are amplified because of weaker global demand for steel and steel products. Steel manufacturers in non-market economies, such as China, tend not to adjust their production levels in line with regional demand and instead export significant amounts of steel and steel products at prices that can be at or below their costs of production. In countries with non-market economies, the steel industry is often subsidized or owned in whole or in part by the government, which can provide these producers with cost advantages or cause their production decisions to be driven by political or social factors rather than price and demand signals. Surplus output from steel producers in these countries can flow into the U.S. market. These exports to the U.S. can result in downward pressure on realized steel prices for Nucor, adversely affecting our business, results of operations, financial condition and cash flows.

After recent years of weakened effectiveness due to country exemptions and product exclusions, steel tariffs first imposed in 2018 under Section 232 of the Trade Expansion Act were fully reinstated in 2025 without exceptions or exclusions, and were broadened to cover approximately 600 fabricated steel products. These comprehensive tariffs have been more effective in combating circumvention behaviors and keeping unfairly traded imports out of the U.S. market. There can be no assurance as to when or if the Section 232 or other import tariffs, quotas or other duties may be enacted, enforced, extended, modified or terminated in the future. If the Section 232 or other import tariffs, quotas or duties expire or if others are further relaxed or repealed, or if relatively higher U.S. steel prices or a stronger U.S. dollar make it attractive for foreign steelmakers to export their steel products to the United States, despite the presence of import tariffs, quotas or duties, the resurgence of substantial imports of foreign steel could create downward pressure on U.S. steel prices.

Our industry is cyclical and both recessions and prolonged periods of slow economic growth may negatively affect our business, results of operations, financial condition and cash flows.

Demand for most of our products is cyclical in nature and sensitive to general economic conditions. Our business supports cyclical industries, such as the construction, energy, metals service centers, appliance and automotive industries. As a result, downturns in the U.S. economy or any of these industries could materially adversely affect our results of operations, financial condition and cash flows.

We are unable to predict the duration of current economic conditions or the magnitude or timing of changes in economic activity. Future economic downturns, prolonged slow growth or stagnation in the economy, a sector-specific slowdown in one of our key end-use markets, such as nonresidential construction, or changes in inflation could materially adversely affect our business, results of operations, financial condition and cash flows, especially in light of the capital-intensive nature of our business.

Competition from other steel producers, imports or alternative materials may negatively affect our business, results of operations, financial condition and cash flows.

We face ongoing competition from other steel producers and imports that compete with our products on price, quality and service. The markets for our products are highly competitive and a number of firms, domestic and foreign, participate in the steel, steel products and raw materials markets. Depending on a variety of factors, including the cost and availability of raw materials, energy, technology, labor, transportation and capital costs, currency exchange rates, government subsidies of foreign steel producers and other global political and economic factors, our business may be materially adversely affected by more intense competitive forces.

In many applications, steel competes with other materials, such as concrete, aluminum, plastics, composites and wood. Increased use or availability of these materials in substitution for steel products could have a material adverse effect on prices and demand for our steel products.

Our business requires substantial capital investment and maintenance expenditures, and our capital resources may not be adequate to provide for all of our cash requirements.

Our business requires substantial expenditures for routine maintenance and to remain competitive. For the three-year period ended December 31, 2025, our total capital expenditures were approximately $8.90 billion. In the last three years we announced various substantial capital projects that we expect will increase production capacity, increase the efficiency of our operations and enhance our product offerings. Although we expect requirements for our business needs, including the funding of capital expenditures, debt service for financings and any contingencies, will be financed by internally generated funds, short-term commercial paper issuances, offerings of our debt securities or from borrowings under our $2.25 billion unsecured revolving credit facility, we cannot guarantee that this will be the case. Additional acquisitions, increases in interest rates or unforeseen events could require financing from additional sources.

Changes in the availability and cost of electricity and natural gas are subject to volatile market conditions which may negatively affect our business, results of operations, financial condition and cash flows.

Our steel mills are large consumers of electricity and natural gas. In addition, our DRI facilities are also large consumers of natural gas. We rely upon third parties for our supply of energy resources consumed in the manufacture of our products. The prices for and availability of electricity and natural gas can be volatile. They are often affected by weather, political, regulatory and economic factors beyond our control, and we may be unable to raise the price of our products to offset increased energy costs. Disruptions, including physical or information systems related issues, that impact the supply of our energy resources could temporarily impair our ability to manufacture our products for our customers. Increases in our energy costs that are not similarly applicable to our competitors' operations could materially adversely affect our business, results of operations, financial condition and cash flows.

Our business and results of operations may be negatively affected by volatility in steel prices and the cost and availability of raw materials, particularly scrap steel.

We rely to an extent on outside vendors to supply us with key consumables such as graphite electrodes, alloys and other raw materials, including both scrap and scrap substitutes (e.g., prime scrap, pig iron and DRI) that are critical to the manufacture of our steel products. The raw material required to produce DRI is pelletized iron ore. Although we have vertically integrated our business by constructing our DRI facilities in Trinidad and Louisiana and also by acquiring our scrap processing and brokerage operations, DJJ, in 2008, we still must purchase most of our primary raw material, steel scrap, from numerous other sources located throughout the United States and internationally. Although we believe that the supply of scrap and scrap substitutes will remain adequate to operate our facilities, prices of these critical raw materials are volatile and are influenced by changes in scrap exports in response to changes in the scrap, scrap substitutes and iron ore demands of our global competitors, as well as volatility in currency rates and political conditions.

At any given time, we may be unable to obtain an adequate supply of these critical raw materials with price and other terms acceptable to us. The availability and prices of raw materials may also be negatively affected by new laws and regulations, allocation by suppliers, interruptions in production, accidents or natural disasters, war and other forms of armed conflict or political instability, changes in exchange rates, worldwide price fluctuations, including due to global political and economic factors, changes in governmental, business and consumer spending, inflation, increases in interest rates, labor shortages, and the availability and cost of transportation. Many countries that export steel into our markets restrict the export of scrap, protecting the supply chain of some foreign competitors. This trade practice creates an artificial competitive advantage for foreign producers that could limit our ability to compete in the U.S. market.

If our suppliers increase the prices of our critical raw materials, we may not have alternative sources of supply. In addition, to the extent that we have quoted prices to our customers and accepted customer

orders for our products prior to purchasing necessary raw materials, we may be unable to raise the price of our products to cover all or part of the increased cost of the raw materials or pass along increased transportation costs. Also, if we are unable to obtain adequate, cost-effective and timely deliveries of our required raw materials, we may be unable to timely manufacture sufficient quantities of our products. This could cause us to lose sales, incur additional costs, experience margin compressions or suffer harm to our reputation and customer relationships, any of which may negatively affect our business, results of operations, financial condition and cash flows.

Our steelmaking processes, our DRI processes, and the manufacturing processes of many of our suppliers, customers and competitors are energy intensive and generate carbon dioxide and other GHGs. The regulation of these GHGs may negatively affect our business, results of operations, financial condition and cash flows.

Our operations are subject to numerous federal, state and local laws and regulations relating to the protection of the environment, and, accordingly, we make provision in our financial statements for the estimated costs of compliance. There are inherent uncertainties in these estimates. Most notably, the uncertainty of policies, enforcement priorities, legislation and international regulations related to climate change mitigation strategies pose the greatest risk.

As a carbon steel producer, Nucor could be increasingly affected both directly and indirectly by new or changing carbon policy decisions and mandates. Carbon is an essential raw material in Nucor's steel production processes. Furthermore, Nucor steel mills use significant amounts of electricity as 100% of our mills utilize EAF technology for our steel melting operations and the decarbonization of electricity generation may lead to high power costs and uncertainty in reliability. Significant changes to the regional power grids serving our steel mills and/or new rulemaking or legislation affecting the operation of these power grids may negatively affect our business, results of operations, financial condition and cash flows.

Environmental regulation compliance and remediation could result in substantially increased costs and materially adversely impact our competitive position.

We incur significant costs to achieve and maintain compliance with environmental regulations and remediation obligations. The principal federal environmental laws include the CAA, which regulates air emissions; the CWA which regulates water withdrawals and discharges; the RCRA, which addresses solid and hazardous waste treatment, storage and disposal; and the CERCLA, which governs releases of hazardous substances, and remediation of contaminated sites. Our operations are also subject to state and local environmental laws and regulations.

In addition to the above-mentioned statutes, revisions to National Ambient Air Quality Standards ("NAAQS"), including the implementation actions/decisions of environmental agencies, could make it significantly more difficult to obtain construction permits and permits to expand existing operations. Resulting cancellations, delays or unanticipated costs to these projects could negatively impact our ability to generate expected returns on our investments. Emission reductions for existing operations due to a NAAQS revision may also be required. These regulations can also increase our cost of energy, primarily electricity, which we use extensively in the steelmaking process. We may in the future incur substantially increased costs complying with such regulations, particularly if federal regulatory agencies were to change their enforcement posture with respect to such regulations.

Emerging customer preferences for greater product transparency and less GHG intensive materials may put us at a competitive disadvantage as a carbon steel producer.

The federal government and numerous states are considering establishing, or have already established, requirements for Environmental Product Declarations ("EPDs") so that consumers may more readily evaluate the environmental impacts of products. California has enacted the "Buy Clean California Act" and California has also established Global Warming Potential benchmarks through EPDs for certain materials, including certain steel products. EPD legislation has caused Nucor to incur additional costs and

has the potential to put Nucor and its customers at a disadvantage to foreign competitors unless standardized mechanisms are used to fully evaluate and track products produced by foreign producers.

General Risk Factors

We are subject to information technology and cybersecurity threats which could have an adverse effect on our business and results of operations.

We utilize various information technology systems to efficiently address business functions ranging from the operation of our production equipment to administrative computation to the storage of data such as intellectual property and proprietary business information. We also utilize third-party service providers for certain information technology services that are important to our operations. We continuously evaluate our cybersecurity systems and practices, assess potential threats, and improve our information technology networks, policies and procedures to address potential vulnerabilities. Despite efforts to assure secure and uninterrupted operations, threats from increasingly sophisticated cyberattacks or system failures could result in materially adverse operational disruptions or security breaches of our systems or those of our third-party service providers. These risks could result in disclosure or destruction of key proprietary information or personal data or reputational damage, theft of assets or trade secrets, or could adversely affect our ability to physically produce or transport steel, resulting in lost revenues, as well as delays in reporting our financial results. We also could be required to spend significant financial and other resources to remedy the damage caused by a cybersecurity breach, including to repair or replace networks and information technology systems. We may also contend with potential liability for stolen information, increased cybersecurity protection costs, litigation expense and increased insurance premiums.

Our operations are subject to business interruptions and casualty losses.

The steelmaking business is subject to numerous inherent risks, particularly unplanned events such as explosions, fires, other accidents, natural disasters such as floods, hurricanes or earthquakes, critical equipment failures, acts of terrorism, inclement weather and transportation interruptions. Nucor maintains property insurance for these types of losses but self-insures a significant portion of the program. Therefore, while our insurance coverage could offset a portion of the losses relating to some of those types of events, our results of operations and cash flows could be adversely impacted to the extent that any such losses are not covered by our insurance, or that there are significant delays in resolving our claims with our insurance providers.

We acquire businesses and enter into joint ventures from time to time and we may encounter difficulties in integrating businesses we acquire.

We plan to continue to seek attractive opportunities to acquire businesses, enter into joint ventures and make other investments that strengthen Nucor. Realizing the anticipated benefits of acquisitions or other transactions will depend on our ability to operate these businesses and integrate them with our operations, effectively identify and manage risks, and cooperate with our strategic partners. Our business, results of operations, financial condition and cash flows could be materially adversely affected if we are unable to successfully integrate these businesses or otherwise fail to realize the anticipated benefits of acquisitions or other transactions.

Risks associated with operating in international markets may negatively affect our business, results of operations, financial condition and cash flows.

Certain of our businesses and investments are located outside of the United States, in Canada, Mexico and in emerging markets. There are a number of risks inherent in doing business in or sourcing raw materials from such markets. These risks include, but are not limited to: unfavorable political or economic factors; local labor and social issues; changes in regulatory requirements; fluctuations in foreign currency exchange rates, interest rates and inflation; and complex foreign laws, treaties including tax laws, and the Foreign Corrupt Practices Act of 1977. These risks could restrict our ability to operate

our international businesses profitably and therefore have a negative impact on our results of operations and financial condition. In addition, our reported results of operations and financial position could also be negatively affected by exchange rates when the activities and balances of our foreign operations are translated into U.S. dollars for financial reporting purposes.

Pandemics, epidemics and other public health emergencies in the future, could have a material adverse effect on our business, results of operations, financial condition and cash flows.

Our operations expose us to risks associated with pandemics, epidemics and other public health emergencies. A pandemic or any similar event may have negative impacts on our operations, supply chain, transportation networks and customers, which may compress our margins or impact demand for our steel products, including as a result of preventative and precautionary measures that we, other businesses and governments have taken or may take in the future.

In addition, the ability of our teammates and our suppliers' and customers' teammates to work may be significantly impacted by these types of public health emergencies. Our customers may be directly impacted by business interruptions or weak market conditions and may not be willing or able to fulfill their contractual obligations. Furthermore, the progression of and global response to these types of public health emergencies can cause and increase the risk of delays in construction activities and equipment deliveries related to our capital projects, including potential delays in obtaining permits from government agencies, as well as changes in the prices and availability of labor and equipment for capital projects.

The accounting treatment of equity method investments, goodwill and other long-lived assets could result in future asset impairments, which would reduce our earnings.

We periodically test our equity method investments, goodwill and other long-lived assets to determine whether their estimated fair value is less than their value recorded on our balance sheet. The results of this testing for potential impairment may be adversely affected by uncertain market conditions for the global steel industry, as well as changes in interest rates, commodity prices and general economic conditions. If we determine that the fair value of any of these assets is less than the value recorded on our balance sheet, and, in the case of equity method investments the decline is other than temporary, we would likely incur a non-cash impairment loss that would negatively impact our results of operations.

Tax increases and changes in tax laws and regulations or exposure to additional tax liabilities may negatively affect our business, results of operations, financial conditions and cash flows.

The steel industry and our business are sensitive to changes in taxes. As a company based in the United States, Nucor is more exposed to the effects of changes in U.S. tax laws than some of our major competitors. Our provision for income taxes and cash tax liability in the future could be adversely affected by changes in U.S. tax laws.

Nucor recognizes the effect of income tax positions only if those positions are believed to be more likely than not of being sustained. We cannot predict whether taxing authorities will conduct an audit challenging any of our tax positions and there can be no assurance as to the outcome of any challenges. If we are unsuccessful in any of these matters, we may be required to pay taxes for prior periods, interest, fines or penalties.

We are subject to legal proceedings and legal compliance risks.

We spend substantial resources ensuring that we comply with domestic and foreign regulations, contractual obligations and other legal standards. Notwithstanding this, we are subject to a variety of legal proceedings and legal compliance risks in respect of various issues, including regulatory, safety, environmental, employment, transportation, intellectual property, contractual, import/export, international trade and governmental matters that arise in the course of our business and in our industry. For information regarding our current significant legal proceedings, see "Item 3. Legal Proceedings." A negative outcome in an unusual or significant legal proceeding or compliance investigation could adversely affect our results of operations and financial condition. While we believe that we have adopted appropriate risk management and compliance programs, the nature of our operations means that legal compliance risks will continue to exist and additional legal proceedings and other contingencies, the outcome of which cannot be predicted with certainty, will arise from time to time.

Item 1B. Unresolved Staff Comments.

None.

Item 1C. Cybersecurity.

Nucor recognizes the importance of developing, implementing, and maintaining effective cybersecurity measures designed to protect our information systems and the confidentiality, integrity, and availability of our data. We face a number of information technology and cybersecurity threats which could have an adverse effect on our business and results of operations.

Notwithstanding the Company's cybersecurity framework and preventative strategies, we may not be successful in preventing or mitigating a cybersecurity incident that could have a material adverse effect on us. See "Item 1A. Risk Factors" for a discussion of cybersecurity risks.

Risk Management and Strategy

Overview

We have developed and implemented a cybersecurity risk management program that is intended to enable us to assess, identify, and manage risk associated with cybersecurity threats. Our program is based on the Cybersecurity Framework promulgated by the National Institute of Standards and Technology and other applicable industry standards, and includes the following key elements:

- identification and assessment of cybersecurity threats based on internal and external assessments and monitoring, information from internal stakeholders, and external publications and resources such as those made available by the United States Cybersecurity and Infrastructure Security Agency;
- technical and organizational safeguards designed to protect against identified threats, including documented policies and procedures, technical controls, and employee education and awareness;
- processes to detect the occurrence of cybersecurity events, and maintenance and regular testing of incident response and recovery and business continuity plans and processes; and
- a third-party risk management process to manage cybersecurity risks associated with our service providers, suppliers, and vendors.

The program is designed to foster a culture of cybersecurity risk management across the Company.

Integrated Overall Risk Management

Assessing, identifying, and managing cybersecurity-related risks is integrated into our overall risk management framework. The Company conducts an annual cybersecurity risk assessment and reports the most significant risks and associated planned mitigation strategies to the Audit Committee of the Board of Directors. The annual risk assessment is carried out under the supervision of the Executive Vice President of Business Services, the President of Corporate Legal Affairs and General Counsel, the President of Nucor Business Technology, the Cybersecurity Director, and the Vice President and Corporate Controller. See “Governance” below. The Board also regularly receives focused presentations regarding cybersecurity risks from the Company’s Cybersecurity Director.

Third-Party Engagement

Due to the complexity and ever-changing nature of cybersecurity threats, Nucor engages a range of external experts to assist in its assessment, identification, and management of risks from cybersecurity threats. These include cybersecurity assessors, forensic and incident response experts, and auditors to review the Company’s cybersecurity posture and responsive efforts. Our relationships with these external partners enable us to leverage their expertise with the goal of maintaining best practices.

Oversight of Third-Party Risks

Our third-party service providers, suppliers, and vendors face their own risks from cybersecurity threats that could impact Nucor in certain circumstances. In response, we have implemented processes for overseeing and managing these risks. Those processes include limiting the exposure of our information systems to external systems to the least practicable amount, assessing the third parties’ information security practices before allowing them to access our information systems or data, requiring the third parties to implement appropriate cybersecurity controls in our agreements with them, and conducting ongoing monitoring of their compliance with those requirements. We also utilize third-party risk and compliance monitoring services to monitor our service providers, suppliers, and vendors and to augment the effectiveness of our risk mitigation efforts in this area.

Risks from Cybersecurity Threats

As of the date of this report, no risks from cybersecurity threats, including as a result of cybersecurity incidents we have experienced in the past, have materially affected or are reasonably likely to materially affect the Company, including its business strategy, results of operations, or financial condition.

Governance

The Company seeks to ensure effective governance in managing risks associated with cybersecurity threats, as more thoroughly described below.

Board of Directors Oversight

The Audit Committee of the Board of Directors is responsible for the oversight of risks from cybersecurity threats. The Audit Committee is composed of directors with a wide range of experience, including risk management and controls, and technology. See “Integrated Overall Risk Management” above.

Management’s Role in Cybersecurity Risk Management

A division of the Company known as Nucor Business Technology, or NBT, is responsible for the Company’s information technology needs, including cybersecurity risk assessment and management. NBT’s cybersecurity function is led by the Cybersecurity Director, who reports to the President of NBT, who in turn reports to the Executive Vice President of Strategy, the President and Chief Operating Officer

and the Chair and Chief Executive Officer. The current Cybersecurity Director has more than 20 years of experience in the cybersecurity field and has broad expertise in cybersecurity threat assessments and detection, mitigation technologies, cybersecurity training, and incident response.

The Company also has a Risk Committee composed of the following members of the Company's management:

- Executive Vice President of Business Services
- President of Corporate Legal Affairs and General Counsel
- President of Nucor Business Technology
- Cybersecurity Director
- Vice President and Corporate Controller
- General Manager of Internal Audit
- General Manager of Legal Compliance and Assistant Corporate Secretary
- Manager of External Reporting

The Risk Committee is responsible for overseeing the Company's response to cybersecurity incidents. The Risk Committee and the Chair and Chief Executive Officer inform the Audit Committee and the Board of Directors on cybersecurity risks.

Monitoring of Cybersecurity Incidents

The Cybersecurity Director implements and oversees our processes for regularly monitoring our information systems. This includes security measures and regular audits to identify potential issues. In the event of a cybersecurity incident, we have an established incident response plan that requires prompt notification of the Cybersecurity Director or their designee, who in turn oversees our assessment of and response to the incident. The Cybersecurity Director is also responsible for informing the Risk Committee of cybersecurity incidents, which in turn has a detailed process for assessing the impacts of incidents and monitoring the Company's mitigation and remediation efforts. Depending on the nature of the incident, this process also provides for escalating notification to senior executives, including the Chair and Chief Executive Officer, the Executive Vice President of Business Services and the Board of Directors.

Item 2. Properties.

We own most of our principal operating facilities. These facilities, by segment, are as follows:

Location	Approximate square footage of facilities	Principal products
Steel mills:		
Fontana, California	4,020,000	Flat-rolled steel
Hickman, Arkansas	2,740,000	Flat-rolled steel
Berkeley County, South Carolina	2,430,000	Flat-rolled steel, structural steel
Crawfordsville, Indiana	2,270,000	Flat-rolled steel
Blytheville, Arkansas	2,220,000	Structural steel
Decatur, Alabama	2,010,000	Flat-rolled steel
Norfolk, Nebraska	1,540,000	Steel shapes
Hertford County, North Carolina	1,350,000	Steel plate
Plymouth, Utah	1,310,000	Steel shapes
Ghent, Kentucky	1,260,000	Flat-rolled steel
Jewett, Texas	1,180,000	Steel shapes
Darlington, South Carolina	1,020,000	Steel shapes
Kankakee, Illinois	850,000	Steel shapes
Silao, Guanajuato, Mexico	680,000	Flat-rolled steel
Seattle, Washington	660,000	Steel shapes
Tuscaloosa, Alabama	610,000	Steel plate
Memphis, Tennessee	560,000	Steel shapes
Auburn, New York	520,000	Steel shapes
Jackson, Mississippi	490,000	Steel shapes
Brandenburg, Kentucky	490,000	Steel plate
Sedalia, Missouri	490,000	Steel shapes
Frostproof, Florida	480,000	Steel shapes
Birmingham, Alabama	460,000	Steel shapes
Marion, Ohio	430,000	Steel shapes
Kingman, Arizona	380,000	Steel shapes
Lexington, North Carolina	320,000	Steel shapes
Steel products:		
Norfolk, Nebraska	1,160,000	Joist, deck, cold finish bar
Brigham City, Utah	1,130,000	Joists, cold finish bar, building systems, metal panels
Arthur, Illinois	1,070,000	Overhead doors
St. Joe, Indiana	1,050,000	Joist, deck, fastener
Grapeland, Texas	830,000	Joists, deck
Chemung, New York	560,000	Joists, deck
Marseilles, Illinois	550,000	Steel tube
Florence, South Carolina	550,000	Joists, deck
Swansea, South Carolina	510,000	Building systems
Birmingham, Alabama	480,000	Steel tube
Louisville, Kentucky	480,000	Steel tube
Fort Payne, Alabama	470,000	Joists, deck
Decatur, Alabama	470,000	Steel tube
Ghent, Kentucky	400,000	Steel tube
Trinity, Alabama	380,000	Steel tube
Decatur, Alabama	380,000	Towers and structures
Chicago, Illinois	350,000	Steel tube
Waterloo, Indiana	350,000	Building systems

In the steel products segment, we have 91 operating facilities, excluding the locations listed above, in 39 states with 28 operating facilities in Canada and two in Mexico. Nucor Rebar Fabrication also operates multiple sales offices in Canada and certain other foreign locations. The steel products segment also includes Skyline Steel, LLC, our steel foundation distributor. NRG has leased square footage of approximately 630,000 square feet in Los Angeles, California, leased square footage of approximately 370,000 square feet in Houston, Texas, and leased square footage of approximately 706,000 square feet in San Bernardino, California.

In the raw materials segment, we have 84 operating facilities in 19 states with one operating facility in Point Lisas, Trinidad. For our DRI facilities in Trinidad and Louisiana, a significant portion of the production process occurs outdoors. The Trinidad site, including leased land, is approximately 2 million square feet. The Louisiana site has approximately 174 million square feet of owned land with buildings that total approximately 72,500 square feet. DJJ has 72 operating facilities in 18 states along with multiple brokerage offices in the United States and certain other foreign locations.

The average utilization rates of all operating facilities in the steel mills, steel products and raw materials segments in 2025 were approximately 83%, 62% and 70% of production capacity, respectively.

We also own our principal executive offices in Charlotte, North Carolina.

Item 3. Legal Proceedings.

Nucor is from time to time a party to various lawsuits, claims and other legal proceedings that arise in the ordinary course of business. With respect to all such lawsuits, claims and proceedings, we record reserves when it is probable a liability has been incurred and the amount of loss can be reasonably estimated. We do not believe that any of these proceedings, individually or in the aggregate, would be expected to have a material adverse effect on our results of operations, financial condition or cash flows. Nucor maintains liability insurance with self-insurance limits for certain risks.

During 2022, Nucor Steel Louisiana, our DRI facility located in St. James Parish, Louisiana, received allegations of violations of the Clean Air Act from the EPA. A combined settlement is currently being negotiated with the U.S. Department of Justice, the EPA and the Louisiana Department of Environmental Quality. We do not believe that any aggregate settlement for these allegations will be material to Nucor.

There were no other proceedings that were pending or contemplated under federal, state or local environmental laws that the Company reasonably believes may result in monetary sanctions of at least $1.0 million (the threshold chosen by Nucor as permitted by Item 103 of Regulation S-K promulgated under the Securities Exchange Act of 1934, as amended, (the "Exchange Act"), and which Nucor believes is reasonably designed to result in disclosure of any such proceeding that is material to its business or financial condition).

Item 4. Mine Safety Disclosures

Not applicable.

Information About Our Executive Officers

The following is a description of the names and ages of the executive officers of the Company, indicating all positions and offices with the Company held by each such person and each person’s principal occupation or employment during at least the past five years. Each executive officer of Nucor is elected by the Board of Directors and holds office from the date of election until removed by the Board.

Thomas J. Batterbee (56), Executive Vice President of Human Resources and Talent, became EVP in May 2025. Mr. Batterbee began his career with Nucor in 1989 at Nucor Building Systems Indiana. He was promoted to General Manager of Nucor Building Systems Texas in 2007 and later served as General Manager of Vulcraft New York, Nucor Buildings Group Utah, and Nucor Steel South Carolina. Mr. Batterbee was promoted to Vice President in 2017 and President of the Vulcraft/Verco group in 2023.

Allen C. Behr (52), Executive Vice President of Raw Materials, was named EVP in May 2020. Mr. Behr began his career with Nucor in 1996 as Design Engineer at Nucor Building Systems-Indiana and joined the start-up team at Nucor Building Systems-Texas in 1999. In 2001, he became the Engineering Manager at Nucor Building Systems-South Carolina and was promoted to General Manager in 2008. Mr. Behr became the General Manager of Vulcraft-South Carolina in 2011 and was promoted to Vice President in 2012. He was promoted to President of the Vulcraft/Verco group in 2014 and he served as General Manager of Nucor Steel-Texas from 2017 to 2019.

Brad Ford (47), Executive Vice President of Plate and Structural Products, became EVP in May 2023. Mr. Ford began his career at The David J. Joseph Company (DJJ) in 2001 as a Brokerage Representative and subsequently served as District Manager and International Trading Manager. In 2013, Mr. Ford became Commercial Vice President at DJJ's subsidiary, Trademark Metals Recycling LLC (TMR), and then served as President of TMR from 2015 to 2020. Mr. Ford became General Manager of Vulcraft-Indiana in 2020. He was promoted to Vice President of Nucor in 2022 and most recently served as Vice President and General Manager of Nucor Steel Decatur, LLC.

Noah C. Hanners (46), Executive Vice President of Sheet Products, became EVP in January 2023. Mr. Hanners began his career with Nucor in 2011 as Melt Shop Engineer at Nucor Steel South Carolina. He next served as Shift Supervisor and was then promoted to Melt Shop Manager at Nucor Steel Auburn, Inc. Mr. Hanners later served as General Manager of Nucor Tubular Products and General Manager of Nucor Steel Kankakee, Inc. and was promoted to Vice President in 2019. He served as the Vice President and General Manager of The David J. Joseph Company from 2019 to 2022.

John J. Hollatz (50), Executive Vice President of Fabricated Construction Products, was named EVP in May 2022. Mr. Hollatz began his career at Nucor in 1999 as Design Engineer at Vulcraft Indiana and then served as Sales Engineer and Sales Manager at Vulcraft Nebraska. Mr. Hollatz later served as General Manager of Nucor Building Systems South Carolina, General Manager of Vulcraft Indiana, and President of the Vulcraft/Verco group. He was promoted to Vice President and General Manager of Nucor Steel Decatur, LLC in 2016.

Stephen D. Laxton (55), became President and Chief Operating Officer in January 2026. Mr. Laxton became Chief Financial Officer and Executive Vice President in March 2022, and will continue his duties as Chief Financial Officer until March 1, 2026. Mr. Laxton began his career at Nucor in 2003 as General Manager of Business Development and was promoted to Vice President in 2014. Prior to joining Nucor, Mr. Laxton worked for Cinergy Corp., holding various positions including Director of Asset Management and Manager of Corporate Development. Prior to Cinergy, he held various financial roles with Ashland, Inc., North American Stainless and National City Bank.

Daniel R. Needham (60), Executive Vice President of Commercial, was named EVP in May 2022. Mr. Needham began his career with Nucor in 2000 as Controller at Nucor Steel Hertford County. He subsequently served as Controller of Nucor Steel Decatur, LLC and Nucor Steel Utah. In 2011, Mr. Needham became General Manager of Nucor Steel Connecticut, Inc. (now Nucor Wire Products Connecticut, Inc.). He later served as General Manager of Nucor Steel Utah and was elected Vice President in 2016. In 2019, Mr. Needham was promoted to Vice President and General Manager of Nucor Steel Indiana. He served as the Executive Vice President of Bar, Engineered Bar and Rebar Fabrication Products from February 2021 to May 2022.

Benjamin M. Pickett (43)*,* Executive Vice President of Business Services, became EVP in March 2025. Mr. Pickett began his career with Nucor in 2018 as Director of Corporate Legal Affairs. In 2020, he was promoted to General Manager and Counsel of Public Affairs and Government Relations and elected to Vice President in 2023. Prior to joining Nucor, he was a Partner with the law firm of Moore & Van Allen, PLLC.

K. Rex Query (60)*,* Executive Vice President of Strategy, was named EVP in January 2021. Mr. Query joined Nucor in 1990 as a financial analyst in the Corporate Office and subsequently served as Controller at Vulcraft South Carolina, Nucor Steel Berkeley and Nucor Steel Hertford. After serving as General Manager and Corporate Controller, Mr. Query was elected to Vice President in 2002 and served as General Manager at Nucor Steel Auburn, Inc., Nucor Steel Decatur, LLC, Nucor Steel South Carolina and NCF as well as President of Nucor Europe. Most recently, Mr. Query served as President of Nucor's Vulcraft/Verco group. Mr. Query is married to the sister of Mr. Topalian's wife.

Randy J. Spicer (48), Executive Vice President of Bar and Engineered Bar, was named EVP in May 2024. Mr. Spicer began his Nucor career in 2004 as Accounting Supervisor at Nucor Steel Indiana. In 2006, he joined the start-up team at Nucor Steel Memphis, Inc. as Controller and subsequently served as Controller and Hot Mill Manager at Nucor Steel Gallatin LLC. He was promoted to General Manager of Nucor Tubular Products North in 2020 and elected to President of Nucor Tubular Products in 2022.

David A. Sumoski (59), Executive Vice President. In December 2025, Mr. Sumoski notified the Board of Directors that he will be retiring from the Company in June 2026. Mr. Sumoski stepped down from his position as Chief Operating Officer in January 2026 and will continue as EVP until his retirement. Mr. Sumoski had served as the Company's COO since January 2021. Prior to that, Mr. Sumoski served as Executive Vice President from 2014 to 2020. He also served as General Manager of Nucor Steel Memphis, Inc. from 2012 to 2014 and as General Manager of Nucor Steel Marion, Inc. from 2008 to 2012. Mr. Sumoski was named Vice President in 2010. He began his career with Nucor as an electrical supervisor at Nucor Steel-Berkeley in 1995, later serving as Maintenance Manager.

Leon J. Topalian (57), has served as Chief Executive Officer since January 2020 and as Chair of the Board of Directors since September 2022. He previously served as President from September 2019 to December 2025, as Chief Operating Officer from September 2019 to December 2019, as Executive Vice President of Beam and Plate Products from 2017 to 2019 and as Vice President of Nucor from 2013 to 2017. He began his Nucor career at Nucor Steel-Berkeley in 1996, serving as a project engineer and then as cold mill production supervisor. Mr. Topalian was promoted to Operations Manager for Nucor's former joint venture in Australia and later served as Melting and Casting Manager at Nucor Steel-South Carolina. He then served as General Manager of Nucor Steel Kankakee, Inc. from 2011 to 2014 and as General Manager of Nucor-Yamato from 2014 to 2017. Mr. Topalian is married to the sister of Mr. Query's wife.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Our common stock is listed and traded on the New York Stock Exchange under the symbol "NUE." As of January 31, 2026, there were approximately 10,000 stockholders of record of our common stock.

Our share repurchase program activity for each of the three months and the quarter ended December 31, 2025 was as follows (in millions, except per share amounts):

	Total Number of Shares Purchased	Average Price Paid per Share (1)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (2)	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (2)
October 5, 2025—November 1, 2025	0.3	$ 136.67	0.3	$ 463
November 2, 2025—November 29, 2025	0.2	$ 143.60	0.2	$ 430
November 30, 2025—December 31, 2025	0.2	$ 162.31	0.2	$ 406
For the Quarter Ended December 31, 2025	0.7		0.7	

(1) Includes commissions of $0.11 per share.

(2) On May 11, 2023, the Company announced that its Board of Directors had approved a share repurchase program under which the Company was authorized to repurchase up to $4.00 billion of the Company's common stock and terminated all previously authorized share repurchase programs. The share repurchase authorization was discretionary and had no expiration date. On February 20, 2026, the Company announced that its Board of Directors terminated this share repurchase program and approved a new share repurchase program under which it is authorized to repurchase up to $4.00 billion of Company's common stock. The new share repurchase authorization is discretionary and has no expiration date.

Nucor has increased its base cash dividend every year since the Company began paying dividends in 1973. Nucor paid a total dividend of $2.20 per share in 2025 compared with $2.16 per share in 2024. In December 2025, the Board of Directors increased the base quarterly cash dividend on Nucor's common stock to $0.56 per share from $0.55 per share. In February 2026, the Board of Directors declared Nucor's 212th consecutive quarterly cash dividend of $0.56 per share payable on May 11, 2026 to stockholders of record on March 31, 2026.

See Note 16 to the Company's consolidated financial statements for a discussion regarding securities authorized for issuance under the Company's stock-based compensation plans.

The stock performance graph required by Item 201(e) of Regulation S-K is incorporated into this report by reference from the Company's annual report to stockholders for the year ended December 31, 2025, which will be posted to the Company's website and furnished to the SEC subsequent to the date of this report. The stock performance graph shall not be deemed to be "filed" for purposes of Section 18 of the Exchange Act, nor shall it be deemed to be "soliciting material" subject to Regulation 14A or incorporated by reference in any filing under the Securities Act of 1933 or the Exchange Act, except as shall be expressly set forth by specific reference in such filing.

Item 6. [Reserved].

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following Management's Discussion and Analysis of Financial Condition and Results of Operations of Nucor Corporation should be read in conjunction with the consolidated financial statements of the Company and the accompanying notes to the consolidated financial statements.

Management's Discussion and Analysis of Financial Condition and Results of Operations included in this report discusses our financial condition and results of operations as of and for the years ended December 31, 2025 and 2024. Information concerning the year ended December 31, 2024 and a comparison of the years ended December 31, 2024 and 2023 may be found under "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Company's Annual Report on Form 10-K for the year ended December 31, 2024, filed with the SEC on February 27, 2025.

Overview

Nucor's operating performance in 2025 reflected modest domestic steel demand growth and lower import levels. Operating rates at our steel mills for the full year 2025 increased to 83% as compared to 76% for the full year 2024, with higher shipments across our sheet, bar, plate, and structural mills. Demand was strong in several key end markets, including infrastructure, data centers, energy, and advanced manufacturing, while interest rate sensitive markets such as automotive and residential construction experienced softer conditions.

Our Challenges and Risks

Global steel production overcapacity continues to be an ongoing risk to Nucor and the entire steel industry. The OECD has estimated that global steel production overcapacity in 2025 is approximately 704 million net tons. This level of excess capacity is eight times the current annual steel production in the United States. However, additional capacity continues to come online and China's steel production, the largest steel producing country, is still near record levels. In 2025, China's steel production was more than 1 billion net tons for the eighth consecutive year, and China exported a record 131 million net tons to offset weak domestic consumption. Circumvention of trade duties also continues to pose a risk, as countries route products through third-party countries to evade duties. Increasingly, China is seeking to evade trade duties by building new steelmaking capacity in other countries with a focus on neighboring countries in southeast Asia, as well as Africa.

An uncertainty we continue to face in our business is the price of our principal raw material, ferrous scrap, which is volatile and often increases or decreases rapidly in response to changes in domestic demand, unanticipated events that affect the flow of scrap into scrap yards, the availability of scrap substitutes, currency fluctuations and changes in foreign demand for scrap. In periods of rapidly increasing raw material prices in the industry, which are often also associated with periods of stronger or rapidly improving steel market conditions, being able to increase our prices for the products we sell quickly enough to offset increases in the prices we pay for ferrous scrap is challenging but critical to maintaining our profitability. We attempt to mitigate the scrap price risk by managing scrap inventory levels at the steel mills to match the anticipated demand over the next several weeks. Certain scrap substitutes, including pig iron, have longer lead times for delivery than scrap, which can make this inventory management strategy difficult to achieve. Continued successful implementation of our raw material strategy, including key investments in DRI production, coupled with the scrap brokerage and processing services performed by our team at DJJ, give us greater control over our metallic inputs and thus also helps us to mitigate this risk. See "Item 1A. Risk Factors-Industry Specific Risk Factors" for further discussion of raw material risks.

During periods of stronger or rapidly improving steel market conditions, we are more likely to be able to pass through to our customers, relatively quickly, the increased costs of ferrous scrap and scrap substitutes, protecting our gross margins from significant erosion. During periods of weaker or rapidly deteriorating steel market conditions, weak steel demand, low industry utilization rates and the impact of

imports create an even more intensified competitive environment and increased pricing pressure. All of those factors, to some degree, impact pricing, which increases the likelihood that Nucor will experience lower gross margins.

Although the majority of our steel sales are to spot market customers in North America who place their orders each month based on their business needs and our pricing competitiveness compared to both domestic and global producers and trading companies, we also sell contract tons, most notably in our sheet operations. Approximately 85% of our sheet sales were to contract customers in 2025, with the balance being sold in the spot market at the prevailing prices at the time of sale. Steel contract sales outside of our sheet operations are not significant. The amount of tons sold to contract customers at any given time depends on the overall market conditions at the time, how the end-use customers see the market moving forward and the strategy that Nucor management believes is appropriate to the upcoming period.

Nucor management considerations include maintaining an appropriate balance of spot and contract tons based on market projections and appropriately supporting our diversified customer base. The percentage of tons that is placed under contract also depends on the overall market dynamics and customer negotiations. In years of strengthening demand, we typically see an increase in the percentage of sheet sales sold under contract as our customers have an expectation that transaction prices will rapidly rise, and available capacity will quickly be sold out. To mitigate this risk, customers prefer to enter into contracts in order to obtain committed volumes of supply from the mills. The vast majority of our contracts include a method of adjusting prices on a periodic basis to reflect changes in the market pricing for steel and/or scrap. Market indices for steel generally trend with scrap pricing changes, but, during periods of steel market weakness, the more intensified competitive steel market environment can cause the sales price indices to decrease resulting in reduced gross margins and profitability. Furthermore, since the selling price adjustments are not immediate, there will always be a timing difference between changes in the prices we pay for raw materials and the adjustments we make to our contract selling prices. Contract sales typically have terms ranging from six to 12 months.

Our Strengths and Opportunities

We are North America's most diversified steel producer. As a result, our short-term performance is not tied to any one market. We have numerous, large, strategic capital projects at various stages of progress that we believe will help us further diversify our product offerings and expand the markets that we serve. We expect these investments to grow our long-term earnings power by increasing our channels to market, expanding our product portfolio into higher value-added offerings, improving our cost structure and further building upon our market leadership positions.

We believe that Nucor's raw material supply chain is another important strength. Our investment in DRI production facilities and scrap brokerage and processing businesses provides Nucor with significant flexibility in optimizing our raw materials costs. Additionally, having a portion of our raw materials supply under our control reduces risk associated with the global sourcing of raw materials.

Our highly variable, low-cost structure, combined with our financial strength and liquidity, have allowed us to successfully navigate cyclical steel industry market conditions in the past. In such times, our incentive-based pay system reduces our payroll costs, both hourly and salary, which helps to offset lower selling prices. Our pay-for-performance system that is closely tied to our levels of production also allows us to keep our highly experienced workforce intact and to continue operating our facilities when some of our competitors with greater fixed costs are compelled to shut down some of their facilities. Because we use EAFs to produce our steel, we can easily vary our production levels to match short-term changes in demand.

Evaluating Our Operating Performance

We report our results of operations in three segments: steel mills, steel products and raw materials. Most of the steel we produce in our mills is sold to outside customers (80% in both 2025 and 2024), but a

significant percentage is used internally by many of the facilities in our steel products segment (20% in both 2025 and 2024).

We begin measuring our performance by comparing our net sales, both in total and by individual segment, during a reporting period with our net sales in the corresponding period in the prior year. In doing so, we focus on changes in and the reasons for such changes in the two key variables that have the greatest influence on our net sales: average sales price per ton during the period and total tons shipped to outside customers.

We also focus on both dollar and percentage changes in gross margins, which are key drivers of our profitability, and the reasons for such changes. There are many factors from period to period that can affect our gross margins. One consistent area of focus for us is changes in “metal margins,” which is the difference between the selling price of steel and the cost of scrap and scrap substitutes. Increases or decreases in the cost of scrap and scrap substitutes that are not offset by changes in the selling price of steel can quickly compress or expand our margins and reduce or increase our profitability.

Changes in marketing, administrative and other expenses, particularly profit sharing and other variable incentive-based payment costs, can have a material effect on our results of operations for a reporting period as well. These costs vary significantly from period to period as they are based upon changes in our pre-tax earnings and other profitability metrics that are a reflection of our pay-for-performance system that is closely tied to our levels of production.

Evaluating Our Financial Condition

We evaluate our financial condition each reporting period by focusing primarily on the amounts of and reasons for changes in cash provided by operating activities, our current ratio, the turnover rate of our accounts receivable and inventories, the amounts of and reasons for changes in cash used in or provided by investing activities (including projected capital expenditures) and financing activities and our cash and cash equivalents and short-term investments position at period end. We believe that our conservative financial practices have served us well in the past and are serving us well today. As a result, we believe our financial position remains strong.

Comparison of 2025 to 2024

Results of Operations

Nucor reported consolidated net earnings of $1.74 billion, or $7.52 per diluted share, in 2025, which decreased compared to $2.03 billion, or $8.46 per diluted share, in 2024.

The primary driver of the decrease in earnings in 2025 as compared to 2024 was the decreased profitability of the steel products segment. The steel products segment's earnings decreased in 2025 due to decreased average selling prices and margin compression, particularly at our joist and deck businesses and decreased earnings of our metal buildings systems and rebar fabrication businesses. However, the steel products segment had increased volumes in 2025 compared to 2024, reflecting stabilized demand in the warehouse construction market in 2025 after a pull back in demand in 2024, and growing demand from data center construction. The steel mills segment had increased earnings in 2025 as compared to 2024 due to increased metal margin driven by higher volumes. Backlogs for the steel mills segment at the end of 2025 were at historically high levels. Earnings for the raw materials segment increased in 2025 as compared to 2024 due primarily to the absence of the $83 million impairment charge recorded in 2024 to fully reserve a long-term note receivable. Excluding the prior year impairment charge, the raw materials segment’s earnings increased in 2025 due to the improved performance of our DRI facilities and DJJ’s brokerage operations and insurance recoveries recorded in the fourth quarter of 2025.

The following discussion will provide greater quantitative and qualitative analysis of Nucor’s performance in 2025 as compared to 2024.

Net Sales

Net sales to external customers by segment for the years ended December 31, 2025 and 2024 were as follows (in millions):

	Year Ended December 31,		
	2025	2024	% Change
Steel mills	$ 20,003	$ 18,734	7%
Steel products	10,327	10,085	2%
Raw materials	2,164	1,915	13%
Total net sales to external customers	$ 32,494	$ 30,734	6%

Net sales for 2025 increased 6% from the prior year. Average sales price per ton decreased 2% from $1,241 in 2024 to $1,221 in 2025. Total tons shipped to outside customers increased 7% from 24,767,000 tons in 2024 to 26,615,000 tons in 2025.

In the steel mills segment, sales tons for the years ended December 31, 2025 and 2024 were as follows (in thousands):

	Year Ended December 31,		
	2025	2024	% Change
Outside steel shipments	19,848	18,480	7%
Inside steel shipments	5,423	4,646	17%
Total steel shipments	25,271	23,126	9%

Net sales for the steel mills segment increased 7% in 2025 compared to the prior year due to a 7% increase in volumes. Average sales price per ton in the steel mills segment was $1,008 in 2025, which was similar to $1,013 in 2024.

Outside sales tonnage for the steel products segment for the years ended December 31, 2025 and 2024 was as follows (in thousands):

	Year Ended December 31,		
	2025	2024	% Change
Joist and deck sales	871	712	22%
Rebar fabrication sales	1,179	1,020	16%
Tubular products sales	947	856	11%
Building systems sales	228	238	-4%
Other steel products sales	1,172	1,192	-2%
Total steel products sales	4,397	4,018	9%

Net sales for the steel products segment increased 2% in 2025 from the prior year due to a 9% increase in volumes, partially offset by a 6% decrease in the average sales price per ton, from $2,510 in 2024 to $2,348 in 2025.

Net sales for the raw materials segment increased 13% in 2025 from the prior year, primarily due to increased average sales price and volumes at DJJ’s brokerage operations. In 2025, approximately 95% of outside sales for the raw materials segment were from DJJ's brokerage operations, and approximately 3% of outside sales were from DJJ's scrap processing operations (93% and 4%, respectively, in 2024).

Gross Margins

In 2025, Nucor recorded gross margins of $3.85 billion (12%), which was a decrease from $4.10 billion (13%) in 2024:

- The primary driver of the decrease in gross margins in 2025 as compared to 2024 was the decrease in gross margins in the steel products segment. Gross margins decreased across many businesses within the segment due to decreased average selling prices. The largest decreases were at our joist and deck, building systems, and rebar fabrication businesses due to decreased average selling prices and margin compression.
- Gross margins in the steel mills segment increased in 2025 compared to 2024 due to the previously mentioned increase in volumes and increased metal margins.

  The average scrap and scrap substitute cost per gross ton used was $392 in 2025, which was a 1% decrease from $394 in 2024.

  Scrap prices are driven by the global supply and demand for scrap and other iron-based raw materials used to make steel. Scrap prices are stable as we begin 2026.
- Pre-operating and start-up costs of new facilities decreased to approximately $496 million in 2025 as compared to approximately $594 million in 2024. Pre-operating and start-up costs in 2025 and 2024 primarily related to the plate mill in Kentucky, the sheet mill being built in West Virginia, and the melt shop being built in Arizona. Nucor defines pre-operating and start-up costs, all of which are expensed, as the losses attributable to facilities or major projects that are either under construction or in the early stages of operation. Once these facilities or projects have attained a utilization rate that is consistent with our similar operating facilities, they are no longer considered by Nucor to be in start-up.
- Gross margins in the raw materials segment increased modestly in 2025 as compared to 2024 due to the increased profitability of our DRI facilities and DJJ's brokerage operations.

Marketing, Administrative and Other Expenses

A major component of marketing, administrative and other expenses is profit sharing and other incentive compensation costs. These costs, which are based upon and fluctuate with Nucor’s financial performance, decreased from 2024 to 2025 due to the decreased profitability of the Company. In 2025, profit sharing costs consisted of $256 million, including the Company’s matching contribution, made to the Company’s Profit Sharing and Retirement Savings Plan for qualified employees ($298 million in 2024). Other employee bonus costs also fluctuate based on Nucor’s achievement of certain financial performance goals, including achieving record earnings, and comparisons of Nucor’s financial performance to peers in the steel industry and other companies. Stock-based compensation included in marketing, administrative and other expenses increased by 7% to $56 million in 2025 compared with $52 million in 2024 and includes expenses associated with vesting of stock awards granted in prior years.

Impacting the increase in marketing, administrative and other expenses in 2025 as compared to 2024 were fair market value adjustments of our Level 1 investments and expenses associated with restructuring initiatives in the steel mills segment.

Equity in Earnings of Unconsolidated Affiliates

Equity in earnings of unconsolidated affiliates was $35 million in 2025 and $30 million in 2024. The increase in equity method investment earnings from 2024 to 2025 was primarily due to the increased results of NuMit.

Losses and Impairments of Assets

Included in 2025 net earnings were $67 million of losses and impairments of assets ($137 million in 2024). Those charges primarily consisted of the following: $39 million related to the closure or repurposing of certain facilities in the steel products segment and $23 million primarily related to the repurposing of a facility in the steel mills segment.

During the third quarter of 2024, management determined that it was probable that a long-term note receivable in the raw materials segment would no longer be collectable and recorded an $83 million impairment charge to fully reserve the note receivable. The other primary component of losses and impairments of assets in 2024 was a $40 million impairment charge of certain assets, mostly property, plant, and equipment, net, related to a business in the steel products segment.

Interest Expense (Income)

Net interest expense (income) for the years ended December 31, 2025 and 2024 was as follows (in millions):

	Year Ended December 31,	
	2025	2024
Interest expense	$ 170	$ 228
Interest income	(111)	(258)
Interest expense (income), net	$ 59	$ (30)

Interest expense decreased in 2025 compared to 2024 due to an increase in capitalized interest. Interest income decreased in 2025 compared to 2024 due to lower average investments and a decrease in average interest rates on investments.

Earnings Before Income Taxes and Noncontrolling Interests

The following table presents earnings before income taxes and noncontrolling interests by segment for the years ended December 31, 2025 and 2024 (in millions). The changes between periods were driven by the quantitative and qualitative factors previously discussed.

	Year Ended December 31,	
	2025	2024
Steel mills	$ 2,383	$ 2,226
Steel products	1,229	1,596
Raw materials	153	40
Corporate/eliminations	(1,197)	(960)
Earnings before income taxes and noncontrolling interests	$ 2,568	$ 2,902

Noncontrolling Interests

Noncontrolling interests represent the income attributable to the noncontrolling partners of Nucor's joint ventures, Nucor-Yamato, CSI and NJSM. Nucor owns a 51% controlling interest in each of Nucor-Yamato, CSI and NJSM. The increase in earnings attributable to noncontrolling interests in 2025 as compared to 2024 was due to the increased earnings of Nucor-Yamato combined with the decreased losses of NJSM, partially offset by losses at CSI.

Provision for Income Taxes

On July 4, 2025, the One Big Beautiful Bill Act (the "OBBBA") was signed into law. Nucor has reflected the enactment of the OBBBA in the 2025 financial statements as required by accounting principles generally accepted in the United States. The impact of the OBBBA on Nucor's provision for income taxes was immaterial.

The Company's effective tax rate in 2025 was 20.64% compared with 20.09% in 2024.

Nucor has concluded U.S. federal income tax matters for tax years through 2021. The tax years 2022 through 2024 remain open to examination by the Internal Revenue Service. The 2015 through 2021 Canadian income tax returns for Nucor Rebar Fabrication Group Inc. (formerly known as Harris Steel Group Inc.) and certain related affiliates are currently under examination by the Canada Revenue

Agency. The tax years 2017 through 2024 remain open to examination by other major taxing jurisdictions to which Nucor is subject (primarily Canada, Trinidad & Tobago, and other state and local jurisdictions).

Net Earnings and Return on Equity

Nucor reported net earnings of $1.74 billion, or $7.52 per diluted share, in 2025, compared to net earnings of $2.03 billion, or $8.46 per diluted share, in 2024. Net earnings attributable to Nucor stockholders as a percentage of net sales were 5.4% and 6.6% in 2025 and 2024, respectively. Return on average stockholders' equity was 8.5% and 9.8% in 2025 and 2024, respectively.

Liquidity and Capital Resources

We believe our financial strength is a key strategic advantage, particularly during recessionary business cycles. We carry the highest credit ratings of any steel producer headquartered in North America, with an A- long-term rating from Standard and Poor's, an A3 long-term rating from Moody's and an A- long-term rating from Fitch. Our credit ratings are dependent, however, on many factors, both qualitative and quantitative, and are subject to change at any time. The disclosure of our credit ratings is made to enhance investors' understanding of our sources of liquidity and the impact of our credit ratings on our cost of funds.

Nucor's cash and cash equivalents and short-term investments position remained strong at $2.70 billion as of December 31, 2025, compared with $4.14 billion as of December 31, 2024. Approximately $931 million and $970 million of the cash and cash equivalents position as of December 31, 2025 and 2024, respectively, was held by our majority-owned joint ventures. Cash flows provided by operating activities provide us with a significant source of liquidity. When needed, we have external short-term financing sources available, including the issuance of commercial paper and borrowings under our bank credit facilities.

We also issue long-term debt securities from time-to-time. On March 5, 2025, Nucor completed the issuance and sale of $500 million aggregate principal amount of its 4.650% Notes due 2030 (the "2030 Notes") and $500 million aggregate principal amount of its 5.100% Notes due 2035 (the "2035 Notes" and, together with the 2030 Notes, the "Notes"). Net proceeds from the issuance and sale of the Notes were $997 million. Costs of $9 million associated with the issuance and sale of the Notes have been capitalized and will be amortized over the life of the Notes.

Net proceeds from the issuance and sale of the Notes were used during the second quarter of 2025 to redeem all of the outstanding $500 million aggregate principal amount of our 2.000% Notes due 2025 and $500 million aggregate principal amount of our 3.950% Notes due 2025 (collectively, the "2025 Notes") pursuant to the terms of the indenture governing the 2025 Notes.

In November 2025, Nucor issued $220 million in 40-year variable rate West Virginia Economic Development Authority industrial development revenue bonds ("IDRBs") to partially fund the construction of the West Virginia sheet mill.

We expect to continue to have adequate access to the capital markets at a reasonable cost of funds for liquidity purposes when needed.

Selected Measures of Liquidity and Capital Resources

	(Dollars in millions) December 31,	
	2025	2024
Cash and cash equivalents	$ 2,260	$ 3,558
Short-term investments	439	581
Working capital	7,761	7,498
Current ratio	2.9	2.5

The current ratio, which is calculated by dividing current assets by current liabilities, was 2.9 at year-end 2025 compared with 2.5 at year-end 2024. The current ratio was impacted by lower cash and cash equivalents and the decrease in the current portion of long-term debt at December 31, 2025.

In 2025 and 2024, total accounts receivable turned approximately every five weeks and inventories turned approximately every 10 weeks.

Funds provided by operations, cash and cash equivalents, short-term investments and new borrowings under existing credit facilities are expected to be adequate to meet future capital expenditures, current debt maturities and working capital requirements for existing operations for at least the next 24 months. We also believe we have adequate access to capital markets for liquidity purposes.

Off-Balance Sheet Arrangements

We have a simple capital structure with no off-balance sheet arrangements or relationships with unconsolidated special purpose entities that we believe could have a material impact on our financial condition or liquidity.

Capital Allocation Strategy

We believe that our conservative financial practices have served us well in the past and are serving us well today. Nucor's financial strength allows for a consistent, balanced approach to capital allocation throughout the business cycle. Nucor invests in our business for profitable growth over the long term. We have historically done this by investing to optimize our existing operations, initiate greenfield expansions and make acquisitions. Additionally, we return capital to our stockholders through cash dividends and share repurchases. We intend to return a minimum of 40% of our net earnings to our stockholders through dividends and share repurchases, while maintaining a debt-to-capital ratio that supports a strong investment grade credit rating. Nucor returned approximately $1.2 billion in capital to its stockholders in the form of base dividends and share repurchases in 2025.

Our cash flows for each period were as follows:

	(in millions) December 31,	
	2025	2024
Net cash provided by operating activities	$ 3,234	$ 3,979
Net cash used in investing activities	(3,226)	(3,734)
Net cash used in financing activities	(1,315)	(3,058)
Effect of exchange rate changes on cash	9	(16)
Net decrease in cash and cash equivalents	$ (1,298)	$ (2,829)

Operating Activities

For 2025 compared to 2024, the $745 million decrease in cash provided by operating activities was primarily driven by a decrease in net earnings and changes in operating assets and liabilities. Net earnings decreased $281 million over the prior year, which included $47 million of non-cash losses and impairments of assets in 2025, compared to $137 million of non-cash losses and impairments of assets in 2024. The changes in operating assets and liabilities resulted in a net outflow of $636 million in 2025 and a net inflow of $156 million in 2024. The changes in working capital were primarily due to an increase in accounts receivable and inventories from year-end 2024 to year-end 2025. Accounts receivable at the end of 2025 increased from the prior year-end resulting in a cash outflow of $428 million due to an increase in the sales volumes and price per ton compared to the prior year. This compares to accounts receivable at year-end 2024 decreasing from year-end 2023 and resulting in a $319 million cash inflow. From year-end 2024 to year-end 2025, inventories increased resulting in an outflow of $366 million due primarily to a 6% increase in raw material tons. This compares to inventories at year-end 2024 decreasing from year-end 2023 and resulting in a $518 million cash inflow. Salaries, wages and related accruals decreased from year-end 2024 to year-end 2025 resulting in a cash inflow of $2 million due to lower current year profit sharing accrual and other benefit related accruals. This compares to salaries, wages and related accruals at year-end 2024 decreasing from year-end 2023 and resulting in a $385 million cash outflow. Accounts payable increased resulting in an $80 million cash inflow due to the increases in inventory mentioned previously.

Investing Activities

Many of our businesses are capital intensive; therefore, cash used in investing activities primarily represents capital expenditures for the construction of new facilities, the expansion and upgrading of existing facilities and the acquisition of other companies. The $508 million decrease in cash used in investing activities was primarily due to a decrease in the funding of acquisitions of over $750 million in 2025 compared to 2024. $565 million of this was used in the acquisition of Rytec in 2024. Cash used for capital expenditures increased by $249 million to $3.42 billion in 2025 as compared to $3.17 billion in 2024. The increase in capital expenditures was primarily due to the sheet mill under construction in West Virginia, the construction of a manufacturing location to expand NTS, the construction of a melt shop at our bar mill in Arizona and the galvanizing line at our sheet mill in South Carolina. Capital expenditures for 2026 are estimated to be approximately $2.50 billion. The projects that we anticipate will have the largest capital expenditures in 2026 are the sheet mill under construction in West Virginia, the construction of a manufacturing location to expand NTS, and the galvanizing line at our sheet mill in South Carolina.

Financing Activities

The primary uses of cash were: (i) stock repurchases of $700 million in 2025 as compared to $2.22 billion in 2024, a decrease of $1.52 billion; (ii) cash dividends to stockholders of $512 million in 2025 as compared to $522 million in 2024; and (iii) repayments of long-term debt of $1.02 billion in 2025 as compared to $10 million in 2024, an increase of $1.01 billion. In March 2025, Nucor issued $500 million aggregate principal amount of the 2030 Notes and $500 million aggregate principal amount of the 2035 Notes. Net proceeds from the issuance and sale of the Notes were used during the second quarter of 2025 to redeem all of the outstanding $1.00 billion aggregate principal amount of the 2025 Notes pursuant to the terms of the indenture governing the 2025 Notes. Furthermore, in November 2025, Nucor issued $220 million in 40-year variable rate West Virginia Economic Development Authority IDRBs to partially fund the construction of the West Virginia sheet mill.

In March 2025, Nucor amended and restated its revolving credit facility to increase the borrowing capacity from $1.75 billion to $2.25 billion and to extend its maturity date to March 11, 2030. The revolving credit facility includes only one financial covenant, which is a limit of 60% on the ratio of funded debt to total capital. In addition, the undrawn revolving credit facility contains customary non-financial covenants, including a limit on Nucor’s ability to pledge the Company’s assets and a limit on

consolidations, mergers and sales of assets. As of December 31, 2025, Nucor's funded debt to total capital ratio was 24.4%, and Nucor was in compliance with all covenants under the credit facility.

Market Risk

Nucor's largest exposure to market risk is in our steel mills and steel products segments. Our utilization rates for the steel mills and steel products facilities for the fourth quarter of 2025 were 82% and 61%, respectively. A significant portion of our steel mills and steel products segments' sales are into the commercial, industrial and municipal construction markets. Our largest single customer in 2025 represented approximately 5% of sales and consistently pays within terms. In the raw materials segment, we are exposed to price fluctuations related to the purchase of scrap steel, pig iron and iron ore. Our exposure to market risk is mitigated by the fact that our steel mills use a significant portion of the products of this segment and the prices we receive for our steel and steel products tend to be correlated with the prices we pay for these materials.

Nucor manages interest rate risk by using a combination of variable-rate and fixed-rate debt. At December 31, 2025, approximately 24% of Nucor's long-term debt consisted of instruments with variable interest rates, primarily IDRBs that are adjusted weekly. The remaining 76% of Nucor's long-term debt was at fixed rates. Future changes in interest rates are not expected to significantly impact earnings. From time to time, Nucor makes use of interest rate swaps to manage interest rate risk. As of December 31, 2025, there were no such contracts outstanding. Nucor's investment practice is to invest in securities that are highly liquid with short maturities. As a result, we do not expect changes in interest rates to have a significant impact on the value of our investment securities recorded as short-term investments.

Nucor also uses derivative financial instruments from time to time to partially manage its exposure to price risk related to purchases of natural gas used in the production process, as well as steel, scrap, copper and aluminum purchased for resale to its customers. In addition, Nucor uses forward foreign exchange contracts from time to time to hedge cash flows associated with certain assets and liabilities, firm commitments and anticipated transactions. Nucor generally does not enter into derivative instruments for any purpose other than hedging the cash flows associated with specific volumes of commodities that will be purchased, processed or sold in future periods or hedging the exposures related to changes in the fair value of outstanding fixed-rate debt instruments and foreign currency transactions. Nucor recognizes all derivative instruments in the consolidated balance sheets at fair value.

The Company is exposed to foreign currency risk primarily through its operations in Canada, Europe and Mexico. We periodically use derivative contracts to mitigate the risk of currency fluctuations.

Dividends

Nucor has increased its base cash dividend every year since it began paying dividends in 1973. Nucor paid aggregate dividends of $2.20 per share in 2025, compared with aggregate dividends of $2.16 per share in 2024. In December 2025, the Board of Directors increased the regular quarterly cash dividend on Nucor's common stock to $0.56 per share. Nucor returned approximately $1.22 billion in capital to its stockholders in the form of base dividends and share repurchases in 2025. In February 2026, the Board of Directors declared Nucor's 212th consecutive quarterly cash dividend of $0.56 per share payable on May 11, 2026 to stockholders of record as of March 31, 2026.

Contractual Obligations and Other Commercial Commitments

The following table sets forth our contractual obligations and other commercial commitments as of December 31, 2025 for the periods presented (in millions):

	Payments Due By Period				
Contractual Obligations	**Total**	**2026**	**2027-2028**	**2029-2030**	**2031 and thereafter**
Long-term debt	$ 6,933	$ 66	$ 1,088	$ 1,087	$ 4,692
Estimated interest on long-term debt (1)	3,643	276	497	433	2,437
Finance leases	360	32	65	59	204
Operating leases	164	35	46	30	53
Raw material purchase commitments (2)	2,521	1,349	773	140	259
Utility purchase commitments (2)	934	386	277	140	131
Other unconditional purchase obligations (3)	1,241	1,153	76	8	4
Other long-term obligations (4)	707	431	71	8	197
Total contractual obligations	$ 16,503	$ 3,728	$ 2,893	$ 1,905	$ 7,977

(1) Interest is estimated using applicable rates at December 31, 2025 for Nucor's outstanding fixed-rate and variable-rate debt.

(2) Nucor enters into contracts for the purchase of scrap and scrap substitutes, iron ore, electricity, natural gas, and other raw materials and related services. These contracts include multi-year commitments and minimum annual purchase requirements and are valued at prices in effect on December 31, 2025, or according to the contract language. These contracts are part of normal operations and are reflected in historical operating cash flow trends. We do not believe such commitments will adversely affect our liquidity position.

(3) Purchase obligations include commitments for capital expenditures on operating machinery and equipment.

(4) Other long-term obligations include amounts associated with Nucor's early-retiree medical benefits, management compensation and guarantees.

Note: In addition to the amounts shown in the table above, $173 million of unrecognized tax benefits have been recorded as liabilities, and we are uncertain as to if or when such amounts may be settled. Related to these unrecognized tax benefits, we have also recorded a liability for potential penalties and interest of $49 million at December 31, 2025.

Outlook

We expect earnings to increase in the first quarter of 2026. Earnings in the first quarter of 2026 are expected to increase across all three of our operating segments, with the largest increase in the steel mills segment. In the steel mills segment, the expected increase is due to higher volumes and higher realized prices across all major product categories. In the steel products segment, we expect improved earnings in the first quarter due to increased volumes on stable pricing. The raw materials segment is expected to have increased earnings in the first quarter of 2026.

Capital expenditures are expected to decrease to approximately $2.5 billion in 2026. As we have in the past, we intend to allocate capital to investments that advance our strategy to grow the core and expand beyond, with the goal of keeping Nucor in a position of strength well into the future.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in conformity with generally accepted accounting principles in the United States of America. The preparation of these consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at year end and the reported amount of revenues and expenses during the year. On an ongoing basis, we evaluate our estimates, including those related to the valuation allowances for receivables, the carrying value of non-current assets and reserves for environmental obligations and income taxes. Our estimates are based on historical experience and various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Accordingly, actual costs could differ materially from these estimates under different assumptions or conditions. We believe the following critical accounting policies affect our significant judgments and estimates used in the preparation of our consolidated financial statements.

Inventories

Inventories are stated at the lower of cost or net realizable value. The Company records any amount required to reduce the carrying value of inventory to net realizable value as a charge to cost of products sold. Scrap and scrap substitute costs are a very significant component of the raw material, semi-finished and finished product inventory balances. The vast majority of the Company's inventory is recorded on the first-in, first-out method. Production costs are applied to semi-finished and finished product inventory from the approximate period in which they are produced.

Long-Lived Asset Impairments

We evaluate our property, plant and equipment and finite-lived intangible assets for potential impairment on an individual asset basis or at the lowest level asset grouping for which cash flows can be independently identified. Asset impairments are assessed whenever circumstances indicate that the carrying amounts of those productive assets could exceed their projected undiscounted cash flows. In developing estimated values for assets that we currently use in our operations, we utilize judgments and assumptions of future undiscounted cash flows that the assets will produce. When it is determined that an impairment exists, the related assets are written down to estimated fair market value. Certain long-lived asset groupings were tested for impairment during the fourth quarter of 2025. Undiscounted cash flows for each asset grouping were estimated using management's long-range estimates of market conditions associated with each asset grouping over the estimated useful life of the principal asset within the group. Our undiscounted cash flow analysis indicated that the tested long-lived asset groupings were recoverable as of December 31, 2025.

Goodwill and Intangibles

Goodwill is tested annually for impairment and whenever events or circumstances change that would make it more likely than not that an impairment may have occurred. We perform our annual impairment analysis as of the first day of the fourth quarter each year. The evaluation of impairment involves comparing the current estimated fair value of each reporting unit to the recorded value, including goodwill.

When appropriate, Nucor performs a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. For certain reporting units, it is necessary to perform a quantitative analysis. In these instances, a discounted cash flow model is used to determine the current estimated fair value of these reporting units. Significant assumptions used to determine the fair value of each reporting unit as part of our annual testing (and any required interim testing) include: (i) expected cash flow for the five-year period following the testing date (including market share, sales volumes and prices, raw materials and other costs to produce and estimated capital needs);

(ii) an estimated terminal value using a terminal year growth rate determined based on the growth prospects of the reporting unit; and (iii) a discount rate based on management's best estimate of the after-tax weighted-average cost of capital. Management considers historical and anticipated future results, general economic and market conditions, the impact of planned business and operational strategies and all available information at the time the fair values of its reporting units are estimated. Those estimates and judgments may or may not ultimately prove appropriate.

Our fourth quarter 2025 annual goodwill impairment analysis did not result in an impairment charge. Management does not believe that future impairment of these reporting units is probable. However, the performance of certain businesses that comprise our reporting units requires continued improvement. An increase of approximately 50 basis points in the discount rate, a critical assumption in which a minor change can have a significant impact on the estimated fair value, would not result in an impairment charge. See Note 8 to the Company's consolidated financial statements for further discussion of the results of the Company's 2025 annual goodwill impairment analysis.

Nucor will continue to monitor operating results within all reporting units throughout 2026 in an effort to determine if events and circumstances require further interim impairment testing. Otherwise, all reporting units will again be subject to the required annual qualitative and/or quantitative impairment test during our fourth quarter of 2026. Changes in the judgments and estimates underlying our analysis of goodwill for possible impairment, including expected future operating cash flows and discount rate, could decrease the estimated fair value of our reporting units in the future and could result in an impairment of goodwill.

Equity Method Investments

Investments in joint ventures in which Nucor shares control over the financial and operating decisions but in which Nucor is not the primary beneficiary are accounted for under the equity method. Each of the Company's equity method investments is subject to a review for impairment if, and when, circumstances indicate that a decline in value below its carrying amount may have occurred. Examples of such circumstances include, but are not limited to, a significant deterioration in the earnings performance or business prospects of the investee; missed financial projections; a significant adverse change in the regulatory, tax, economic or technological environment of the investee; a significant adverse change in the general market condition of either the geographic area or the industry in which the investee operates; and recurring negative cash flows from operations. When management considers the decline to be other than temporary, the Company would write down the related investment to its estimated fair market value. An other-than-temporary decline in carrying value is determined to have occurred when, in management's judgment, a decline in fair value below carrying value is of such length of time and/or severity that it is considered long-term.

In the event that an impairment review is necessary, a discounted cash flow model is used to determine the current estimated fair value of the equity method investment. Significant assumptions used to determine the fair value of the equity method investment include: (i) expected cash flow for the five-year period following the testing date (including market share, sales volumes and prices, raw materials and other costs to produce and estimated capital needs); (ii) an estimated terminal value using a terminal year growth rate determined based on the growth prospects of the equity method investment; and (iii) a discount rate based on management's best estimate of the after-tax weighted-average cost of capital. Management considers historical and anticipated future results, general economic and market conditions, the impact of planned business and operational strategies and all available information at the time the fair values of its equity method investments are estimated. Those estimates and judgments may or may not ultimately prove appropriate.

Nucor reviews its equity method investments for impairment if and when circumstances indicate that a decline in fair value below their carrying amounts may have occurred. There were no triggering events that caused management to pursue additional testing of our equity method investments in 2025.

Income Taxes

We utilize the liability method of accounting for income taxes. Under the liability method, deferred taxes are determined based on the temporary differences between the financial statement and tax basis of assets and liabilities using tax rates expected to be in effect during the years in which the basis differences reverse. A valuation allowance is recorded when it is more likely than not that some of the deferred tax assets will not be realized. We recognize the effect of income tax positions only if those positions are more likely than not of being sustained. Potential accrued interest and penalties related to unrecognized tax benefits within operations are recognized as a component of interest expense and other expenses.

Cautionary Note Regarding Forward-Looking Statements

Certain statements made in this report, or in other public filings, press releases, or other written or oral communications made by Nucor, which are not historical facts are forward-looking statements subject to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements involve risks and uncertainties which we expect will or may occur in the future and may impact our business, financial condition and results of operations. The words “anticipate,” “believe,” “expect,” “intend,” “project,” “may,” “will,” “should,” “could” and similar expressions are intended to identify those forward-looking statements. These forward-looking statements reflect the Company’s best judgment based on current information, and, although we base these statements on circumstances that we believe to be reasonable when made, there can be no assurance that future events will not affect the accuracy of such forward-looking information. As such, the forward-looking statements are not guarantees of future performance, and actual results may vary materially from the projected results and expectations discussed in this report. Factors that might cause the Company’s actual results to differ materially from those anticipated in forward-looking statements include, but are not limited to: (1) competitive pressure on sales and pricing, including pressure from imports and substitute materials; (2) U.S. and foreign trade policies affecting steel imports or exports; (3) the sensitivity of the results of our operations to general market conditions, and in particular, prevailing market steel prices and changes in the supply and cost of raw materials, including pig iron, iron ore and scrap steel; (4) the availability and cost of electricity and natural gas which could negatively affect our cost of steel production or result in a delay or cancellation of existing or future drilling within our natural gas drilling programs; (5) critical equipment failures and business interruptions; (6) market demand for steel products, which, in the case of many of our products, is driven by the level of nonresidential construction activity in the United States; (7) impairment in the recorded value of inventory, equity investments, fixed assets, goodwill or other long-lived assets; (8) uncertainties and volatility surrounding the global economy, including excess world capacity for steel production, inflation and interest rate changes; (9) fluctuations in currency conversion rates; (10) significant changes in laws or government regulations affecting environmental compliance, including legislation and regulations that result in greater regulation of greenhouse gas emissions that could increase our energy costs, capital expenditures and operating costs or cause one or more of our permits to be revoked or make it more difficult to obtain permit modifications; (11) the cyclical nature of the steel industry; (12) capital investments and their impact on our performance; (13) our safety performance; (14) our ability to integrate businesses we acquire; (15) the impact of any pandemic or public health situation; and (16) the risks discussed in “Item 1A. Risk Factors” of this report.

Caution should be taken not to place undue reliance on the forward-looking statements included in this report. We assume no obligation to update any forward-looking statements except as may be required by law. In evaluating forward-looking statements, these risks and uncertainties should be considered, together with the other risks described from time to time in our reports and other filings with the SEC.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

In the ordinary course of business, Nucor is exposed to a variety of market risks. We continually monitor these risks and develop strategies to manage them.

Interest Rate Risk – Nucor manages interest rate risk by using a combination of variable-rate and fixed-rate debt. At December 31, 2025, approximately 24% of Nucor's long-term debt was comprised of instruments with variable interest rates, primarily IDRBs that are adjusted weekly. The remaining 76% of Nucor's long-term debt was at fixed rates. Future changes in interest rates are not expected to significantly impact earnings. Nucor also occasionally makes use of interest rate swaps to manage net exposure to interest rate changes. As of December 31, 2025, there were no such contracts outstanding. Nucor's investment practice is to invest in securities that are highly liquid with short maturities. As a result, we do not expect changes in interest rates to have a significant impact on the value of our investment securities recorded as short-term investments.

Commodity Price Risk – In the ordinary course of business, Nucor is exposed to market risk for price fluctuations of raw materials and energy, principally scrap, steel, other ferrous and non-ferrous metals, alloys and natural gas. We attempt to negotiate the best prices for our raw material and energy requirements and to obtain prices for our steel products that match market price movements in response to supply and demand. In periods of strong or stable demand for our products, we are more likely to be able to effectively reduce the normal time lag in passing through higher raw material costs so that we can maintain our gross margins. When demand for our products is weaker, this becomes more challenging. Our DRI facilities in Trinidad and Louisiana provide us with flexibility in managing our input costs. DRI is particularly important for operational flexibility when demand for prime scrap increases due to increased domestic steel production.

Natural gas produced by Nucor's production operations is being sold to third parties to partially offset our exposure to changes in the price of natural gas consumed by our Louisiana DRI facility and our steel mills in the United States.

Nucor also periodically uses derivative financial instruments to hedge a portion of our exposure to price risk related to natural gas purchases used in the production process and to hedge a portion of our steel, scrap, aluminum and copper purchases and sales. Gains and losses from derivatives designated as hedges are deferred in accumulated other comprehensive loss, net of income taxes on the consolidated balance sheets and recognized in net earnings in the same period as the underlying physical transaction. At December 31, 2025, accumulated other comprehensive loss, net of income taxes included $13 million in unrealized net-of-tax losses for the fair value of these derivative instruments. Changes in the fair values of derivatives not designated as hedges are recognized in net earnings each period. The following table presents the negative effect on pre-tax earnings of a hypothetical change in the fair value of the derivative instruments outstanding at December 31, 2025, due to an assumed 10% and 25% change in the market price of each of the indicated commodities (in millions):

Commodity Derivative	10% Change	25% Change
Natural gas	$ 7	$ 17
Other commodities	24	60

Any resulting changes in fair value would be recorded as adjustments to accumulated other comprehensive loss, net of income taxes or recognized in net earnings, as appropriate. These hypothetical losses would be partially offset by the benefit of lower prices paid or higher prices received for the physical commodities.

Foreign Currency Risk – Nucor is exposed to foreign currency risk primarily through its operations in Canada, Europe and Mexico. We periodically use derivative contracts to mitigate the risk of currency fluctuations. Open foreign currency derivative contracts at December 31, 2025 and 2024 were insignificant.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Nucor's management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of Nucor's internal control over financial reporting as of December 31, 2025. In making this assessment, management used criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control – Integrated Framework (2013).

Based on its assessment, management concluded that Nucor's internal control over financial reporting was effective as of December 31, 2025. PricewaterhouseCoopers LLP, an independent registered public accounting firm, has audited the effectiveness of Nucor's internal control over financial reporting as of December 31, 2025 as stated in their report which is included herein.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Nucor Corporation

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Nucor Corporation and its subsidiaries (the “Company”) as of December 31, 2025 and 2024, and the related consolidated statements of earnings, of comprehensive income, of stockholders’ equity and of cash flows for each of the three years in the period ended December 31, 2025, including the related notes (collectively referred to as the “consolidated financial statements”). We also have audited the Company's internal control over financial reporting as of December 31, 2025, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2025 and 2024, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2025 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2025, based on criteria established in Internal Control - Integrated Framework(2013) issued by the COSO.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control Over Financial Reporting. Our responsibility is to express opinions on the Company’s consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that (i) relates to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Goodwill Impairment Assessment – Certain Reporting Unit in the Steel Products Segment

As described in Notes 2 and 8 to the consolidated financial statements, the Company's goodwill balance was $4,297 million as of December 31, 2025, and the goodwill associated with the Steel Products segment was $2,825 million, of which a portion relates to a certain reporting unit. Goodwill is tested annually for impairment, on the first day of the fourth quarter, and whenever events or circumstances change that would make it more likely than not that an impairment may have occurred. The evaluation of impairment involves comparing the current estimated fair value of each reporting unit to the recorded value, including goodwill. Based on the results of the qualitative assessment, it may be necessary to perform a quantitative analysis. In these instances, a discounted cash flow model is used to determine the current estimated fair value of these reporting units. As disclosed by management, significant assumptions used to determine the fair value of a reporting unit include (i) expected cash flow for the five-year period following the testing date (including market share, sales volumes and prices, raw material costs and other costs to produce and estimated capital needs); (ii) an estimated terminal value using a terminal year growth rate determined based on the growth prospects of the reporting unit; and (iii) a discount rate based on management's best estimate of the after-tax weighted-average cost of capital.

The principal considerations for our determination that performing procedures relating to the goodwill impairment assessment for a certain reporting unit in the Steel Products segment is a critical audit matter are (i) the significant judgment by management when developing the fair value estimate of a certain reporting unit in the Steel Products segment; (ii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating management's significant assumptions related to sales volumes and prices and discount rate; and (iii) the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to management's goodwill impairment assessments, including controls over the valuation of a certain reporting unit in the Steel Products segment. These procedures also included, among others (i) testing management's process for developing the fair value estimate of a certain reporting unit in the Steel Products segment; (ii) evaluating the appropriateness of the discounted cash flow model; (iii) testing the completeness and accuracy of underlying data used in the discounted cash flow model; and (iv) evaluating the reasonableness of the significant assumptions used by management related to sales volumes and prices and discount rate. Evaluating management's assumptions related to sales volumes and prices involved evaluating whether the assumptions used by management were reasonable considering (i) the current and past performance of the reporting unit; (ii) the consistency with external market and industry data; and (iii) whether the assumptions were consistent with evidence obtained in other areas of the audit. Professionals with specialized skill and knowledge were used to assist in evaluating (i) the appropriateness of the discounted cash flow model and (ii) the reasonableness of the discount rate assumption.

1. Nature of Operations and Basis of Presentation

Nature of Operations

Nucor is principally a manufacturer of steel and steel products, as well as a scrap broker and processor, with operating facilities and customers primarily located in North America.

Principles of Consolidation

The consolidated financial statements include Nucor and its controlled subsidiaries, including Nucor-Yamato Steel Company (Limited Partnership) (“Nucor-Yamato”), California Steel Industries, Inc. (“CSI”), and Nucor-JFE Steel Mexico, S. de R.L. de C.V. ("NJSM"). Nucor owns a 51% controlling interest in each of Nucor-Yamato, CSI and NJSM. All intercompany transactions are eliminated.

Distributions are made to noncontrolling interest partners in Nucor-Yamato in accordance with the limited partnership agreement by mutual agreement of the general partners. At a minimum, sufficient cash is distributed so that each partner may pay its U.S. federal and state income taxes.

Distributions are made to noncontrolling interest partners in CSI in accordance with the stockholder agreement.

Distributions are made to the noncontrolling interest partner in NJSM in accordance with the joint venture agreement.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from these estimates.

2. Summary of Significant Accounting Policies

Cash and Cash Equivalents

Cash equivalents are recorded at cost plus accrued interest, which approximates fair value, and have original maturities of three months or less at the date of purchase. Cash and cash equivalents are maintained primarily with a few high-credit quality financial institutions.

Short-term Investments

Short-term investments are recorded at fair value. Unrealized gains and losses on investments classified as available-for-sale are recorded as a component of accumulated other comprehensive income (loss) if material. Management determines the appropriate classification of its investments at the time of purchase and re-evaluates such determination at each balance sheet date.

Inventories

Inventories are stated at the lower of cost or net realizable value. The Company records any amount required to reduce the carrying value of inventory to net realizable value as a charge to cost of products sold. Scrap and scrap substitute costs are a very significant component of the raw material, semi-finished and finished product inventory balances. The vast majority of the Company's inventory is recorded on the first-in, first-out method. Production costs are applied to semi-finished and finished product inventory from the approximate period in which they are produced.

Property, Plant and Equipment

Property, plant and equipment is stated at cost, except for property, plant and equipment acquired through acquisitions, which is recorded at acquisition date fair value. With the exception of our natural gas wells, depreciation primarily is provided on a straight-line basis over the estimated useful lives of the assets. Depletion of all capitalized costs associated with our natural gas producing properties is expensed on a unit-of-production basis by individual field as the gas from the proved developed reserves is produced. The costs of acquiring unproved natural gas leasehold acreage are capitalized. When proved reserves are found on unproved properties, the associated leasehold cost is transferred to proved properties. Unproved leases are reviewed periodically for any impairment triggering event, and a valuation allowance is provided for any estimated decline in value. The costs of planned major maintenance activities are capitalized as part of other current assets and amortized over the period until the next scheduled major maintenance activity. All other repairs and maintenance activities are expensed when incurred.

Goodwill and Other Intangibles

Goodwill is the excess of cost over the fair value of net assets of businesses acquired. Goodwill is not amortized but is tested annually for impairment and whenever events or circumstances change that would make it more likely than not that an impairment may have occurred. We perform our annual impairment analysis as of the first day of the fourth quarter each year. The evaluation of impairment involves comparing the current estimated fair value of each reporting unit, which is a level below the operating segment, to the recorded value, including goodwill. When appropriate, Nucor performs a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. Based on the results of the qualitative assessment, it may be necessary to perform a quantitative analysis. In these instances, a discounted cash flow model is used to determine the current estimated fair value of these reporting units. A number of significant assumptions and estimates are involved in the application of the discounted cash flow model to forecast operating cash flows, which could include market growth and market share, sales volumes and prices, raw materials and other costs to produce, discount rate and estimated capital needs. Management considers historical experience and all available information at the time the fair values of its reporting units are estimated. Assumptions in estimating future cash flows are subject to a high degree of judgment and complexity. Changes in assumptions and estimates may affect the fair value of goodwill and could result in impairment charges in future periods.

Finite-lived intangible assets are amortized over their estimated useful lives on a straight-line or accelerated basis.

Long-Lived Asset Impairments

We evaluate our property, plant and equipment and finite-lived intangible assets for potential impairment on an individual asset basis or at the lowest level asset grouping for which independent cash flows can be separately identified. Asset impairments are assessed whenever circumstances indicate that the carrying amounts of those productive assets could exceed their projected undiscounted cash flows. When it is determined that impairment exists, the related assets are written down to their estimated fair market value.

Equity Method Investments

Investments in joint ventures in which Nucor shares control over the financial and operating decisions but in which Nucor is not the primary beneficiary are accounted for under the equity method. Each of the Company's equity method investments is subject to a review for impairment if, and when, circumstances indicate that a decline in fair value below its carrying amount may have occurred. Examples of such circumstances include, but are not limited to, a significant deterioration in the earnings performance or business prospects of the investee; missed financial projections; a significant adverse change in the regulatory, tax, economic or technological environment of the investee; a significant adverse change in the general market condition of either the geographic area or the industry in which the investee operates; and recurring negative cash flows from operations. If management considers the decline to be other than temporary, the Company would write down the related investment to its estimated fair market value.

Revenue Recognition

Nucor recognizes revenue when obligations under the terms of contracts with our customers are satisfied and collection is reasonably assured; generally, obligations under the terms of contracts are satisfied upon shipment or when control is transferred. Revenue is measured as the amount of consideration expected to be received in exchange for transferring the goods. In addition, revenue is deferred when cash payments are received or due in advance of performance. See Note 23 for further information.

Income Taxes

Nucor utilizes the liability method of accounting for income taxes. Under the liability method, deferred taxes are determined based on the temporary differences between the financial statement and tax basis of assets and liabilities using tax rates expected to be in effect during the years in which the basis differences reverse. A valuation allowance is recorded when it is more likely than not that some of the deferred tax assets will not be realized.

Nucor recognizes the effect of income tax positions only if those positions are more likely than not of being sustained. Potential accrued interest and penalties related to unrecognized tax benefits are recognized as a component of interest expense and other expenses.

Stock-Based Compensation

The Company recognizes the cost of stock-based compensation as an expense using fair value measurement methods. The assumptions used to calculate the fair value of stock-based compensation granted are evaluated and revised for new grants, as necessary, to reflect market conditions and experience.

Foreign Currency Translation

For Nucor's operations where the functional currency is other than the U.S. dollar, assets and liabilities have been translated at year-end exchange rates, and income and expenses have been translated using average exchange rates for the respective periods. Adjustments resulting from the process of translating an entity's financial statements into the U.S. dollar have been recorded in accumulated other comprehensive income (loss) and are included in net earnings only upon sale or liquidation of the underlying investments. Foreign currency transaction gains and losses are included in net earnings in the period in which they occur.

Recently Issued Accounting Pronouncements

In November 2024, new accounting guidance was issued that requires the disaggregated disclosure of specific expense categories, including purchases of inventory, employee compensation, depreciation, and amortization, within relevant income statement captions. The new accounting guidance also requires disclosure of the total amount of selling expenses along with the definition of selling expenses. The new accounting guidance is effective for annual periods beginning after December 15, 2026, and interim

periods within fiscal years beginning after December 15, 2027. Adoption of this new accounting guidance can either be applied prospectively to consolidated financial statements issued for reporting periods after the effective date or retrospectively to any or all prior periods presented in the consolidated financial statements. Early adoption is also permitted. The Company is evaluating the impact that the adoption of this new accounting guidance will have on its consolidated financial statements.

Recently Adopted Accounting Pronouncements

In December 2023, new accounting guidance was issued related to income tax disclosures. The new accounting guidance requires disaggregated information about a reporting entity's effective tax rate reconciliation as well as additional information on income taxes paid. We adopted this new accounting guidance and applied the disclosure requirements on a prospective basis effective for the year ended December 31, 2025. The adoption of this new accounting guidance affects only our disclosures, with no impacts to our results of operations and financial condition.

3. Short-term Investments

Nucor held $439 million of short-term investments as of December 31, 2025 ($581 million as of December 31, 2024). The investments held as of December 31, 2025 and December 31, 2024 consisted mainly of certificates of deposit, commercial paper, corporate bonds, money market funds and U.S. government securities, which were classified as available-for-sale. Interest income was recorded as earned.

Realized and unrealized gains or losses on these investments have been deemed immaterial for disclosure by Nucor management.

Short-term investments have maturities of less than one year.

4. Accounts Receivable

An allowance for credit losses is maintained for estimated losses resulting from the inability of our customers to make required payments. Accounts receivable are stated net of the allowance for credit losses of $81 million at December 31, 2025 ($115 million at December 31, 2024 and $127 million at December 31, 2023).

5. Inventories

Inventories consisted of approximately 35% raw materials and supplies and 65% finished and semi-finished products at December 31, 2025 (approximately 34% and 66%, respectively, at December 31, 2024). Nucor's manufacturing process consists of a continuous, vertically integrated process from which products are sold to customers at various stages throughout the process. Since most steel products can be classified as either finished or semi-finished products, these two categories of inventory are combined.

6. Leases

We lease certain equipment, office space and land. Leases with an initial term of 12 months or less are not recorded on the consolidated balance sheet.

Most leases include one or more options to renew, with renewal terms that can extend the lease term from one to five years or sometimes more. The exercise of lease renewal options is at our sole discretion and we consider these options in determining the lease term used to establish our right-of-use assets and lease liabilities. Certain leases also include options to purchase the leased property. The depreciable life of assets and leasehold improvements is limited by the expected lease term, unless there is a transfer of title or a purchase option reasonably certain of exercise.

We determine that a contract contains a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. In evaluating whether we have the right to control the use of an identified asset, we assess whether or not we have the right to control the

use of the identified asset and to obtain substantially all of the economic benefit from the use of the identified asset.

As most of our leases do not provide an implicit rate, we use our incremental borrowing rate based on the information available at the commencement date in determining the present value of lease payments.

Certain of our lease agreements include payments that adjust periodically for consumption of goods provided by the right-of-use asset in excess of contractually determined minimum amounts and for inflation. These variable lease payments are not significant. Our lease agreements do not contain any material residual value guarantees or material restrictive covenants.

Supplemental statement of earnings information related to our leases is as follows (in millions):

	Statement of Earnings Classification	Year Ended December 31, 2025	2024	2023
Operating lease cost	Cost of products sold	$ 30	$ 18	$ 27
Operating lease cost	Marketing, administrative and other expenses	3	11	3
Total operating lease cost		$ 33	$ 29	$ 30
Finance lease cost:				
Amortization of leased assets	Cost of products sold	$ 22	$ 30	$ 19
Interest on lease liabilities	Interest expense, net	12	3	12
Total finance lease cost		$ 34	$ 33	$ 31
Total lease cost		$ 67	$ 62	$ 61

Supplemental cash flow information related to our leases is as follows (in millions):

	Year Ended December 31, 2025	2024	2023
Cash paid for amounts included in measurement of lease liabilities:			
Operating cash flows from operating leases	$ 32	$ 30	$ 30
Operating cash flows from finance leases	$ 12	$ 11	$ 12
Financing cash flows from finance leases	$ 19	$ 14	$ 17
Non-cash investing and financing activities:			
Additions to right-of-use assets obtained from			
Operating lease liabilities	$ 36	$ 36	$ 27
Finance lease liabilities	$ 91	$ 15	$ 16

Supplemental balance sheet information related to our leases is as follows (in millions):

	Balance Sheet Classification	December 31, 2025	December 31, 2024
Assets:			
Operating lease	Other assets	$ 118	$ 107
Finance lease	Property, plant and equipment, net	231	163
Total leased		$ 349	$ 270
Liabilities:			
Current operating	Accrued expenses and other current liabilities	$ 26	$ 24
Current finance	Current portion of long-term debt and finance lease obligations	24	17
Non-current operating	Deferred credits and other liabilities	102	93
Non-current finance	Long-term debt and finance lease obligations due after one year	234	174
Total leased		$ 386	$ 308

Weighted-average remaining lease term and discount rate for our leases are as follows:

	December 31, 2025	December 31, 2024	December 31, 2023
Weighted-average remaining lease term - operating leases	8.3 years	7.8 years	7.7 years
Weighted-average remaining lease term - finance leases	13.7 years	13.1 years	14.3 years
Weighted-average discount rate - operating leases	4.7%	4.5%	4.0%
Weighted-average discount rate - finance leases	8.0%	10.4%	11.7%

The reason for the substantial weighted-average discount rate – finance leases, of 8.0%, is due to Nucor's past accounting for the respective finance leases under the former accounting guidance for capital leases. Pursuant to the former lease accounting guidance, the recognition of a capital lease asset and associated capital lease liability could not exceed the fair market value of the leased asset at the lease commencement. Accordingly, the incremental borrowing rate was adjusted upward so that the present value of the minimum lease payments would equal the fair value of the asset.

Maturities of lease liabilities by year for our leases were as follows as of December 31, 2025 (in millions):

	Operating Leases	Finance Leases
Maturities of lease liabilities, year ending December 31,		
2026	$ 32	$ 34
2027	24	33
2028	21	33
2029	18	31
2030	13	28
Thereafter	50	199
Total lease payments	$ 158	$ 358
Less imputed interest	(30)	(100)
Present value of lease liabilities	$ 128	$ 258

7. Property, Plant and Equipment

Property, plant and equipment is carried at historical cost, net of accumulated depreciation. Net property, plant and equipment by major asset class consisted of the following (in millions):

	December 31,	
	2025	2024
Land and improvements, net	$ 1,407	$ 1,257
Buildings and improvements	3,280	2,764
Machinery and equipment	18,770	17,431
Proved oil and gas properties	559	559
Leasehold interest in unproved oil and gas properties	96	96
Construction in process and equipment deposits	4,572	3,758
	28,684	25,865
Less accumulated depreciation	(13,378)	(12,622)
	$ 15,306	$ 13,243

The estimated useful lives primarily range from five to 25 years for land improvements, four to 40 years for buildings and improvements and two to 15 years for machinery and equipment. The useful life for proved oil and gas properties is based on the unit-of-production method and varies by well.

Included within property, plant and equipment, net, of the steel mills segment at December 31, 2025 is $220 million of assets, net of accumulated depreciation, related to our consolidated joint venture NJSM. During the fourth quarter of 2025, the Company determined that a triggering event occurred after review of NJSM's most recent annual forecast. The Company performed an impairment assessment to determine if the carrying amount of NJSM exceeded its projected undiscounted cash flows. Upon completion of the assessment, the Company determined that the carrying amount did not exceed its projected undiscounted cash flows and no impairment charge was required. Nucor will continue to monitor NJSM's financial performance. If NJSM's financial performance underperforms its forecasts, management may determine that a triggering event has occurred and additional testing may be required.

8. Goodwill and Other Intangible Assets

The change in the net carrying amount of goodwill for the years ended December 31, 2025 and 2024 by segment was as follows (in millions):

	Steel Mills	Steel Products	Raw Materials	Total
Balance, December 31, 2023	$ 675	$ 2,514	$ 780	$ 3,969
Acquisitions	—	318	17	335
Translation and other	—	(16)	—	(16)
Balance, December 31, 2024	675	2,816	797	4,288
Acquisitions	—	1	—	1
Translation and other	—	8	—	8
Balance, December 31, 2025	$ 675	$ 2,825	$ 797	$ 4,297

The majority of goodwill is not tax deductible.

Intangible assets with estimated useful lives of five to 25 years are amortized on a straight-line or accelerated basis and consisted of the following (in millions):

	December 31, 2025		December 31, 2024	
	Gross Amount	Accumulated Amortization	Gross Amount	Accumulated Amortization
Customer relationships	$ 4,444	$ 1,737	$ 4,444	$ 1,512
Trademarks and trade names	374	207	387	192
Other	142	136	129	122
	$ 4,960	$ 2,080	$ 4,960	$ 1,826

Intangible asset amortization expense was $254 million in 2025 ($262 million in 2024 and $238 million in 2023). Annual amortization expense is estimated to be $249 million in 2026, $246 million in 2027, $242 million in 2028, $209 million in 2029 and $189 million in 2030.

The Company completed its annual goodwill impairment testing as of the first day of the fourth quarter for each of 2025, 2024 and 2023 and concluded that as of each such date there was no impairment of goodwill for any of its reporting units.

There are no material historical accumulated impairment charges, by segment or in the aggregate, related to goodwill.

9. Equity Investments

The carrying value of our equity investments in domestic and foreign companies was $473 million at December 31, 2025 ($483 million at December 31, 2024), and is recorded in other assets in the consolidated balance sheets.

NuMit

Nucor owns a 50% economic and voting interest in NuMit LLC (“NuMit”). NuMit owns 100% of the equity interest in Steel Technologies LLC, an operator of 30 sheet processing facilities located throughout the United States, Canada and Mexico. Nucor accounts for its investment in NuMit (on a one-month lag basis) under the equity method, as control and risk of loss are shared equally between the members of NuMit. Nucor’s investment in NuMit was $427 million at December 31, 2025 ($438 million at December 31, 2024). Nucor received distributions of $46 million, $25 million and $33 million from NuMit during 2025, 2024 and 2023, respectively.

All Equity Investments

Nucor reviews its equity investments for impairment if and when circumstances indicate that a decline in fair value below their carrying amounts may have occurred. There were no triggering events that caused management to pursue additional testing of our equity method investments in 2025.

10. Current Liabilities

Book overdrafts, included in accounts payable in the consolidated balance sheets, were $145 million at December 31, 2025 ($146 million at December 31, 2024). Dividends payable, included in accrued expenses and other current liabilities in the consolidated balance sheets, were $129 million at December 31, 2025 ($129 million at December 31, 2024). Accrued vacation and holiday pay, included in salaries, wages and related accruals in the consolidated balance sheets, was $233 million at December 31, 2025 ($231 million at December 31, 2024).

11. Debt and Other Financing Arrangements

	December 31,	
(in millions)	2025	2024
Industrial revenue bonds due from 2026 to 2065 [1]	$ 1,569	$ 1,350
NJSM notes due from 2026 to 2029 [2]	75	80
Notes, 2.000%, due 2025	—	500
Notes, 3.950%, due 2025	—	500
Notes, 4.300%, due 2027	500	500
Term notes, 2.950%, due 2027 [3]	39	48
Notes, 3.950%, due 2028	500	500
Notes, 2.700%, due 2030	500	500
Notes, 4.650%, due 2030	500	—
Notes, 3.125%, due 2032	550	550
Notes, 5.100%, due 2035	500	—
Notes, 6.400%, due 2037	543	543
Notes, 5.200%, due 2043	338	338
Notes, 4.400%, due 2048	329	329
Notes, 3.850%, due 2052	550	550
Notes, 2.979%, due 2055	439	439
Finance lease obligations	258	191
Total long-term debt and finance lease obligations	7,190	6,918
Less premium on debt exchange	159	165
Less debt issuance costs	32	28
Total amounts outstanding	6,999	6,725
Less current maturities of long-term debt [2] [3]	66	1,025
Less current portion of finance lease obligations	24	17
Total long-term debt and finance lease obligations due after one year	$ 6,909	$ 5,683

(1) The industrial revenue bonds had variable rates ranging from 2.60% to 3.00% at December 31, 2025 and 3.92% to 4.70% at December 31, 2024.

(2) The NJSM notes relate to borrowings of NJSM under its General Financing Agreement and Promissory Note (the "NJSM Facility"). The maximum amount NJSM could borrow under the NJSM Facility was $80 million at December 31, 2025. The NJSM Facility is uncommitted. Borrowings under the NJSM Facility had variable rates ranging from 3.67% to 5.95% at December 31, 2025.

(3) The term notes were assumed in conjunction with the acquisition of 51% ownership of CSI on February 1, 2022. The original principal amount of the notes was $101 million, with a fixed rate of 2.95% until September 30, 2026 when they will convert to a floating rate. Payments of $3 million are due quarterly along with accrued interest. The term notes mature on March 31, 2027.

Annual aggregate long-term debt, excluding finance lease obligations, was $6.93 billion at December 31, 2025. Annual aggregate long-term debt maturities are: $66 million in 2026, $532 million in 2027, $553 million in 2028, $75 million in 2029, $1.02 billion in 2030 and $4.69 billion thereafter.

Nucor's $2.25 billion revolving credit facility remains undrawn and has a maturity date of March 11, 2030. The unsecured revolving credit facility provides up to $2.25 billion in revolving loans and allows up to $500 million in additional commitments at Nucor's election in accordance with the terms set forth in the

credit agreement. Up to $100 million of the credit facility is available for the issuance of letters of credit and up to $500 million is available for the issuance of revolving loans for Nucor subsidiaries in accordance with the terms set forth in the credit agreement. The credit facility provides for a pricing grid based upon the credit rating of Nucor's senior unsecured long-term debt and, alternatively, interest rates quoted by lenders in connection with competitive bidding. The credit facility includes customary financial and other covenants, including a limit on the ratio of funded debt to total capital of 60%, a limit on Nucor's ability to pledge the Company's assets and a limit on consolidations, mergers and sales of assets. As of December 31, 2025, Nucor's funded debt to total capital ratio was 24.4%, and Nucor was in compliance with all covenants under the credit facility. No borrowings were outstanding under the credit facility as of December 31, 2025 and 2024.

In March 2025, Nucor completed the issuance and sale of $500 million aggregate principal amount of its 4.650% Notes due 2030 (the "2030 Notes") and $500 million aggregate principal amount of its 5.100% Notes due 2035 (the "2035 Notes" and, together with the 2030 Notes, the "Notes"). Net proceeds from the issuance and sale of the Notes were $997 million. Costs of $9 million associated with the issuance and sale of the Notes have been capitalized and will be amortized over the life of the Notes.

Net proceeds from the issuance and sale of the Notes were used during the second quarter of 2025 to redeem all of the outstanding $500 million aggregate principal amount of our 2.000% Notes due 2025 and $500 million aggregate principal amount of our 3.950% Notes due 2025 (collectively, the "2025 Notes") pursuant to the terms of the indenture governing the 2025 Notes.

In November 2025, Nucor issued $220 million in 40-year variable rate West Virginia Economic Development Authority IDRBs to partially fund the construction of the West Virginia sheet mill.

A business within the steel products segment has credit facilities totaling approximately $18 million, with no outstanding borrowings at December 31, 2025 and 2024.

The business of Nucor Trading S.A. is financed by uncommitted trade credit arrangements with a number of European banking institutions. As of December 31, 2025, Nucor Trading S.A. had outstanding borrowings of $33 million ($45 million as of December 31, 2024). NJSM maintains an uncommitted trade credit agreement with three banking institutions. As of December 31, 2025, NJSM had outstanding borrowings of $89 million ($180 million as of December 31, 2024) under the trade credit agreement. Nucor Trading S.A. and NJSM's credit arrangements are presented in short-term debt in the consolidated balance sheets.

Letters of credit totaling $94 million were outstanding as of December 31, 2025 ($59 million as of December 31, 2024), related to certain obligations, including workers' compensation, utilities deposits and credit arrangements by Nucor Trading S.A. for commitments to purchase inventories.

12. Capital Stock

The par value of Nucor's common stock is $0.40 per share and there are 800 million shares authorized. In addition, 250,000 shares of preferred stock, par value $4.00 per share, are authorized, with preferences, rights and restrictions as may be fixed by the Board of Directors. There are no shares of preferred stock issued or outstanding.

Dividends declared per share were $2.210 in 2025 ($2.170 per share in 2024 and $2.070 per share in 2023).

The Company repurchased approximately $700 million of its common stock in 2025 (approximately $2.22 billion in 2024 and $1.55 billion in 2023).

On February 20, 2026, the Company announced that its Board of Directors had approved a share repurchase program under which the Company is authorized to repurchase up to $4.00 billion of the Company's common stock and terminated all previously authorized share repurchase programs. Share repurchases are made from time to time in the open market at prevailing market prices or through private transactions or block trades. The timing and amount of repurchases, if any, depend on market conditions,

share price, applicable legal requirements and other factors. The share repurchase authorization is discretionary and has no expiration date. At December 31, 2025, the Company had approximately $406 million available for share repurchases under the previously authorized share repurchase program which was terminated by the Company's Board of Directors in connection with the approval of the new authorization in February 2026.

13. Derivative Financial Instruments

The following tables summarize information regarding Nucor's derivative financial instruments (in millions):

Fair Value of Derivative Financial Instruments	Consolidated Balance Sheet Location	Fair Value at December 31, 2025	Fair Value at December 31, 2024
Asset derivatives designated as hedging instruments:			
Commodity contracts	Other current assets	$ —	$ 4
Commodity contracts	Other assets	—	2
Total asset derivatives designated as hedging instruments		—	6
Asset derivatives not designated as hedging instruments:			
Foreign exchange contracts	Other current assets	—	1
Total asset derivatives		$ —	$ 7
Liability derivatives designated as hedging instruments:			
Commodity contracts	Accrued expenses and other current liabilities	$ (17)	$ (4)
Commodity contracts	Deferred credits and other liabilities	—	—
Total liability derivatives designated as hedging instruments		(17)	(4)
Liability derivatives not designated as hedging instruments:			
Foreign exchange contracts	Accrued expenses and other current liabilities	—	—
Total liability derivatives		$ (17)	$ (4)

The Effect of Derivative Financial Instruments on the Consolidated Statements of Earnings

Derivatives Designated as Hedging Instruments for the Year Ended December 31, (in millions)

Derivatives in Cash Flow Hedging Relationships	Statement of Earnings Location	Amount of Gain or (Loss), Net of Tax, Recognized in OCI on Derivatives (Effective Portion)			Amount of Gain or (Loss), Net of Tax, Reclassified from Accumulated OCI into Earnings on Derivatives (Effective Portion)			Amount of Gain or (Loss), Net of Tax, Recognized in Earnings on Derivatives (Ineffective Portion)		
		2025	2024	2023	2025	2024	2023	2025	2024	2023
Commodity contracts	Cost of products sold	$ (39)	$ (6)	$ (52)	$ (25)	$ (21)	$ (12)	$ —	$ —	$ —

At December 31, 2025, natural gas swaps covering approximately 20 million MMBTUs (extending through December 2028) were outstanding.

14. Fair Value Measurements

The following table summarizes information regarding Nucor's financial assets and liabilities that are measured at fair value (in millions). Nucor does not have any non-financial assets or liabilities that are measured at fair value on a recurring basis:

		Fair Value Measurements at Reporting Date Using		
Description	Carrying Amount in Consolidated Balance Sheets	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
As of December 31, 2025				
Assets:				
Cash equivalents	$ 1,596	$ 1,596	$ —	$ —
Short-term investments	439	439	—	—
Derivative contracts	—	—	—	—
Other assets	102	23	—	79
Total assets	$ 2,137	$ 2,058	$ —	$ 79
Liabilities:				
Derivative contracts	$ (17)	$ —	$ (17)	$ —
As of December 31, 2024				
Assets:				
Cash equivalents	$ 2,821	$ 2,821	$ —	$ —
Short-term investments	581	581	—	—
Derivative contracts	7	—	7	—
Other assets	96	27	—	69
Total assets	$ 3,505	$ 3,429	$ 7	$ 69
Liabilities:				
Derivative contracts	$ (4)	$ —	$ (4)	$ —

Fair value measurements for Nucor's cash equivalents, short-term investments and an investment in a publicly traded nuclear power equipment manufacturer are classified under Level 1 because such measurements are based on quoted market prices in active markets for identical assets. Fair value measurements for Nucor's derivatives, which are typically commodity or foreign exchange contracts, are classified under Level 2 because such measurements are based on published market prices for similar assets or are estimated based on observable inputs such as interest rates, yield curves, credit risks, spot and future commodity prices, and spot and future exchange rates. Fair value measurements for Nucor's investments in privately held companies, most of which are in a nuclear fusion technology company, are classified under Level 3 because such measurements are estimated based on unobservable inputs that indicate a change in fair value, including the transaction price in the event of a change in ownership of the investee (e.g., the sale of other investors' interests in the company) or the transaction price in the event of additional equity issuances of the investee. There were no transfers between levels in the fair value hierarchy for the periods presented.

The fair value of short-term and long-term debt, including current maturities, was approximately $6.53 billion at December 31, 2025 (approximately $6.19 billion at December 31, 2024). The debt fair value estimates are classified under Level 2 because such estimates are based on readily available market prices of our debt at December 31, 2025 and 2024, or similar debt with the same maturities, ratings and interest rates.

15. Contingencies

We are from time to time a party to various lawsuits, claims and other legal proceedings that arise in the ordinary course of business. With respect to all such lawsuits, claims and proceedings, we record reserves when it is probable a liability has been incurred and the amount of loss can be reasonably estimated. We do not believe that any of these proceedings, individually or in the aggregate, would be expected to have a material adverse effect on our results of operations, financial position or cash flows. Nucor maintains liability insurance with self-insurance limits for certain risks.

16. Stock-Based Compensation

Overview

The Company maintains the Nucor Corporation 2025 Omnibus Incentive Compensation Plan (the "Omnibus Plan") under which the Company may award stock-based compensation to employees, officers, consultants and non-employee directors. The Company's stockholders approved the Omnibus Plan on May 8, 2025. The Omnibus Plan permits the award of stock options, appreciation rights, restricted share units, restricted shares, performance shares and performance units for up to 6.8 million shares of the Company's common stock. As of December 31, 2025, 6.0 million shares remained available for award under the Omnibus Plan.

The Company also maintains a number of inactive plans, including the Nucor Corporation 2014 Omnibus Incentive Compensation Plan (the "2014 Plan"), under which stock-based awards remain outstanding but no further awards may be made. As of December 31, 2025, 1.6 million shares were reserved for issuance upon the future settlement of outstanding awards under such inactive plans.

Stock Options

Stock options may be granted to employees, officers, consultants and non-employee directors with exercise prices at 100% of the market value on the date of the grant. The stock options granted are generally exercisable at the end of three years and have a term of 10 years.

A summary of activity under Nucor's stock option plans is as follows (shares in thousands):

	Year Ended December 31,					
	2025		2024		2023	
	Shares	Weighted-Average Exercise Price	Shares	Weighted-Average Exercise Price	Shares	Weighted-Average Exercise Price
Number of shares under stock options:						
Outstanding at beginning of year	724	$ 89.06	718	$ 78.33	837	$ 66.76
Granted	138	$ 109.36	73	$ 168.85	91	$ 133.03
Exercised	(40)	$ 120.91	(64)	$ 55.84	(210)	$ 55.85
Canceled	—	$ —	(3)	$ 168.85	—	$ —
Outstanding at end of year	822	$ 90.92	724	$ 89.06	718	$ 78.33
Stock options exercisable at end of year	562	$ 72.95	490	$ 63.65	433	$ 48.33

The total intrinsic value of stock options (the amount by which the stock price exceeded the exercise price of the stock option on the date of exercise) that were exercised during 2025 was $1 million ($9 million in 2024 and $25 million in 2023).

The following table summarizes information about stock options outstanding at December 31, 2025 (shares in thousands):

	Options Outstanding			Options Exercisable	
Range of Exercise Prices	Number Outstanding	Weighted-Average Remaining Contractual Life	Weighted-Average Exercise Price	Number Exercisable	Weighted-Average Exercise Price
$40.00 - $70.00	355	4.2 years	$ 44.06	355	$ 44.06
$70.01 - $100.00	—	0.0 years	$ —	—	$ —
$100.01 - $130.00	234	7.6 years	$ 110.00	108	$ 110.74
$130.01 - $160.00	163	6.9 years	$ 131.85	88	$ 130.84
$160.01 - $168.85	70	7.6 years	$ 168.85	11	$ 168.85
$40.00 - $168.85	822	6.0 years	$ 90.92	562	$ 72.95

As of December 31, 2025, the total aggregate intrinsic value of stock options outstanding and stock options exercisable was $60 million and $51 million, respectively.

The grant date fair value of stock options granted was $41.01 per share in 2025 ($67.83 per share in 2024 and $49.62 per share in 2023). The fair value was estimated using the Black-Scholes options pricing model with the following assumptions:

	2025	2024	2023
Exercise price	$ 109.36	$ 168.85	$ 133.03
Expected dividend yield	2.01%	1.28%	1.53%
Expected stock price volatility	39.29%	37.69%	37.55%
Risk-free interest rate	4.18%	4.52%	3.66%
Expected life (years)	6.5	6.5	6.5

Stock options granted to employees who are eligible for retirement on the date of the grant are expensed immediately since these awards vest upon retirement from the Company. Retirement, for purposes of vesting in these stock options, means termination of employment after satisfying age and years of service requirements. Similarly, stock options granted to employees who will become retirement-eligible prior to the end of the vesting term are expensed over the period through which the employee will become retirement-eligible. Compensation expense for stock options granted to employees who will not become retirement-eligible prior to the end of the vesting term is recognized on a straight-line basis over the vesting period. Compensation expense for stock options was $5 million in 2025 ($5 million in 2024 and 2023). As of December 31, 2025, unrecognized compensation expense related to stock options was $2 million, which is expected to be recognized over a weighted-average period of 2.0 years.

Restricted Stock Units

Nucor grants restricted stock units (“RSUs”) annually to key employees, officers and non-employee directors. The RSUs granted to key employees and officers vest and are converted to common stock in three equal installments on each of the first three anniversaries of the grant date, provided that a portion of the RSUs awarded to an officer prior to 2018 vest only upon the officer’s retirement. Retirement, for purposes of vesting in these RSUs only, means termination of employment with approval of the Compensation and Executive Development Committee of the Board of Directors after satisfying age and years of service requirements. RSUs granted to a non-employee director are fully vested on the grant date and are payable to the non-employee director in the form of common stock after the termination of the director’s service on the Board of Directors.

RSUs granted to employees who are eligible for retirement on the date of the grant are expensed immediately, and RSUs granted to employees who will become retirement-eligible prior to the end of the vesting term are expensed over the period through which the employee will become retirement-eligible since these awards vest upon retirement from the Company. Compensation expense for RSUs granted to

employees who will not become retirement-eligible prior to the end of the vesting term is recognized on a straight-line basis over the vesting period.

Cash dividend equivalents are paid to holders of RSUs each quarter. Dividend equivalents paid on RSUs expected to vest are recognized as a reduction in retained earnings.

The fair value of an RSU is determined based on the closing price of Nucor's common stock on the date of the grant.

A summary of Nucor's RSU activity is as follows (shares in thousands):

	Year Ended December 31,					
	2025		2024		2023	
	Shares	Grant Date Fair Value Per Share	Shares	Grant Date Fair Value Per Share	Shares	Grant Date Fair Value Per Share
Restricted stock units:						
Unvested at beginning of year	1,021	$ 144.89	947	$ 124.89	1,003	$ 98.66
Granted	624	$ 109.36	749	$ 168.85	831	$ 133.03
Vested	(719)	$ 132.41	(651)	$ 143.20	(873)	$ 102.79
Canceled	(27)	$ 139.64	(24)	$ 149.59	(14)	$ 106.76
Unvested at end of year	899	$ 130.37	1,021	$ 144.89	947	$ 124.89

Compensation expense for RSUs was $87 million in 2025 ($106 million in 2024 and $88 million in 2023). The total fair value of shares vested during 2025 was $83 million ($110 million in 2024 and $121 million in 2023). As of December 31, 2025, unrecognized compensation expense related to unvested RSUs was $78 million, which is expected to be recognized over a weighted-average period of 1.1 years.

Restricted Stock Awards

The Nucor Corporation Senior Officers Long-Term Incentive Plan (a supplement to the 2014 Plan and the Omnibus Plan, the "LTIP") provides for the award of shares of restricted common stock at the end of each LTIP performance measurement period at no cost to officers if certain financial performance goals are met during the period. One-third of the LTIP restricted stock award vests upon each of the first three anniversaries of the award date or, if earlier, upon the officer's attainment of age 55 while employed by Nucor. Although participants are entitled to cash dividends and may vote such awarded shares, the sale or transfer of such shares is limited during the restricted period.

The Nucor Corporation Senior Officers Annual Incentive Plan (a supplement to the 2014 Plan and the Omnibus Plan, the "AIP") provides for the payment of annual cash incentive awards. An AIP participant may elect, however, to defer payment of up to one-half of an AIP award. In such event, the deferred AIP award is converted into common stock units and credited with a deferral incentive, in the form of additional common stock units, equal to 25% of the number of common stock units attributable to the deferred AIP award. Common stock units attributable to deferred AIP awards are fully vested. Common stock units credited as a deferral incentive vest upon the AIP participant's attainment of age 55 while employed by Nucor. Vested common stock units are paid to AIP participants in the form of shares of common stock following their termination of employment with Nucor.

A summary of Nucor's restricted stock activity under the AIP and the LTIP is as follows (shares in thousands):

	Year Ended December 31,					
	2025		2024		2023	
	Shares	Grant Date Fair Value Per Share	Shares	Grant Date Fair Value Per Share	Shares	Grant Date Fair Value Per Share
Restricted stock units and restricted stock awards:						
Unvested at beginning of year	248	$ 169.36	210	$ 145.55	209	$ 108.55
Granted	267	$ 133.46	421	$ 187.54	414	$ 171.38
Vested	(312)	$ 148.12	(383)	$ 175.06	(406)	$ 152.68
Canceled	—	$ —	—	$ —	(7)	$ 154.05
Unvested at end of year	203	$ 154.81	248	$ 169.36	210	$ 145.55

Compensation expense for common stock and common stock units awarded under the AIP and the LTIP is recorded over the performance measurement and vesting periods based on the anticipated number and market value of shares of common stock and common stock units to be awarded. Compensation expense for anticipated awards based upon Nucor's financial performance, exclusive of amounts payable in cash, was $41 million in 2025 ($21 million in 2024 and $38 million in 2023). The total fair value of shares vested during 2025 was $42 million ($71 million in 2024 and $69 million in 2023). As of December 31, 2025, unrecognized compensation expense related to unvested restricted stock awards was $6 million, which is expected to be recognized over a weighted-average period of 1.5 years.

17. Employee Benefit Plans

Nucor makes contributions to a Profit Sharing and Retirement Savings Plan for qualified employees based on the profitability of the Company. Nucor's expense for these benefits totaled $256 million in 2025 ($298 million in 2024 and $611 million in 2023). The related liability for these benefits is included in salaries, wages and related accruals in the consolidated balance sheets.

Nucor also has a medical plan covering certain eligible early retirees. The unfunded obligation, included in deferred credits and other liabilities in the consolidated balance sheets, totaled $41 million at December 31, 2025 ($35 million at December 31, 2024). The (benefit) expense associated with this early retiree medical plan totaled $(1) million in 2025 ($3 million in 2024 and $0.3 million in 2023). The discount rate used by Nucor in determining its benefit obligation was 5.6% in 2025 (5.7% in 2024 and 5.0% in 2023). The health care cost increase trend rate used was 7.3% in 2025 (6.3% in 2024 and 6.8% in 2023). The health care cost increase trend rate is projected to decline gradually to 4.0% by 2051.

18. Interest Expense (Income)

The components of net interest expense (income) are as follows (in millions):

	Year Ended December 31,		
	2025	2024	2023
Interest expense	$ 170	$ 228	$ 246
Interest income	(111)	(258)	(276)
Interest expense (income), net	$ 59	$ (30)	$ (30)

Interest paid was $281 million in 2025 ($256 million in 2024 and $257 million in 2023).

19. Income Taxes

On July 4, 2025, the One Big Beautiful Bill Act (the "OBBBA") was signed into law. Nucor has reflected the enactment of the OBBBA in the 2025 financial statements as required by accounting principles generally accepted in the United States. The impact of the OBBBA on Nucor's provision for income taxes was immaterial.

Components of earnings before income taxes and noncontrolling interests are as follows (in millions):

	Year Ended December 31,		
	2025	2024	2023
United States	$ 2,514	$ 2,884	$ 6,204
Foreign	54	18	69
	$ 2,568	$ 2,902	$ 6,273

The provision for income taxes consists of the following (in millions):

	Year Ended December 31,		
	2025	2024	2023
Current:			
Federal	$ 306	$ 587	$ 1,128
State	39	77	194
Foreign	24	35	17
Total current	369	699	1,339
Deferred:			
Federal	145	(108)	20
State	15	(7)	(19)
Foreign	1	(1)	20
Total deferred	161	(116)	21
Total provision for income taxes	$ 530	$ 583	$ 1,360

As further described in Note 2, *Summary of Significant Accounting Policies*, Nucor has adopted the new guidance related to income tax disclosures on a prospective basis. The following table is a reconciliation of the federal statutory rate (21%) to the total provision for the year ended December 31, 2025 in accordance with the new guidance for income tax disclosures (dollars in millions).

	Year Ended December 31, 2025	
U.S. federal statutory tax rate	$ 539	21.00%
State and local income taxes, net of federal income tax effect (1)	63	2.45%
Foreign tax effects	14	0.55%
Effect of changes in tax laws or rates enacted in the current period	—	0.00%
Effect of cross-border tax laws	(2)	-0.08%
Tax credits	(9)	-0.35%
Nontaxable or nondeductible items		
Noncontrolling interest	(69)	-2.70%
Other nontaxable or nondeductible items	22	0.86%
Changes in unrecognized tax benefits	(30)	-1.17%
Other adjustments	2	0.08%
Provision for income taxes	$ 530	20.64%

(1) State taxes in California, Arkansas, Nebraska, Alabama, Georgia, Illinois and Tennessee made up the majority (greater than 50%) of the tax effect in this category.

The following table is a reconciliation of the federal statutory rate (21%) to the total provision for the years ended December 31, 2024 and 2023 as previously reported and unadjusted for the new guidance for income tax disclosures:

	Year Ended December 31,	
	2024	2023
Taxes computed at statutory rate	21.00%	21.00%
State income taxes, net of federal income tax benefit	1.79%	2.14%
Federal research credit	-1.55%	-0.51%
Equity in losses of foreign joint venture	0.00%	0.17%
Foreign rate differential	-0.10%	0.10%
Foreign valuation allowance	1.13%	0.08%
Noncontrolling interests	-2.33%	-1.27%
Other, net	0.15%	-0.03%
Provision for income taxes	20.09%	21.68%

For the year ended December 31, 2025, the effective tax rate on continuing operations was 20.64% compared to 20.09% for the year ended December 31, 2024.

Current federal and state income taxes receivable included in other current assets in the consolidated balance sheets were $83 million at December 31, 2025 ($218 million at December 31, 2024). In 2025, Nucor paid $190 million in net federal income taxes, $22 million in net state income taxes and $47 million in net foreign income taxes (of which $32 million was paid to Canada). Net income tax payments of $508 million and $1.06 billion were paid in 2024 and 2023, respectively, to federal, state and foreign jurisdictions.

Deferred tax assets and liabilities resulted from the following (in millions):

	December 31,	
	2025	2024
Deferred tax assets:		
Accrued liabilities and reserves	$ 262	$ 248
Allowance for doubtful accounts	35	40
Inventory	83	87
Research and development expenditures	12	207
Post-retirement benefits	12	9
Hedges	4	—
Net operating loss carryforward	134	113
Tax credit carryforwards	255	127
Other deferred tax assets	18	14
Valuation allowance (1)	(275)	(152)
Total deferred tax assets	540	693
Deferred tax liabilities:		
Holdbacks and amounts not due under contracts	(14)	(12)
Hedges	—	(1)
Intangibles	(681)	(690)
Property, plant and equipment	(1,103)	(1,085)
Other deferred tax liabilities	(50)	(53)
Book/Tax differences on debt modifications	(41)	(44)
Total deferred tax liabilities	(1,889)	(1,885)
Total net deferred tax liabilities	$ (1,349)	$ (1,192)

(1) The increase in the valuation allowance is primarily related to state tax credits awarded during 2025 for which realization was determined to be unlikely.

Non-current deferred tax assets included in other assets in the consolidated balance sheets were $30 million at December 31, 2025 ($44 million at December 31, 2024). Non-current deferred tax liabilities included in deferred credits and other liabilities in the consolidated balance sheets were $1.38 billion at December 31, 2025 ($1.24 billion at December 31, 2024).

Nucor has not recognized deferred tax liabilities on its investment in foreign subsidiaries with undistributed earnings that satisfy the permanent reinvestment requirements (the deferred tax liabilities on the investments not permanently reinvested are immaterial). While Nucor considers future earnings to be permanently reinvested, it is expected that potential future distributions will likely be nontaxable. If this assertion of permanent reinvestment were to change, there may be deferred tax liabilities related to the withholding tax impacts on the actual distribution of certain cumulative undistributed foreign earnings, but the Company believes this amount to be immaterial.

State net operating loss ("NOL") carryforwards were $230 million at December 31, 2025 ($200 million at December 31, 2024). If unused, they will expire between 2026 and 2045. Foreign NOL carryforwards were $402 million at December 31, 2025 ($355 million at December 31, 2024). If unused, the foreign NOL carryforwards will expire between 2026 and 2035.

At December 31, 2025, Nucor had approximately $173 million of unrecognized tax benefits, of which $173 million would affect Nucor's effective tax rate, if recognized. At December 31, 2024, Nucor had approximately $212 million of unrecognized tax benefits, of which $209 million would affect Nucor's effective tax rate, if recognized.

A reconciliation of the beginning and ending amounts of unrecognized tax benefits recorded in deferred credits and other liabilities in the consolidated balance sheets is as follows (in millions):

	December 31,		
	2025	2024	2023
Balance at beginning of year	$ 212	$ 188	$ 142
Additions based on tax positions related to current year	11	31	44
Reductions based on tax positions related to current year	—	—	—
Additions based on tax positions related to prior years	—	7	10
Reductions based on tax positions related to prior years	(13)	(8)	(1)
Reductions due to settlements with taxing authorities	—	—	—
Reductions due to statute of limitations lapse	(37)	(6)	(7)
Balance at end of year	$ 173	$ 212	$ 188

During 2025, Nucor recognized $1 million of expense in interest and penalties ($12 million of expense in 2024 and $10 million of expense in 2023). The interest and penalties are included in interest expense, net and marketing, administrative and other expenses, respectively, in the consolidated statements of earnings. As of December 31, 2025, Nucor had approximately $49 million of accrued interest and penalties related to uncertain tax positions (approximately $50 million as of December 31, 2024). The accrued interest and penalties are included in accrued expenses and other current liabilities and deferred credits and other liabilities, respectively, in the consolidated balance sheets.

Nucor has concluded U.S. federal income tax matters for tax years through 2021. The tax years 2022 through 2024 remain open to examination by the Internal Revenue Service. The 2015 through 2021 Canadian income tax returns for Nucor Rebar Fabrication Group Inc. (formerly known as Harris Steel Group Inc.) and certain related affiliates are currently under examination by the Canada Revenue Agency. The tax years 2017 through 2024 remain open to examination by other major taxing jurisdictions to which Nucor is subject (primarily Canada, Trinidad & Tobago, and other state and local jurisdictions).

20. Accumulated Other Comprehensive Income (Loss)

The following tables reflect the changes in accumulated other comprehensive income (loss) by component (in millions):

	Gains and (Losses) on Hedging Derivatives	Foreign Currency Gains (Losses)	Adjustment to Early Retiree Medical Plan	Total
December 31, 2024	$ 1	$ (220)	$ 11	$ (208)
Other comprehensive income (loss) before reclassifications	(39)	34	(6)	(11)
Amounts reclassified from accumulated other comprehensive income (loss) into earnings [1]	25	—	—	25
Net current-period other comprehensive income (loss)	(14)	34	(6)	14
December 31, 2025	$ (13)	$ (186)	$ 5	$ (194)

(1) Includes $25 net-of-tax impact of accumulated other comprehensive income (loss) reclassifications into cost of products sold for net losses on commodity contracts. The tax impact of this reclassification was $8.

	Gains and (Losses) on Hedging Derivatives	Foreign Currency Gains (Losses)	Adjustment to Early Retiree Medical Plan	Total
December 31, 2023	$ (14)	$ (159)	$ 11	$ (162)
Other comprehensive income (loss) before reclassifications	(6)	(61)	—	(67)
Amounts reclassified from accumulated other comprehensive income (loss) into earnings [2]	21	—	—	21
Net current-period other comprehensive income (loss)	15	(61)	—	(46)
December 31, 2024	$ 1	$ (220)	$ 11	$ (208)

(2) Includes $21 and $(0) net-of-tax impact of accumulated other comprehensive income (loss) reclassifications into cost of products sold for net losses on commodity contracts and adjustment to early retiree medical plan, respectively. The tax impacts of these reclassifications were $7 and $(0), respectively.

21. Earnings Per Share

The computations of basic and diluted net earnings per share are as follows (in millions, except per share data):

Year Ended December 31,	2025	2024	2023
Basic net earnings per share:			
Basic net earnings	$ 1,744	$ 2,027	$ 4,525
Earnings allocated to participating securities	(7)	(9)	(17)
Net earnings available to common stockholders	$ 1,737	$ 2,018	$ 4,508
Basic average shares outstanding	230.7	238.3	249.8
Basic net earnings per share	$ 7.53	$ 8.47	$ 18.05
Diluted net earnings per share:			
Diluted net earnings	$ 1,744	$ 2,027	$ 4,525
Earnings allocated to participating securities	(7)	(9)	(17)
Net earnings available to common stockholders	$ 1,737	$ 2,018	$ 4,508
Diluted average shares outstanding:			
Basic average shares outstanding	230.7	238.3	249.8
Dilutive effect of stock options and other	0.3	0.2	0.6
	231.0	238.5	250.4
Diluted net earnings per share	$ 7.52	$ 8.46	$ 18.00

The following stock options were excluded from the computation of diluted net earnings per share because their effect would have been anti-dilutive (shares in thousands):

Year Ended December 31,	2025	2024	2023
Anti-dilutive stock options:			
Weighted-average shares	164	35	—
Weighted-average exercise price	$ 147.70	$ 168.85	$ —

22. Segments

Nucor reports its results in the following segments: steel mills, steel products and raw materials. The steel mills segment includes carbon and alloy steel in sheet, bars, structural and plate; steel trading businesses; rebar distribution businesses; and Nucor's equity method investment in NuMit. The steel products segment includes steel joists and joist girders, steel deck, fabricated concrete reinforcing steel, cold finished steel, precision castings, steel fasteners, metal building systems, insulated metal panels, steel grating, tubular products businesses, steel racking, piling products business, wire and wire mesh, overhead doors, and utility towers and structures. The raw materials segment includes The David J. Joseph Company and its affiliates ("DJJ"), primarily a scrap broker and processor; Nu-Iron Unlimited and Nucor Steel Louisiana LLC, two facilities that produce direct reduced iron used by the steel mills; and our natural gas production operations.

Corporate/eliminations include items such as net interest expense on long-term debt, charges and credits associated with changes in allowances to eliminate intercompany profit in inventory, profit sharing expense and stock-based compensation. Corporate assets primarily include cash and cash equivalents, short-term investments, allowances to eliminate intercompany profit in inventory, deferred income tax assets, federal and state income taxes receivable and investments in and advances to affiliates.

Segment results are regularly reviewed by the Company's Chief Operating Decision Makers ("CODMs"), the Chief Executive Officer and the Chief Operating Officer, to manage the business, make decisions about resources to be allocated to the segments and to assess performance. The measure of profit and loss that is used by the CODMs to assess segment performance and to allocate resources is earnings before income taxes and noncontrolling interests by segment ("segment earnings"). Our CODMs evaluate each segment's performance based on metrics such as net sales, segment earnings and other key financial indicators, guiding strategic decisions to align with company-wide goals.

Segment cost of products sold is considered a significant segment expense and is regularly provided to the CODMs. Segment cost of products sold includes amounts related to both net sales to external customers and intercompany sales.

In 2025, we recast the following "results by segment" tables for the reclassification of the elimination of intrasegment sales from DJJ's scrap processing operations to DJJ's scrap brokerage operations. We made this change so that the presentation of other segment items for the raw materials segment would be more consistent with other segment items in the steel mills and steel products segments, which consist of other segment expenses that are not considered significant. This reclassification was applied to all periods presented and did not have an impact on segment earnings before income taxes and noncontrolling interests for the raw materials segment.

Nucor's results by segment were as follows (in millions):

	2025			
	Steel Mills	Steel Products	Raw Materials	Totals
Sales				
Net sales to external customers	$ 20,003	$ 10,327	$ 2,164	$ 32,494
Intercompany sales	5,067	642	10,606	16,315
Total Sales	25,070	10,969	12,770	48,809
Reconciliation of Sales				
Elimination of intercompany sales				(16,315)
Net sales to external customers				32,494
Less:				
Cost of products sold	22,581	9,356	12,563	44,500
Other segment items	106	384	54	544
Segment earnings before income taxes and noncontrolling interests	2,383	1,229	153	3,765

	$ 3,396	$ 3,288	$ 2,215

In 2025, we recast the following 'net sales by product' table to combine the net sales of our joist and deck operations into one product group to align with how management currently manages that business. This change was made for all periods presented and did not impact the steel products segment's sales or segment earnings before income taxes and noncontrolling interests.

Net sales by product were as follows (in millions). Further product group breakdown is impracticable.

	Year Ended December 31,		
	2025	2024	2023
Net sales to external customers:			
Sheet	$ 9,156	$ 9,248	$ 9,147

	$ 32,494	$ 30,734	$ 34,714

23. Revenue

Nucor recognizes revenue when obligations under the terms of contracts with our customers are satisfied and collection is reasonably assured; generally, obligations under the terms of contracts are satisfied upon shipment or when control is transferred. Revenue is measured as the amount of consideration expected to be received in exchange for transferring the goods. In addition, revenue is deferred when cash payments are received or due in advance of performance.

The durations of Nucor's contracts with customers are generally one year or less. Customer payment terms are generally 30 days.

Contract liabilities are primarily related to deferred revenue resulting from cash payments received in advance from customers to protect against credit risk. Contract liabilities totaled $243 million as of December 31, 2025 ($200 million as of December 31, 2024), and the vast majority are included in accrued expenses and other current liabilities in the consolidated balance sheets. The amount of revenue recognized from the December 31, 2024 contract liabilities balance during 2025 was approximately $119 million.

Nucor disaggregates its revenues by major source in the same manner as presented in the net sales by product table in the segment footnote (see Note 22).

Steel Mills Segment

Sheet – For the majority of sheet products, we transfer control and recognize a sale when we ship the product from the sheet mill to our customer. The amount of consideration we receive and revenue we recognize for spot market sales are based upon prevailing prices at the time of sale. The amount of consideration we receive and revenue we recognize for contract customers are based primarily on pricing formulas that incorporate monthly or quarterly price adjustments which reflect changes in the current market-based indices and/or raw material costs near the time of shipment.

The amount of tons sold to contract customers at any given time depends on a variety of factors, including our consideration of current and future market conditions, our strategy to appropriately balance spot and contract tons in a manner to meet our customers' requirements while considering the expected profitability, our desire to sustain a diversified customer base and our end-use customers' perceptions about future market conditions. These contracts are typically one year or less. Contract sales within the steel mills segment are most notable in our sheet operations, as it is common for contract sales to account for the majority of sheet sales in a given year.

Bar, Structural and Plate – For the majority of bar, structural and plate products, we transfer control and recognize a sale when we ship the product from the mill to our customer. The significant majority of bar, structural and plate product sales are spot market sales, and the amount of consideration we receive and revenue we recognize for those sales are based upon prevailing prices at the time of sale.

Steel Products Segment

Tubular Products – The tubular products businesses transfer control and recognize a sale when the products are shipped from our operating locations to our customers. The majority of tubular product sales are spot market sales, and the amount of consideration we receive and revenue we recognize for those sales are based upon prevailing prices at the time of sale.

Rebar Fabrication – The majority of rebar fabrication revenue is derived from contracts with customers for the supply of fabricated rebar. As the majority of contracts with customers are fixed price contracts to complete a job, control transfers over time and revenue is recognized (if collection is reasonably assured) over time using an input method, based on the amount of rebar shipped from the Company's operating locations relative to the total expected amount of rebar required to complete the job.

For contracts to supply fabricated rebar and install it at the customer's job site, there are two performance obligations: (1) the supply of the fabricated rebar and (2) the installation of the supplied rebar at the customer's job site. For the supply of fabricated rebar performance obligation, the transaction price allocated to this performance obligation is determined at the start of the contract, based on the awarded contract price for the supplied fabricated rebar and revenue is recognized over time based on the amount of rebar shipped from the Company's operating locations relative to the total expected amount of rebar required to complete the job. For the installation of supplied rebar performance obligation, the transaction price allocated to this performance obligation is determined at the start of the contract, based on the awarded contract price for the installation of fabricated rebar and revenue is recognized over time based on the amount of rebar installed relative to the total expected amount of rebar required to be installed to complete the job.

While a majority of the contracts with customers are fixed price contracts to complete a job, variable consideration can occur from contract modifications relating to change orders and price escalations caused by changes in underlying material costs. In these situations, the additional variable consideration is recognized cumulatively in the period in which the contract modification is approved and collection is reasonably assured unless the change order relates to additional distinct goods or services at standalone selling prices in which case they are accounted for prospectively. Management reviews these situations on a case-by-case basis and considers a variety of factors, including relevant experience with similar types of performance obligations, the Company's experience with the customer and collectability considerations.

Other Steel Products – Other steel products include our joist and deck, cold finish, metal building systems, insulated metal panels, piling, door technologies, towers and structures, and the other remaining businesses that make up the steel products segment. Generally, for these businesses, we transfer control and recognize a sale when we ship the product from our operating locations to our customers. The amount of consideration we receive and revenue we recognize for those sales are agreed upon with the customers before the product is shipped.

Included in the other steel products businesses is Nucor Racking Group ("NRG"). The majority of NRG's revenues are related to supply and installation contracts. Revenue on NRG's supply and installation contracts is primarily recognized over time, typically between three and six months, using the cost-to-cost input measure (e.g., costs incurred to date relative to total estimated costs at completion) to measure progress because it best depicts the transfer of assets to the customer which occurs as the Company incurs costs on the contracts.

Raw Materials Segment

The majority of the raw materials segment revenue from outside customers is generated by DJJ. We transfer control and recognize a sale based on the terms of the agreement with the customer, which is generally when the product has met the delivery requirements. The amount of consideration we receive and revenue we recognize for those sales is based on the contract with the customer, which generally reflects current market prices at the time the contract is entered into.

24. Acquisitions

Acquisition of Rytec Corporation

On July 23, 2024, Nucor used cash on hand to acquire the assets of Rytec Corporation ("Rytec") for a purchase price, net of cash and debt acquired, of approximately $565 million. Rytec is a manufacturer and seller of high-performance overhead doors. Rytec produces spiral metal doors for warehouses, manufacturing facilities, auto dealerships, and parking garages, as well as durable fabric doors that are used in cold storage, manufacturing and clean room applications. We believe this acquisition will help Nucor and C.H.I. Overhead Doors, LLC continue to grow their sales to the commercial market. The Rytec financial results were included as part of the steel products segment (see Note 22) beginning on July 23, 2024, the date Nucor acquired Rytec.

We allocated the purchase price for Rytec to its individual assets acquired and liabilities assumed.

The following table summarizes the fair values of the assets acquired and liabilities assumed of Rytec as of July 23, 2024, the date of acquisition (in millions):

Cash	$	1
Accounts receivable		35
Inventory		33
Other current assets		1
Property, plant and equipment		32
Goodwill		275
Other intangible assets		215
Other assets		—
Total assets acquired		592
Accounts payable		16
Salary, wages and related accruals		5
Other current liabilities		6
Total liabilities assumed		27
Net assets acquired	$	565

The following table summarizes the purchase price allocation to the identifiable intangible assets of Rytec as of July 23, 2024, the date of acquisition (in millions, except years):

			Weighted-Average Life
Customer relationships	$	185	15 years
Trademarks and trade names		16	10 years
Other intangibles		14	< 1 year
	$	215	

The goodwill of $275 million is calculated as the excess of the purchase price over the fair values of the assets acquired and liabilities assumed and has been allocated to the steel products segment (see Note 8). The goodwill is attributable to expected synergies within the steel products segment. Goodwill recognized for tax purposes was $275 million, all of which is deductible for tax purposes. Pro-forma results of operations for the Company would not be materially different as a result of the acquisition of Rytec and, therefore, this information is not presented.

Acquisition of Additional Interest in NJSM

On October 27, 2023, Nucor used cash on hand to acquire an additional 1% equity interest in NJSM bringing our total equity ownership to a 51% controlling interest. We believe this acquisition allows NJSM to benefit from Nucor's galvanized sheet sales expertise in North America.

Prior to this transaction, we accounted for our 50% ownership in NJSM under the equity method. As part of the purchase price allocation for this step acquisition, we remeasured our previously held interest as of the acquisition date which resulted in a $21 million loss recorded in marketing, administrative and other expenses. Neither our previously held equity interest in NJSM nor the loss on remeasuring the equity interest are material to our financial statements.

We allocated the purchase price for NJSM to its individual assets acquired and liabilities assumed.

The following table summarizes the fair values of the assets acquired and liabilities assumed of NJSM, as well as the fair value of the 49% noncontrolling interest not acquired by Nucor, as of October 27, 2023, the date of acquisition (in millions):

Cash	$	11
Accounts receivable		11
Inventory		45
Other current assets		18
Property, plant and equipment		258
Goodwill		—
Other intangible assets		—
Other assets		—
Total assets acquired		343
Short-term debt		95
Current portion of long-term debt		50
Other current liabilities		14
Long-term debt due after one year		30
Other liabilities		1
Total liabilities assumed		190
Net assets acquired at 100%		153
Less: Fair value of noncontrolling interest		75
Net assets acquired at 51%	$	78

The determination of the fair value of noncontrolling interest was calculated using the implied value of 100% of the enterprise value as the purchase price included an immaterial implied control premium on a per-share basis and the noncontrolling interest shareholder will benefit from the transaction and participate in the economic benefits of NJSM after the acquisition.

The NJSM financial results were included as part of the steel mills segment (see Note 22) beginning on October 27, 2023, the acquisition date. Pro-forma results of operations for the Company would not be materially different as a result of the acquisition of NJSM and, therefore, this information is not presented.

Other Acquisitions

Other smaller acquisitions, exclusive of purchase price adjustments made and net of cash acquired, totaled approximately $193 million and $71 million in 2024 and 2023, respectively. Pro-forma results of operations for the Company would not be materially different if the aggregate acquisitions made during 2024 and 2023 were included and, therefore, this information is not presented.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures – As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based upon that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of the evaluation date.

Changes in Internal Control Over Financial Reporting – There were no changes in our internal control over financial reporting during the quarter ended December 31, 2025 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Report on Internal Control Over Financial Reporting – Management's report on internal control over financial reporting required by Section 404 of the Sarbanes-Oxley Act of 2002 and the attestation report of PricewaterhouseCoopers LLP, an independent registered public accounting firm, on the effectiveness of Nucor's internal control over financial reporting as of December 31, 2025 are included in "Item 8. Financial Statements and Supplementary Data" and incorporated herein by reference.

Item 9B. Other Information.

Insider Trading Arrangements - During the quarter ended December 31, 2025, none of our directors or officers (as defined in Rule 16a-1(f) under the Exchange Act) adopted, modified or terminated a "Rule 10b5-1 trading arrangement" or a "non-Rule 10b5-1 trading arrangement" (as such terms are defined in Item 408 of Regulation S-K).

Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections.

Not applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

The information required by this item with respect to Nucor's executive officers appears in Part I of this report under the heading *Information About Our Executive Officers* and is incorporated herein by reference. The other information required by this item is incorporated herein by reference from Nucor's definitive proxy statement for our 2025 Annual Meeting of Stockholders, which we expect to file with the SEC pursuant to Regulation 14A not later than 120 days after December 31, 2025 (the "Proxy Statement"), under the headings *Election of Directors; Information Concerning Experience, Qualifications, Attributes and Skills of the Nominees; Corporate Governance and Board of Directors; and Delinquent Section 16(a) Reports.*

Nucor has adopted a Code of Ethics for Senior Financial Professionals (the "Code of Ethics"), which is intended to qualify as a "code of ethics" within the meaning of Item 406 of Regulation S-K of the Securities Exchange Act of 1934, as amended. The Code of Ethics applies to our principal executive officer, principal financial officer, principal accounting officer or controller, and persons performing similar functions. The Code of Ethics is available on our website, *www.nucor.com*.

We will disclose information pertaining to any amendment to, or waiver from, the provisions of the Code of Ethics that apply to our principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions and that relate to any element of the Code of Ethics enumerated in the SEC rules and regulations by posting this information on our website, *www.nucor.com.* The information contained on our website or available by hyperlink from our website is not a part of this report and is not incorporated into this report or any other documents we file with, or furnish to, the SEC.

We have adopted an insider trading policy governing the purchase, sale, and other dispositions of our securities by our directors, officers, and employees, and by the Company. We believe this policy is reasonably designed to promote compliance with insider trading laws, rules, and regulations and listing standards applicable to the Company. A copy of our insider trading policy is filed as Exhibit 19 to this report.

Item 11. Executive Compensation.

The information required by this item is incorporated herein by reference from the Proxy Statement under the headings *Executive Officer Compensation; Director Compensation; Report of the Compensation and Executive Development Committee*; and *Board's Role in Risk Oversight*.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

The information required by this item is incorporated herein by reference from the Proxy Statement under the headings *Security Ownership of Management and Certain Beneficial Owners* and *Equity Compensation Plan Information.*

Item 13. Certain Relationships and Related Transactions, and Director Independence.

The information required by this item is incorporated herein by reference from the Proxy Statement under the heading *Corporate Governance and Board of Directors*.

Item 14. Principal Accountant Fees and Services.

The information required by this item is incorporated herein by reference from the Proxy Statement under the heading *Fees Paid to Independent Registered Public Accounting Firm*.

PART IV

Item 15. Exhibits and Financial Statement Schedules.

Financial Statements:

The following consolidated financial statements and notes thereto, management's report on internal control over financial reporting and the report of independent registered public accounting firm are included in "Item 8. Financial Statements and Supplementary Data":

- Management's Report on Internal Control Over Financial Reporting
- Report of Independent Registered Public Accounting Firm
- Consolidated Balance Sheets—December 31, 2025 and 2024
- Consolidated Statements of Earnings—Years Ended December 31, 2025, 2024 and 2023
- Consolidated Statements of Comprehensive Income—Years Ended December 31, 2025, 2024 and 2023
- Consolidated Statements of Stockholders' Equity—Years Ended December 31, 2025, 2024 and 2023
- Consolidated Statements of Cash Flows—Years Ended December 31, 2025, 2024 and 2023
- Notes to Consolidated Financial Statements

Schedule II is not presented as all applicable information is presented in the consolidated financial statements and notes thereto.

Exhibits:

3	Restated Certificate of Incorporation of Nucor Corporation (incorporated by reference to Exhibit 3.3 to the Current Report on Form 8-K filed September 14, 2010 (File No. 001-04119))
3(i)	Bylaws of Nucor Corporation as amended and restated February 22, 2021 (incorporated by reference to Exhibit 3.1 to the Current Report on Form 8-K filed February 24, 2021 (File No. 001-04119))
4	Description of Securities of Nucor Corporation (incorporated by reference to Exhibit 4 to the Annual Report on Form 10-K for the year ended December 31, 2024 (File No. 001-04119))
4(i)	Indenture, dated as of January 12, 1999, between Nucor Corporation and The Bank of New York Mellon (formerly known as The Bank of New York), as trustee (incorporated by reference to Exhibit 4.1 to the Registration Statement on Form S-4 filed December 13, 2002 (File No. 333-101852))
4(ii)	Indenture, dated as of August 19, 2014, between Nucor Corporation and U.S. Bank National Association, as trustee (incorporated by reference to Exhibit 4.3 to the Registration Statement on Form S-3 filed August 20, 2014 (File No. 333-198263))
4(iii)	Third Supplemental Indenture, dated as of December 3, 2007, between Nucor Corporation and The Bank of New York Mellon (formerly known as The Bank of New York), as trustee (incorporated by reference to Exhibit 4.1 to the Current Report on Form 8-K filed December 4, 2007 (File No. 001-04119))
4(iv)	Sixth Supplemental Indenture, dated as of July 29, 2013, between Nucor Corporation and U.S. Bank National Association, as successor trustee (incorporated by reference to Exhibit 4.1 to the Current Report on Form 8-K filed July 29, 2013 (File No. 001-04119))
4(v)	Seventh Supplemental Indenture, dated as of December 10, 2014, among Nucor Corporation, The Bank of New York Mellon, as prior trustee, and U.S. Bank National Association, as successor trustee (incorporated by reference to Exhibit 4.1 to the Current Report on Form 8-K filed December 11, 2014 (File No. 001-04119))
4(vi)	First Supplemental Indenture, dated as of April 26, 2018, between Nucor Corporation and U.S. Bank National Association, as trustee (incorporated by reference to Exhibit 4.1 to the Current Report on Form 8-K filed April 26, 2018 (File No. 001-04119))

4(vii)	Second Supplemental Indenture, dated as of May 22, 2020, between Nucor Corporation and U.S. Bank National Association, as trustee (incorporated by reference to Exhibit 4.1 to the Current Report on Form 8-K filed May 22, 2020 (File No. 001-04119))
4(viii)	Third Supplemental Indenture, dated as of December 7, 2020, between Nucor Corporation and U.S. Bank National Association, as trustee (incorporated by reference to Exhibit 4.1 to the Current Report on Form 8-K filed December 7, 2020 (File No. 001-04119))
4(ix)	Fourth Supplemental Indenture, dated as of March 11, 2022, between Nucor Corporation and U.S. Bank Trust Company, National Association, as trustee (incorporated by reference to Exhibit 4.2 to the Current Report on Form 8-K filed March 11, 2022 (File No. 001-04119))
4(x)	Fifth Supplemental Indenture, dated as of May 23, 2022, between Nucor Corporation and U.S. Bank Trust Company, National Association, as trustee (incorporated by reference to Exhibit 4.1 to the Current Report on Form 8-K filed May 23, 2022 (File No. 001-04119))
4(xi)	Sixth Supplemental Indenture, dated as of March 5, 2025, between Nucor Corporation and U.S. Bank Trust Company, National Association, as trustee (incorporated by reference to Exhibit 4.1 to the Current Report on Form 8-K filed March 5, 2025 (File No. 001-04119))
4(xii)	Form of 6.400% Notes due 2037 (included in Exhibit 4(iii) above) (incorporated by reference to Exhibit 4.4 to the Current Report on Form 8-K filed December 4, 2007 (File No. 001-04119))
4(xiii)	Form of 5.200% Notes due 2043 (included in Exhibit 4(iv) above) (incorporated by reference to Exhibit 4.3 to the Current Report on Form 8-K filed July 29, 2013 (File No. 001-04119))
4(xiv)	Form of 3.950% Notes due 2028 (included in Exhibit 4(vi) above) (incorporated by reference to Exhibit 4.2 to the Current Report on Form 8-K filed April 26, 2018 (File No. 001-04119))
4(xv)	Form of 4.400% Notes due 2048 (included in Exhibit 4(vi) above) (incorporated by reference to Exhibit 4.3 to the Current Report on Form 8-K filed April 26, 2018 (File No. 001-04119))
4(xvi)	Form of 2.700% Notes due 2030 (included in Exhibit 4(vii) above) (incorporated by reference to Exhibit 4.3 to the Current Report on Form 8-K filed May 22, 2020 (File No. 001-04119))
4(xvii)	Form of 2.979% Notes due 2055 (included in Exhibit 4(viii) above) (incorporated by reference to Exhibit 4.2 to the Current Report on Form 8-K filed December 7, 2020 (File No. 001-04119))
4(xviii)	Form of 3.125% Notes due 2032 (included in Exhibit 4(ix) above) (incorporated by reference to Exhibit 4.3 to the Current Report on Form 8-K filed March 11, 2022 (File No. 001-04119))
4(xix)	Form of 3.850% Notes due 2052 (included in Exhibit 4(ix) above) (incorporated by reference to Exhibit 4.4 to the Current Report on Form 8-K filed March 11, 2022 (File No. 001-04119))
4(xx)	Form of 4.300% Notes due 2027 (included in Exhibit 4(x) above) (incorporated by reference to Exhibit 4.3 to the Current Report on Form 8-K filed May 23, 2022 (File No. 001-04119))
4(xxi)	Form of 4.650% Notes due 2030 (included in Exhibit 4(xi) above) (incorporated by reference to Exhibit 4.2 to the Current Report on Form 8-K filed March 5, 2025 (File No. 001-04119))
4(xxii)	Form of 5.100% Notes due 2035 (included in Exhibit 4(xi) above) (incorporated by reference to Exhibit 4.3 to the Current Report on Form 8-K filed March 5, 2025 (File No. 001-04119))
10	Fifth Amended and Restated Multi-Year Revolving Credit Agreement, dated as of March 11, 2025, by and among Nucor Corporation, as borrower, Bank of America, N.A., as administrative agent, and the lenders party thereto (incorporated by reference to Exhibit 10.1 to the Current Report on Form 8-K filed March 17, 2025 (File No. 001-04119))
10(i)	2005 Stock Option and Award Plan (incorporated by reference to Exhibit 10.1 to the Current Report on Form 8-K filed May 17, 2005 (File No. 001-04119)) (#)
10(ii)	Amendment No. 1 to 2005 Stock Option and Award Plan (incorporated by reference to Exhibit 10.2 to the Quarterly Report on Form 10-Q for the quarter ended September 29, 2007 (File No. 001-04119)) (#)
10(iii)	2010 Stock Option and Award Plan (incorporated by reference to Exhibit 10.1 to the Quarterly Report on Form 10-Q for the quarter ended July 3, 2010 (File No. 001-04119)) (#)

10(iv)	2014 Omnibus Incentive Compensation Plan, as amended and restated effective February 21, 2022 (incorporated by reference to Exhibit 10 to the Quarterly Report on Form 10-Q for the quarter ended April 2, 2022 (File No. 001-04119)) (#)
